

# Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union

*Bulgaria In Transition* John D. Bell 2019-05-20  
Since the forced resignation of Todor Zhivkov in November of 1989, Bulgaria's transition to democracy has been marked by good beginnings ending in frustration or disappointment. It has avoided the violent ethnic confrontations that have characterized much of the "post-Communist" Balkans, but has also seen the development of an influential criminal

[The Geography of Survival](#) Boris Komarov 1994  
In 1989 a Soviet environmental expert writer under the pseudonym Boris Komarov startled the world. His book "The Destruction of Nature in the Soviet Union", was both a chilling description of the environmental devastation in the Soviet Union and an indictment of the official

policy and public apathy that allows it to be perpetuated. Today Boris Komarov writes freely under his own name - Ze'ev Wolfson. But the ecological crisis he documents has only become more severe, more widespread, more deadly. In "The Geography of Survival" Wolfson speaks out in unmistakable terms about the world's choice to embrace the cause of our collective survival or to let desertisation, pollution, disaster, famine, epidemic, and war work their own solution.

**Resources in Education** 1991-05

**Environmental Action in Eastern Europe**

Barbara Jancar-Webster 2016-09-16 The environmental crisis in Eastern Europe - air and water pollution, toxic waste dumps, and unsafe nuclear facilities - has been vividly documented

## **Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union**

since the revolution of 1989. Not only did the communist states have an abysmal record of environmental destruction, but the issue of environmental protection and safety proved to be one of the most powerful catalysts of unified opposition to these regimes. This collection of essays by both Western and East European experts examines the efforts to develop strategies for dealing with the crisis, both by governments and at the grassroots level of newly emerging Green movements. Among the countries represented here are Poland, Hungary, Czechoslovakia, Lithuania, Slovenia and the Commonwealth of Independent States.

### **Economic Aspects of German Unification**

Paul J.J. Welfens 2012-12-06 Paul J. J. Welfens  
The editor is pleased to present a second edition of Economic Aspects of German Unification which includes new chapters and several postscripts. Almost five years after unification output in the ex-GDR is back to its 1989 level. Due to a massive intra-German resource transfer

consumption per capita in eastern Germany has not fallen as much as output and employment which reduced by one-fifth within three years. Given high West German transfers which represented about 5% of West German GDP and more than 50% of East German GDP the fall of industrial output could have been much stronger than had politically been feasible. Hence structural change necessary for productivity growth was dramatic in the ex-GDR where the goods producing sector (manufacturing, mining, energy and construction) strongly changed its proportions; within four years construction almost doubled, and the share of investment goods production reduced by 10 percentage points between 1990 and 1994 and is now down to 21.1%. Mining lost two-thirds of its share in the producing sector which itself was reduced relative to GDP. The share of the services industry increased by 5 percentage points between 1991 and 1994, but with a share of 27.7% in East Germany's GDP it was still about 9

## Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union

percentage points lower than in western Germany. By contrast, government accounted for 20.9% of GDP in eastern Germany, but for only 13.2% in western Germany.

Southeast European Security Albrecht Schnabel 2001 Contents: Southeastern Europe: the unlikely security community? Environmental security in Southeastern Europe: a basis for regional co-operation; Russian in the Transcaucasus and Kosovo: from insecurity to security provider?; Churches and (in) security providers in Southeastern Europe; Bulgaria and the disintegration of Yugoslavia: between ethnic affinity and international commitment; regional implications of a failed transition to democracy: the case of Serbia; The internationalisation of conflict in the Transcaucasus and the former Yugoslavia; The OSCE security model for the Balkans: a viable model for the 21st century?; Lessons from UN Peacekeeping in Cyprus; Srebrenica: The failure and future of safe areas; Conflict management in Southeastern Europe:

the use of force as a last resort; The Georgian-Abkhazian conflict: failed realpolitik with moralistic justifications?; Rethinking the concept of peace-building; Bosnia and the lessons for Kosovo; Kosovo and the international community; Index.

### **Fueling Reform** 1994

The European Water Environment in a Period of Transformation John Hassan 1996 Looks at the opportunities and challenges of managing the European water environment

### **Fueling reform : energy technologies for the former East Bloc.**

**Dilemmas of Transition** Susan Baker 2015-02-12 This volume explores the impact of democratization and marketization on the environment in East Central Europe. The essays investigate: how the twin processes of change affect the physical environment; the expression of environmental interest; and environmental management policies.

