Shades of Green Alan Frizzell 1997 Is there a real community of interest on the state of the environment that transcends national boundaries? An answer to this vital question will ultimately determine the success or failure of initiatives where international co-operation and co-ordination are essential, such as atmospheric or water pollution controls. *Shades of Green*, volume two of the ISSP (International Social Survey Programme) series, analyzes data from identical surveys conducted in 22 countries and tackles a wide range of attitudes and priorities. Expectations of government in terms of environmental protection, a comparison of Canada-U.S. results, the level of knowledge on environmental issues from country to country, the perceived role for science in solving ecological problems, and attitudinal differences between the West and states of the former Soviet Union - these issues have serious implications for the environmental movement and government policies worldwide.

Canadian Natural Resource and Environmental Policy Melody Hessing 1997 This book examines policy-making in one of the most significant areas of activity in the Canadian economy -- natural resources and the environment. It discusses the evolution of resource policies from the early era of exploitation to the present era of resource and environmental management. Using an integrated political economy and policy perspective, the book provides an analytic framework from which the foundation of ideological perspectives, administrative structures, and substantive issues are explored. The integration of social science perspectives and the combination of theoretical and empirical work make this innovative book one of the most comprehensive analyses of Canadian natural resource and environmental policy to date.

Comparative Competition Policy G. Bruce Doern 1996 This book provides definitive (and in some cases unique) studies of the six 'model' regimes of the USA, Germany, Japan, the United Kingdom, and the European Union. Each chapter is written by eminent country specialists, is based on original research, and is up to date. The comparative dimension is presented in explicit introductory and concluding chapters but the comparison is also set in the context of the globalization of economic activity and the internationalization of policy.

(Ab)using Power Dorothy E. Chunn 2001 This book about crime, law, power, and social issues in Canada includes contributions from academics, legal practitioners, journalists, and social activists who have been studying and struggling for years against the abuse of power in myriad realms of Canadian life and represents the first systematic effort in Canada to integrate a variety of topics related to power into a single collection aimed at identifying and exploring common themes, issues, problems, and remedies.

The United States and Canada Paul J. Quirk 2019-07-11 The United States and Canada share the longest border in the world, maintain one of the closest alliances, and are notably similar in many ways. Yet the two countries also have important differences, including sharply contrasting political institutions. In *The United States and Canada*, Paul J. Quirk has gathered a distinguished cast of contributors to present an integrated comparative examination of the political systems of the United States and Canada—with special attention to the effects of political institutions and their interaction with political values, geographic and demographic factors, and other influences. The volume explores the differences between the American presidential (or separation-of-powers) system and the Canadian parliamentary system—focusing on electoral and party systems, executive leadership and the legislative process, bureaucratic influence, and federalism. It proceeds to examine patterns of governance in a wide range of issue areas: economic policy; climate-change policy; healthcare policy; civil rights/integration and immigration; and abortion and gay rights. A sweeping comparative account, this volume serves as an authoritative guide for anyone interested in why the two countries differ and where they might be headed.

An Environmental History of Canada Laurel Sefton MacDowell 2012-07-31 Throughout history most people have associated northern North America with wilderness, abundant fish and game, snow-capped mountains, and endless forest and prairie. Canada's contemporary

picture gallery, however, contains more disturbing images ♦ deforested mountains, empty fisheries, and melting ice caps. Adopting both a chronological and a thematic approach, Laurel MacDowell examines human interactions with the land, and the origins of our current environmental crisis, from First Peoples to the Kyoto Protocol. This richly illustrated exploration of the past from an environmental perspective will change the way Canadians and others around the world think about ♦ and look at ♦ Canada.

Border Crossings G. Bruce Doern 1996 *Border Crossings* examines how specific Canadian public policy fields are being increasingly affected by globalization and internationalization factors and processes. The book also examines how these factors and processes have varied across policy fields and why these variations have occurred.

Environmental Management on North America's Borders Richard Kiy 1998 Comprises 10 contributions that provide an introduction to the range of environmental issues on both borders and an understanding of the dynamics currently transforming North America. Specific topics include the British Columbia- Washington Environmental Cooperation Council, managing air quality in the Paso del Norte region, crossborder environmental management and the informal sector, and low-level hazardous waste sites in Del Rio, Dryden, and Spofford, Texas. Intended for students of environmental management and North American border studies. Annotation copyrighted by Book News, Inc., Portland, OR

The First Green Wave Ryan O'Connor 2015-10-15 *The First Green Wave* traces the rise of Ontario's environmental movement. At the heart of the story is Pollution Probe, an organization founded in 1969 by students and faculty at the University of Toronto. In its first year of operation, Pollution Probe confronted Toronto's City Hall over its use of pesticides, Ontario Hydro over air pollution, and the detergent industry over pollution of the Great Lakes. The success of these actions inspired the founding of other environmental organizations across Canada and led to the development of initiatives now taken for granted, such as waste reduction and energy policy.

