*Green Guide* Editors of Green Guide 2008-06-10 Paper or plastic?

Organic or conventional? In a world that is rapidly going "green," how does the average person make decisions that are smart for the family—and good for the planet? The Green Guide is here to help, with the concepts and choices for Earth-conscious living. Presented in concise, information-packed chapters, this up-to-the-minute resource touches on every aspect of our lives, from grocery shopping to housecleaning to work, travel, and investing—enabling consumers to make informed decisions and simple changes that impact the planet in big ways. Easy-to-follow information and hundreds of fascinating sidebars, fact boxes, and other key elements recommend how you can replace unhealthy and environmentally damaging practices and products with more wholesome, comfortable, and aesthetically pleasing alternatives. Neither scholarly nor scare-mongering in tone, the lively text has been written in partnership with a board of noted experts—offering readers the most authoritative, engaging, comprehensive, and in-depth reference of its kind. Created by two of the strongest brands in conservation and the environment, and drawn from more than ten years of reputable coverage in *The Green Guide* newsletter, on-line and in print, this comprehensive resource is destined to become a must-have for millions of families and the first name in household reference books in this up-and-coming category.

*David Suzuki's Green Guide* David Suzuki 2009-07-01 Everyone knows that the planet is in trouble, but is there a solution? This timely book identifies the most effective ways individuals can be more green in four key areas: home, travel, food, and consumerism. It also describes how citizens can ensure that governments take the actions necessary to make sustainable lifestyles the norm instead of the exception. Environmental

lawyer David Boyd and celebrated ecologist David Suzuki provide vital tips for choosing a home, creating a healthy indoor environment, and decreasing energy and water use — and utility bills. They discuss what readers can do to drive and fly less, profile the most environmentally friendly transportation choices, and explain how to purchase carbon credits, among other suggestions. In addition, they offer simple changes individuals can make in their diet to eat fresher, tastier, healthier food. Included too is invaluable advice about how to buy fewer things and avoid toxic consumer products.

*The Green Book* Elizabeth Rogers 2007-06-19 Ellen DeGeneres, Robert Redford, Will Ferrell, Jennifer Aniston, Faith Hill, Tim McGraw, Martha Stewart, Tyra Banks, Dale Earnhardt, Jr., Tiki Barber, Owen Wilson, and Justin Timberlake tell you how they make a difference to the environment. Inside *The Green Book*, find out how you can too: - Don't ask for ATM receipts. If everyone in the United States refused their receipts, it would save a roll of paper more than two billion feet long, or enough to circle the equator fifteen times! - Turn off the tap while you brush your teeth. You'll conserve up to five gallons of water per day. Throughout the entire United States, the daily savings could add up to more water than is consumed every day in all of New York City. - Get a voice-mail service for your home phone. If all answering machines in U.S. homes were replaced by voice-mail services, the annual energy savings would total nearly two billion kilowatt hours. The resulting reduction in air pollution would be equivalent to removing 250,000 cars from the road for a year! With wit and authority, authors Elizabeth Rogers and Thomas Kostigen provide hundreds of solutions for all areas of your life, pinpointing the smallest changes that have the biggest impact on the health of our precious planet.

Poised to become the go-to marijuana guide for recreational and medicinal users alike, Green is easy to pick up and impossible to put down.

**The Green Travel Guide** Greg Neale 1999 The Green Travel Guide is the travel guide for the future. It tells us how to travel without destroying the very places we want to visit. Written by Greg Neale, environment correspondent for The Sunday Telegraph, it is packed with practical advice for travellers. The second edition includes a whole new section on how to take different kinds of activity holidays, from wildlife watching and conservation to heritage, sports and back-to-the-land holidays. For each of them, detailed tips are given on how to minimise the environmental damage and the social disruption that travel and tourism so often bring. The guide to each area of the world and the listings of award-winning organisations and useful contacts have all been expanded and brought up to date.