*Environmental Management in the Soviet Union*

## **Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union**

Philip R. Pryde 1991-07-26 In this study of Soviet environmental problems and their management, the author examines the pervasive nature of biosphere disruption and environmental contaminants in the country. He discusses the extent to which they are damaging the Soviet populace and the resource base upon which it depends.

### **Governmental Response to Environmental Challenges in Global Perspective**

Joseph G. Jabbar 1998 In our drive to improve human standards of living, we have paradoxically paid scant attention to the need for clean air and water; the impact of acid rain on agriculture, lakes and rivers; the effect of pollutants on the ozone layer; the safe disposal of hazardous wastes, and the relationship between population growth and the environment. It seems that every time governments are faced with an apparent choice between economic development and the protection of the environment, priority is always given to the former. Short-term plans -- dictated

by canons of political survival and expediency -- always seem to take precedence over long-term strategies, with politicians and decision-makers deftly relegating environmental concerns to the realm of rhetoric. This book is an effort to better understand the problems faced by our global ecosystems. It is also the result of the authors deep commitment to urge both citizens and their leaders the world over to work together for a better protection of the environment so that our planet may be saved for the present and for future generations.

*Environmental Politics in Poland* Barbara E. Hicks 1996 -- Michael Bernhard, Pennsylvania State University

**Green Revolutions** Hilary F. French 1990 The focus of this paper is environmental issues facing Eastern Europe and the Soviet Union as they struggle with the momentous tasks of economic and political reform. Given the important role that environmental protest played in the upheavals, environmentalists have

## **Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union**

claimed a mandate for strong environmental controls. The state of the environment and its effects on the health of the inhabitants, plants, and animals are discussed. Chapters include: (1) "Industrial Wastelands"; (2) "The Health Toll"; (3) "Declining Biological Productivity"; (4) "The Green Movement"; (5) "The Official Response"; and (6) "A Policy Agenda." (KR)

Eastern European Development and Public Policy Stuart S. Nagel 2016-07-27 This book analyzes various important aspects of methodology and substance regarding economic, social, and political policy in East Europe directed toward achieving more effective, efficient, and equitable societal institutions. The chapters are authored by experts from within East Europe and also from East Europe research institutes elsewhere. The book combines practical policy significance with insightful causal and prescriptive generalizations. The emphasis is on the role of government decision-making and the important (but

secondary) role of the marketplace, social groups, and engineering.

*Future as Fairness* Anne K. Haugestad 2004 Twenty years after the establishment of the World Commission on Environment and Development, the 13 contributions in this interdisciplinary volume offer a broad spectrum of perspectives and research-based recommendations on environmental sustainability, social justice and the human enterprise. The cases explored cover global citizenly rights and obligations, environmental health, ecological building practices, tradable fuel permits, forestry and illegal logging, local waste management, employment and risk assessments, the genetic modification debate, nuclear and toxic waste, global environmental governance and 500 years of globalization.

Central and Eastern Europe 1991

*Environmental Issues in the Curricula of International Business* Héctor R. Lozada 1993 If today's business schools are to fulfill their

## **Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union**

obligation to produce the managers of the future, academic training has to include environmental awareness. This book provides a better understanding of the dramatic implications that environmental concerns are having on the practice of business and on the teaching of business practices. It creates and enhances environmental awareness, fostering creative thinking in a manner consistent with the objectives of business schools. Environmental Issues in the Curricula of International Business discusses the necessity and criticality of environmental awareness to business practices in the 1990s and beyond, drawing a link between this information and its application to business curricula. Chapters discuss the many implications of the Green movement and increased environmental concerns on international business and how this affects the obligations of business educators. Additional chapters focus on environmental ethics and responsibilities. Some specific topics covered

include: the effects of the green challenge to business schools in the light of the environmental needs of business organizations the impact of an ecological approach to the development of a sustainable economy a description of six potential avenues for academic business involvement in environmental business teaching, research, and service curriculum development incorporating the theme of environmental ethics in international business education a contrasting look at two models for including environmental ethics in the international business curricula This groundbreaking book emphasizes the responsibilities of educators and researchers for the inclusion of environmental consciousness in the present curriculum in business schools. Marketing and management academics, professionals specializing in the environment and ethics, and business school deans and university presidents will find this book a vital tool for incorporating environmental concerns

## **Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union**

into their curricula.