At the Edge Ann Dale 2013-12-01 *At the Edge* is a rich and evocative call to action at a time when new ideas are urgently needed. Mandatory reading for policy analysts and decision makers in the public, private, and volunteer sectors, it will be equally useful to scholars, teachers, students, and others interested in creating sustainable societies. Throughout the world, biophysical evidence is mounting that human growth and activity patterns are slowly destroying the earth. This ecological deterioration is accompanied by similar social and economic decline, with potentially grave consequences for the continued existence of human societies.

Passing the Buck Kathryn Harrison 1996 A study of the impact of federalism on Canadian environmental policy, tracing the evolution of the role of the federal government in environmental policy and in federal-provincial relations concerning the environment from the late 1960s to the early 1990s. Reveals that lack of public attention to the environment and strong opposition from potentially regulated interests has resulted in the federal government leaving environmental protection to the provinces. For those in environmental studies, planning, and political science. Annotation copyrighted by Book News, Inc., Portland, OR
Canadian Natural Resource and Environmental Policy, 2nd ed. Melody Hessing 2011-11-01 This book provides an analytic framework from which the foundation of ideological perspectives, administrative structures, and substantive issues are explored. Departing from traditional approaches that emphasize a single discipline or perspective,

it offers an interdisciplinary framework with which to think through ecological, political, economic, and social issues. It also provides a multi-stage analysis of policy making from agenda setting through the evaluation process. The integration of social science perspectives and the combination of theoretical and empirical work make this innovative book one of the most comprehensive analyses of Canadian natural resource and environmental policy to date.

Capacity Building in National Environmental Policy Helmut Weidner 2013-03-09 This book is the second collection of systematic case studies describing national environmental policies in 17 countries in terms of capacity building (see Appen dix). The OECD defines environmental capacity building as "a society's ability to identify and solve environmental problems." While various institutions, including UNEP, FAO, World Bank and OECD, have hitherto used the terms environmental capacity and capacity building almost exclusively with reference to developing countries, we have extended the concepts to industrialized countries, as well. The first collection, edited by Martin Janicke, Helge Joergens (both Free University Berlin) and Helmut Weidner (Social Science Research Center Berlin), was published in 1997 under the title "National Environmental Policies - A Comparative Study of Capacity-Building" (Berlin, etc. : Springer Verlag). It included 13 studies of countries. As in the first volume, chapter I presents the conceptual framework underlying the national case studies. It is a slightly shorter version of the corresponding chapter in volume I. The design of all case studies in the two volumes is largely congruent with this conceptual framework. Although the various sections of the studies do not always have identical titles and subtitles, the central elements of the capacity-building approach have been applied in all cases.

Blue-green Province Mark Winfield 2012 In Blue-Green Province, Mark Winfield takes a long overdue look at the crucial relationship between Ontario's environmental policy and its politics and economy. Covering the period from the Progressive Conservative "dynasty" that dominated Ontario politics from the mid-1940s to the mid-1980s, through the subsequent Peterson, Rae, Harris, Eves, and McGuinty governments, Winfield offers a trenchant analysis of the effects on Ontario's environment and politics of these administrations' dramatically different ideologies. Timely and original, Blue-Green Province is the first comprehensive study of environmental policy in Ontario. It will be welcomed by anyone with an interest in Ontario's environmental and economic future.

Misplaced Distrust Éric Montpetit 2011-11-01 Citizens of industrialized countries largely share a sense that national and international governance is inadequate, believing not only that public authorities are incapable of making the right policy decisions, but also that the entire network of state and civil society actors responsible for the discussion, negotiation, and implementation of policy choices is untrustworthy. Using agro-environmental policy development in France, the United States, and Canada as case studies, ric Montpetit sets out to investigate the validity of this distrust through careful attention to the performance of the relevant policy networks. He concludes that distrust in policy networks is, for the most part, misplaced because high levels of performance by policy networks are more common than many political analysts and citizens expect.

Environmental Blockades Iain McIntyre 2021-06-10 Since the 1970s, environmental blockades disrupting the exploitation and destruction of forests, rivers, and other biodiverse places have been one of the most attention-grabbing and contentious forms of political action. This book explores when, where, and why environmental blockading and its associated tactics first arose. The author explores a broad range of questions, including how did tactics and practices first developed and popularised during environmental blockades come to feature regularly in animal rights, peace, refugee, and other campaigns? What are blockaders hoping to achieve? How have such blockades and tactics shaped government policy, the culture of modern politics, and popular understandings of ecology, colonialism, and activism? This book offers the first comprehensive history and analysis of environmental blockading in three key countries: Australia, the United States, and Canada. As the first places to experience sustained protest cycles which fully established, promoted, and developed the environmental blockading repertoire as an ongoing strategic option for movements nationally and internationally, these campaigns were central in creating a new approach to conservation issues. They also played a leading role in making obstructive direct action a regular part of political campaigning, as seen in the form of the Extinction Rebellion (XR), alter-globalisation, climate justice, and other movements. This book draws on rigorous

archival research including sources ranging from personal diaries, campaign minutes, and video footage through to police reports and newspaper articles, as well as interviews with more than 30 protest leaders and campaigners. It will be of great interest to students and scholars in the fields of sociology, political science, history, green criminology, and interdisciplinary environmental studies.