**Michelin Green Guide Italy** Michelin Travel & Lifestyle 2012-03-01 This eBook version of the Green Guide Italy is completely revised and expanded, featuring the best that the country has to offer. The guide explores the rich culture, heritage and history of the cities, countryside and coastal areas. Michelin's celebrated star-rating system pinpoints Italy's highlights, whether the beautiful Dolomite mountain range, the UNESCO-designated historic city centers of Rome, Florence and Naples, or the stunning coastlines of Amalfi and Portofino Promontory. Regional introductions give an overview of each area, while Michelin's walking and driving tours, up-to-date content, maps and color photos help you discover this diverse country.

**The Regenerative Grower's Guide to Garden Amendments** Nigel

Palmer 2020-08-07 Revitalize your garden—and go beyond compost—by making your own biologically diverse inoculants and mineral-rich amendments using leaf mold, weeds, eggshells, bones, and other materials available for little or no cost! In The Regenerative Grower's Guide to Garden Amendments, experimental gardener and author Nigel Palmer provides practical, detailed instructions that are accessible to every grower who wants to achieve a truly sustainable garden ecosystem—all while enjoying better results at a fraction of the cost of commercial fertilizer products. These recipes go beyond fertilizer replacement, resulting in greater soil biological activity and mineral availability. They also increase pest and disease resistance, yields, and nutrient density. Recipes include: Extracting nutrients from plant residues using simple rainwater techniques Extracting minerals from bones and shells using vinegar Fermenting plant juices and fish Culturing indigenous microorganisms (IMO) Inspired by the work of many innovative traditional agricultural pioneers, especially Cho Ju-Young (founder of the Korean Natural Farming method), The Regenerative Grower's Guide to Garden Amendments also includes a primer on plant-soil interaction, instructions for conducting a soil test, and guidance on compost, cover cropping, mulching, measuring the quality of fruits and vegetables using a refractometer, and other aspects of sustainable gardening—making it a must-have resource for any serious grower.

**Balancing Green** Yossi Sheffi 2018-03-30 An expert on business strategy offers a pragmatic take on how businesses of all sizes balance the competing demands of profitability and employment with sustainability. The demands and stresses on companies only grow as executives face a multitude of competing business goals. Their stakeholders are interested in corporate profits, jobs, business growth, and environmental sustainability. In this book, business strategy expert Yossi Sheffi offers a pragmatic take on how businesses of all sizes—from Coca Cola and Siemens to Dr. Bronner's Magical Soaps and Patagonia—navigate these competing goals. Drawing on extensive interviews with more than 250 executives, Sheffi examines the challenges, solutions, and implications of

balancing traditional business goals with sustainability. Sheffi, author of the widely read *The Resilient Enterprise*, argues that business executives' personal opinions on environmental sustainability are irrelevant. The business merits of environmental sustainability are based on the fact that even the most ardent climate change skeptics in the C-suite face natural resource costs, public relations problems, regulatory burdens, and a green consumer segment. Sheffi presents three basic business rationales for corporate sustainability efforts: cutting costs, reducing risk, and achieving growth. For companies, sustainability is not a simple case of "profits versus planet" but is instead a more subtle issue of (some) people versus (other) people—those looking for jobs and inexpensive goods versus others who seek a pristine environment. This book aims to help companies satisfy these conflicting motivations for both economic growth and environmental sustainability.