Economics and Liability for Environmental Problems Kathleen Segerson 2018-01-12 This title was first published in 2002. This convenient reference brings together notable contributions examining all aspects of the liability for environmental accidents. Articles included in the Part I of this volume examine the role of liability as a policy instrument, and provide detailed examinations of the incentive effects created by the imposition of liability, ie. Bankruptcy, litigation costs, delegation of responsibility and insurance. Those in Part II study specific environmental issues such as hazardous waste disposal and oil spills. The International Library of Environmental Economics and Policy explores the influence of economics on the development of environmental and natural resource policy. In a series of twenty five volumes, the most significant journal essays in key areas of the contemporary environmental and resource policy are collected. This convenient reference

brings together the notable contributions

examining all aspects of the liability for environmental accidents.

Donor Coordination of Economic Assistance to Eastern Europe Gerrit Stratmann 2000 A major restriction to Western aid efforts has been a lack of coordination. This book delves into the determinants of successful cooperation between bi- and multilateral donor agencies at the example of Western aid to Eastern Europe in the period from 1990 to 1996. In raising the assumption that networking between international organizations cannot be stimulated by appealing to norm-oriented behavior but is contingent upon the existence of common interests, the idealist view of international relations is seriously challenged. Comparing different assistance sectors - energy, telecoms, mass privatization, agriculture, statistics, central banking, environment and education - it is shown that donor coordination is a form of collective action initiated by donors in response

## **Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union**

to sectoral market failure which is perceived as significant because it threatens the non-attainment of basic goals or inflicts own projects with high costs or risks.

**Shock Waves** John Feffer 1992 Feffer provides an incisive historical background to the current political and economic conflicts that are dramatically reshaping daily life in Eastern Europe and offers critical and guardedly hopeful speculation about the future of the region. Feffer draws upon hundreds of interviews he has conducted with the region's policymakers, trade unionists, grassroots activists, and scholars.

Protest, Power, and Change Roger Powers S 2012-11-12 From Solidarity's passive/aggressive faceoff with communism to the courageous sit-ins and marches of the Civil Rights Movement, here is the first systematic survey of peaceful confrontations between the forces for the status quo and the forces for change. All the important events, tactics, and leaders are covered: Women's suffrage, blockades, IRA hunger

strikes, monkey wrenching, Charter 77, the Clamshell Alliance, Rosa Parks, Leo Tolstoy, Martin Luther King, Lech Walesa, and many more.

**Indoor and Outdoor Air Pollution and Human Cancer** Lorenzo Tomatis 2012-12-06 The European School of Oncology came into existence to respond to a need for information, education and training in the field of the diagnosis and treatment of cancer. There are two main reasons why such an initiative was considered necessary. Firstly, the teaching of oncology requires a rigorously multidisciplinary approach which is difficult for the Universities to put into practice since their system is mainly disciplinary orientated. Secondly, the rate of technological development that impinges on the diagnosis and treatment of cancer has been so rapid that it is not an easy task for medical faculties to adapt their curricula flexibly. With its residential courses for organ pathologies and the seminars on new techniques (laser,

## Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union

monoclonal antibodies, imaging techniques etc.) or on the principal therapeutic controversies (conservative or mutilating surgery, primary or adjuvant chemotherapy, radiotherapy alone or integrated), it is the ambition of the European School of Oncology to fill a cultural and scientific gap and, thereby, create a bridge between the University and Industry and between these two and daily medical practice. One of the more recent initiatives of ESO has been the institution of permanent study groups, also called task forces, where a limited number of leading experts are invited to meet once a year with the aim of defining the state of the art and possibly reaching a consensus on future developments in specific fields of oncology.

*Europe* Kevin Hillstrom 2003-08-13 A concise yet thorough overview of the environmental issues, problems, and controversies facing the world's most densely populated continent—Europe. Europe, one of six titles in The World's Environments series, tackles the

tough issues, the complex problems, and the political controversies surrounding the continent's environmental past, its complicated present, and its uncertain future. Europe looks at the catastrophes—in January 2000, a massive spill of cyanide and heavy metals from a gold mining operation in Romania destroyed all biological life in the Tisza, Hungary's second biggest river. The poisons traveled 1,000 kilometers through Hungary and Yugoslavia, where they wreaked havoc on the Danube. It also examines the progress—European society has shown a greater interest in renewable energy technologies than most other industrialized regions in the last 30 years. Serving as both a blueprint for the future, as well as a roadmap of the past, this book offers a gripping look at Europe's ecological history. Recasting the European Order James Sperling 1997 The dramatic events since the late 1980s, which witnessed the end of the Cold War, the dissolution of the Warsaw Pact, the

## Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union

fragmentation of the Soviet Union and the emergence of a united Germany, have set in motion a recasting of the European security order.