**The Green Guide to Specification** Jane Anderson 2009-03-09 Like its predecessors, this fourth edition of *The Green Guide to Specification* provides designers and specifiers with easy-to-use guidance on how to make the best environmental choices when selecting construction materials and components. It is more comprehensive than its predecessors; it contains more than 1200 specifications used in six types of building: • Commercial buildings, such as offices • Educational buildings, such as schools and universities • Healthcare buildings, such as hospitals • Retail • Residential • Industrial. The principal building elements covered in this edition of *The Green Guide to Specification* include: • Floors • Roofs • Walls • Windows • Insulation • Landscaping. The performance of each specification is measured against a range of environmental impacts, including: • climate change • toxicity • fossil fuel and ozone depletion • levels of emissions and pollutants • mineral and water extraction. *The Green Guide to Specification* provides robust information to assist decision-making by translating numerical life-cycle assessment data into a simple A+ to E scale of environmental ratings, enabling specifiers to make meaningful comparisons between materials and components. *The Green Guide to Specification* is an essential tool for architects, surveyors, building managers and property owners seeking to

reduce the environmental impact of their buildings by informed and responsible selection of construction materials and components.

*Chesapeake Gardening and Landscaping* Barbara W. Ellis 2015-03-30 What if, one step at a time, we could make our gardens and landscapes more eco-friendly? Barbara W. Ellis's colorful, comprehensive guide shows homeowners, gardeners, garden designers, and landscapers how to do just that for the large and beautiful Chesapeake Bay watershed region. This area includes Maryland, Virginia, Delaware, Washington, D.C., and part of West Virginia (translating to portions of USDA Zones 6, 7, and 8). Here, mid-Atlantic gardeners, from beginners to advanced, will find the essential tools for taking steps to make their gardens part of the solution through long-term planning and planting. The guide is built from the ground up around six simple but powerful principles that anyone can use: \* Reduce lawn \* Build plant diversity \* Grow native plants \* Manage water runoff \* Welcome wildlife \* Garden wisely Included are detailed instructions for assessing and designing your particular garden or landscape site; choosing and caring for trees, shrubs, vines, ground covers, and flowers; and succeeding with such conditions as shade or poor soil. From rain gardens to woodland gardens, meadow gardens to wildlife gardens, and much more, this indispensable guide features more than 300 color photographs.

**Guide to Green Building Rating Systems** Linda Reeder 2010-03-29 The one-stop guide for choosing a green building rating system Today, sustainability is a growing concern for the architects, designers, builders, and owners of commercial and residential buildings. Meeting the requirements of a rating system provides a metric to evaluate and set priorities. But the variety and complexity of methods available to assess the eco-friendliness of a building can seem overwhelming. *Guide to Green Building Rating Systems* informs readers about the rating system selection process. Comparing essential issues such as cost, ease of use, and building performance, this book offers solid guidance that will help readers find the rating system that best fits their needs. This easy-to-follow reference includes: An overview of the major national rating systems, including LEED®, Green Globes®, the National Green Building

Standard, and ENERGY STAR® An in-depth look at each rating system, including its evolution, objectives, point structure, levels of certification, benefits, and shortcomings How the ratings systems work for different types of buildings—commercial, multi-family residential, and single-family residential construction Illustrated case studies from different climate regions with project descriptions, cost data, and lessons learned by design teams, constructors, and owners An overview of local, regional, and international rating systems Guide to Green Building Rating Systems demystifies complex material, making this book an essential reference for building professionals engaged in, or wishing to pursue, sustainable building practices.

**Green Guide for Artists** Karen Michel 2009-06-01 The Green Guide for Artists inspires artists to make better eco-conscious choices within their work and their studios and shows them how. The book has four sections: The first contains recipes for DIY art supplies such as ones for mixing your own non-toxic paints and adhesives and making your own papers from recycled paper. The second offers safe and green practices for the workspace. The next section shares a fresh look at using recycled materials through creative step-by-step projects and a gallery section. The final section contains a resource guide for eco-friendly materials and supplies, including websites and forum links.