### **Multilevel Governance of Global**

### **Environmental Change** Gerd Winter

2006-03-30 Originally published in 2006, this collection is the outcome of an interdisciplinary research project involving scholars in the fields of international and comparative environmental law, the sociology and politics of global governance, and the scientific study of global climate change. Earth system analysis as developed by the natural sciences is transferred to the analysis of institutions of global environmental change. Rather than one overarching supranational organisation, a system of 'multilevel' institutions is advocated. The book examines the proper role of industrial self-regulation, of horizontal transfer of national policies, of regional integration, and of improved coordination between international

environmental organisations, as well as basic principles for sustainable use of resources.

Addressing both academics and politicians, this book will stimulate the debate about the means of improving global governance.

### *Economies of Recycling* Catherine Alexander

2012-08-09 For some, recycling is a big business; for others a moralised way of engaging with the world. But, for many, this is a dangerous way of earning a living. With scrap now being the largest export category from the US to China, the sheer scale of this global trade has not yet been clearly identified or analysed. Combining fine-grained ethnographic analysis with overviews of international material flows, *Economies of Recycling* radically changes the way we understand global and local economies as well as the new social relations and identities created by recycling processes. Following global material chains, this groundbreaking book reveals astonishing connections between persons, households, cities and global regions as

## **Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union**

objects are reworked, taken to pieces and traded. With case studies from Africa, Latin America, South Asia, China, the former Soviet Union, North America and Europe, this timely collection debunks common linear understandings of production, exchange and consumption and argues for a complete re-evaluation of North-South economic relationships.

International Environmental Disputes Aaron Schwabach 2005-12-13 This book offers an intensive investigation of past and present achievements and failures in international environmental law. International Environmental Disputes is a thought-provoking examination of the world's most pressing environmental problems and the attempts to remedy them through international law. From the dumping of ash in the Danube and the disposal of waste in western Africa to the effects of the Everglades sugar industry, the work explores such topics as the role of the United Nations, the debate over

sustainable development, environmental ethics, biopiracy, and radioactive material in space satellites. The book covers issues such as treaties on the ozone layer, global climate change, and the Kyoto protocol. A chapter devoted to the United States discusses the international environmental impact of its economy. Biographical sketches introduce readers to a diverse cast of characters including a New Guinea tribal elder and a Japanese TV personality.

**The SAGE Handbook of Political Geography** Kevin R Cox 2007-12-18 "A thorough and absorbing tour of the sub-discipline... An essential acquisition for any scholar or teacher interested in geographical perspectives on political process." - Sallie Marston, University of Arizona "This unique book is a true encyclopedia of political geography." - Vladimir Kolossov, Institute of Geography of the Russian Academy of Sciences and Vice President of the IGU The SAGE Handbook of Political Geography provides

## Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union

a highly contextualised and systematic overview of the latest thinking and research in the field. Edited by key scholars, with international contributions from acknowledged authorities on the relevant research, the Handbook is divided into six sections: Scope and Development of Political Geography: the geography of knowledge, conceptualisations of power and scale. Geographies of the State: state theory, territory and central local relations, legal geographies, borders. Participation and representation: citizenship, electoral geography, media public space and social movements. Political Geographies of Difference: class, nationalism, gender, sexuality and culture. Geography Policy and Governance: regulation, welfare, urban space, and planning. Global Political Geographies: imperialism, post-colonialism, globalization, environmental politics, IR, war and migration. The SAGE Handbook of Political Geography is essential reading for upper level students and scholars

with an interest in politics and space.

*Environmental Cooperation In Europe* Otmar Holl 2019-04-11 This book aims to take stock of the state of environmental degradation in Europe from theoretical and empirical point of views. It focuses on international organizations and institutions in Europe that deal with ecological problems and integrates case studies on regional environmental cooperation.

*Environmental Management in a Transition to Market Economy* Carlo Carraro 1994 The proceedings of an International Conference held in Geneva, Switzerland, January 1993, providing a comprehensive overview of environmental issues in Central European countries, and a look at possible problem-solving approaches with comparative studies based on some current Western practices. The volume is organized in three parts: environmental management--principles and experiences; challenges to Central European countries (Poland/Czechy and Slovakia//Hungary/Romania/ex-USSR/ex-East

## Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union

Germany); and systems analysis and techno-economic modeling. No index. Note: the \$120 price is estimated; the publisher's price is 590 francs. Annotation copyright by Book News, Inc., Portland, OR

### **Civil Society in Southeast Europe** 2021-11-08

Since the fall of communism in 1989 Southeast Europe has been a site of far-reaching societal transformation, much of it marked by political crisis, economic upheaval, ethnic tension, and bitter war. The book comprises articles investigating the history and development of civil society in post-communist Southeast Europe. How is civil society to be grasped, what are the historical factors shaping the civil societies of the region?, what is the function of civil society in the transition to democracy and a market-economy?, and what are the prospects for the future development of the civil societies of the region in an age of globalization?, -these are just a few of the major questions addressed in this collection of articles. Many of the authors

are social scientists, philosophers, and activists from the region, offering first-hand critical analysis of the state of civil society in Southeast Europe and suggesting theoretical and practical strategies for the future course of its development. The aim is to provide the reader with insight into the complex challenges that face the civil societies of the region.

*The Geography of Survival* Ze'ev Wolfson  
2015-06-03 In 1989 a Soviet environmental expert writer under the pseudonym Boris Komarov startled the world. His book "The Destruction of Nature in the Soviet Union", was both a chilling description of the environmental devastation in the Soviet Union and an indictment of the official policy and public apathy that allows it to be perpetuated. Today Boris Komarov writes freely under his own name - Ze'ev Wolfson. But the ecological crisis he documents has only become more severe, more widespread, more deadly. In "The Geography of Survival" Wolfson speaks out in unmistakable

## **Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union**

terms about the world's choice to embrace the cause of our collective survival or to let desertisation, pollution, disaster, famine, epidemic, and war work their own solution.

### **Environmental Problems in Eastern Europe**

Francis W. Carter 1996 Providing a comprehensive, descriptive analysis of a wide range of Central and East European countries, this updated paperback edition offers an invaluable study of pollution problems and effects on the quality of life. Revisions include: \* new chapter on Slovakia, demonstrating the implementation of a number of practical measures which have made a considerable impact on environmental problems that arose under communism and have been tackled during the transition. \* new concluding chapter which provides an important overview of recent developments in Eastern Europe and discusses topical issues such as health hazards and methods of charging polluters for environmental damage.

### **Building Sustainable Societies: A Blueprint**

for a Post-industrial World Dennis Clark

Pirages 2016-09-16 A collection of articles addressing the issue of whether the industrial model of human progress can be sustained in the long term. It asks what the social, political, economic and environmental implications as well as potential solutions to the problem of resource-intensive growth are.

*Troubled Lands* D. J. Peterson 2019-03-15 The dramatic revelations of environmental catastrophe in the Soviet Union made during the late 1980s and early 1990s were a driving force behind reform in, and later the demise of the communist party-state. But while the Union no longer exists, the independent republics confront the same dilemmas that plagued the Soviet state: Will the goal of econ

### Environmental Security Kent Hughes Butts 1993

*EU Enlargement and the Environment* JoAnn

Carmin 2023-05-31 This volume focuses attention on key environmental and institutional

## **Green Revolutions Environmental Reconstruction In Eastern Europe And The Soviet Union**

changes associated with eastern expansion of the European Union, assessing and challenging prevailing views about the outcomes and processes of this historic development. Looking at four central themes -- capacity changes and limitations, the EU's mixed messages and conflicting priorities, non-state actor roles and developments, and the exchange of ideas and information - the volume shows that enlargement will change the EU, not just make it bigger, and that EU officials and programs are improving aspects of environmental policy in CEE countries even as they are making others less sustainable. This book was previously published as a special issue of the journal *Environmental Politics*.

### **The Environment in Eastern Europe**

International Union for Conservation of Nature and Natural Resources 1991

*International Law and the Resolution of Central and East European* P. Williams 2000-07-18 This book takes an interdisciplinary approach to the

question of what role international law plays in promoting a resolution of Central and East European transboundary environmental disputes. The author examines a wide variety of environmental disputes in Central and Eastern Europe, with particular emphasis on the Gabčíkovo-Nagymaros Project dispute between Slovakia and Hungary, and melds international legal theory and international relations theory to develop an analytic framework for understanding the role of law and assessing its future application.