**A Green Guide to Natural Beauty** Karen Gilbert 2011 Most of us use a huge variety of beauty products on our skin and hair every day - from shower gel and shampoo to moisturiser and hand cream - but the majority of these products contain a variety of chemicals. In A Green Guide to Natural Beauty, natural skincare and fragrance expert Karen Gilbert shows you how to make your own lotions and potions at home, using easy-to-obtain, natural ingredients and easy-to-follow methods. For the face, there are moisturizers, face masks and cleansers; for the body choose from scrubs and shower gels, soaps and body lotions. And when you need some extra-special pampering, try the recipes for lip balms, massage bars, bath oils and eye gels. So try your hand at making a neroli hydrating spritz or a jojoba and aloe vera moisturizer, mango and lime body butter or lemon and tea tree foot balm, bergamot and grapefruit

wake-up wash or cocoa butter lip balm - the hardest part is choosing which of the pampering projects to try first! Each recipe has clear step-by-step photographs to guide you, and there are numerous variations to try. - Make your own beauty gifts for friends, or hold your own pampering parties. - Just as we are all now more aware of what we eat and how we grow our food, attention is now turning to skincare products - people are looking for a low-cost, natural alternative to highly priced, highly perfumed, highly packaged shop-bought items. - In CICO's 'Green Guide' series.

Green Healthcare Institutions Institute of Medicine 2007-06-14 Green Healthcare Institutions : Health, Environment, and Economics, Workshop Summary is based on the ninth workshop in a series of workshops sponsored by the Roundtable on Environmental Health Sciences, Research, and Medicine since the roundtable began meeting in 1998. When choosing workshops and activities, the roundtable looks for areas of mutual concern and also areas that need further research to develop a strong environmental science background. This workshop focused on the environmental and health impacts related to the design, construction, and operations of healthcare facilities, which are part of one of the largest service industries in the United States. Healthcare institutions are major employers with a considerable role in the community, and it is important to analyze this significant industry. The environment of healthcare facilities is unique; it has multiple stakeholders on both sides, as the givers and the receivers of care. In order to provide optimal care, more research is needed to determine the impacts of the built environment on human health. The scientific evidence for embarking on a green building agenda is not complete, and at present, scientists have limited information. Green Healthcare Institutions : Health, Environment, and Economics, Workshop Summary captures the discussions and presentations by the speakers and participants; they identified the areas in which additional research is needed, the processes by which change can occur, and the gaps in knowledge.

**The Negro Motorist Green Book** Victor H. Green The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

**Standards for Internal Control in the Federal Government** United States Government Accountability Office 2019-03-24 Policymakers and program managers are continually seeking ways to improve accountability in achieving an entity's mission. A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.

*Opening the Road* Keila V. Dawson 2021-01-26 "Hungry? Check the Green Book. Tired? Check the Green Book. Sick? Check the Green Book." In the late 1930s when segregation was legal and Black Americans couldn't visit every establishment or travel everywhere they wanted to safely, a New Yorker named Victor Hugo Green decided to do something about it. Green wrote and published a guide that listed places where his fellow Black Americans could be safe in New York City. The guide sold like hot cakes! Soon customers started asking Green to make a guide to help them travel and vacation safely across the nation too. With the help of his mail carrier co-workers and the African American business community, Green's guide allowed millions of African Americans to travel safely and enjoy traveling across the nation. In the first picture book

about the creation and distribution of The Green Book, author Keila Dawson and illustrator Alleanna Harris tell the story of the man behind it and how this travel guide opened the road for a safer, more equitable America.

**Green Building Handbook: Volume 1** Tom Woolley 2002-09-11 Environmentally responsible building involves resolving many conflicting issues and requirements. Each stage in the design process from the fundamental decisions about what, where and even whether to build has implications for the environment. Evolving out of the success of Green Building Digest, a publication described by Building Design as well-researched, authoritative and exhaustive, this practical new handbook considers the environmental issues which relate to the production, use and disposal of key building products and materials. It is designed to

help specifiers and purchasers gain awareness of the potential environmental impact of their decisions. Chapter by chapter Green Building Handbook looks at a different sector of the trade from flooring to roofing, comparing the environmental effects of commonly available products with less well known green alternatives. A Best Buy section then ranks these products from lowest to highest impact.