Politics, Policy, and Government in British Columbia R. Kenneth Carty 1996-09-23 Politics, Policy, and Government in British Columbia examines the political life of Canada's dynamic Pacific province. Each of the seventeen chapters, written by well-known experts, provides an up-to-date portrait and analysis of one of the many faces of B.C. politics. Taken together they provide a clear and comprehensive overview of the dominant themes and issues that have been the distinguishing features of the province's political life.

The Greening of Canada G. Bruce Doern 1994-12-15 Environmental matters have become increasingly important in Canadian and world policy agendas. In this study, G. Bruce Doern and Thomas Conway trace the development of Canadian environment policy, giving an in-depth account of twenty years of environmental politics, politicians, institutions, and decisions as seen through the evolution of Ottawa's policy agency, Environment Canada. The Greening of Canada is an extensively researched look at the entire period from the early 1970s to the present and is the most complete and integrated analysis yet of federal environmental institutions and key decisions. From Great Lakes pollution to the Green Plan, from the Stockholm Conference to the post-Rio Earth Summit era, the authors deal with both domestic and international events and influences on Ottawa's often abortive efforts to entrench a green agenda into national politics. The book explores the crucial relationships of institutional and political power, directing attention at the DOE and its parade of ministers, intra-cabinet battles, federal-provincial relations, business relations and public opinion, and international and Canada-U.S. relations. It also examines important topics from acid-rain policy to the politics of establishing national parks, and from the Green Plan to the realities of environmental enforcement. Employing a framework cast as the 'double dynamic' of environmental policy making, the authors show the growing struggle between the management of power among key institutions and the need to accommodate a biophysical realm characterized by increased uncertainty as well as scientific and technological controversy.

Canadian Environmental Policy Robert Boardman 2002 Now in its second edition, this book focuses on the character and significance of the politics and processes that underlie policy-making on the environment. It has been redesigned to reflect major trends and changes in environmental policy during the 1990s, such as the effects of budgetary restraints on environmental policy and the growing importance of the provinces as environmental policy actors.

In the Chamber of Risks William Leiss 2001 In In the Chamber of Risks William Leiss demonstrates that case studies of risk controversies show that those instincts are unreliable guides to effective risk management and that in all cases the opposite position is a far better

guide. As risk management is inherently disputable, public perceptions of risk should be seen as legitimate and treated as such and the public should always be involved in discussions about risk evaluations made by scientists and risk managers. ; Leiss chronicles the erratic course of risk management and communication in environmental management in Canada, discussing the notable controversies that have arisen over pesticides and breast cancer, vinyl toys, genetically engineered food crops, cellular telephones, and antibiotic-resistant bacteria, among many others. He focuses on risk management - how we make decisions about and assess hazards in the environment - and on risk communication - social dialogue that deals with both our intuitive feelings of concern about substances or activities that might hurt our health or the environment, and the scientific and probabilistic description of them. ; Leiss shows that both risk management and risk communication, when properly constructed, require an elaborate process because the very things that can cause harm are in most cases the same things that bring us great benefits, such as paper mills, electricity from nuclear power generating stations, or wireless telecommunications. ;

Canadian Natural Resource and Environmental Policy, 2nd edition 2005 "This expanded and updated edition of Canadian Natural Resource and Environmental Policy examines policy making in one of the most significant areas of activity in the Canadian economy - natural resources and the environment. It discusses the evolution of resource policies from the early era of exploitation to the present era of resource and environmental management, including the Kyoto Protocol. Using an integrated political economy and policy perspective, the book provides an analytic framework through which ideological perspectives, administrative structures, and substantive issues are explored." --Résumé de l'éditeur.

Environmental Democracy Michael Mason 2012-05-23 Through a wide range of case studies, Mason reveals just how sensitive we all must be to styles of power, vulnerability and resilience in any democratic transition to sustainability. This is a fine book.' Timothy O'Riordan, Professor of Environmental Science, University of East Anglia, and Associate Director, Centre for Social and Economic Research on the Global Environment. Civic self-determination and ecological sustainability are widely accepted as two of the most important public goals. This book explains how they can be combined. Using vivid and telling case studies from around the world, it shows how liberal rights can include both ecological and social conditions for collective decision-making - environmentalist goals and social justice can be achieved together. Integrating theory and original case studies, the book makes a very significant contribution to the fundamentals of how environmental democracy can be advanced at all levels. Cogently argued and engaged, *Environmental Democracy* provides a superb teaching text and a source of ideas and persuasive arguments for the politically and environmentally engaged. It will be essential reading for students, teachers and researchers in politics, policy studies, environmental studies, geography and social science.

Competition and Structure Albert Breton 2000-06-05 The essays in this volume, written by well-known economists and other social scientists from North America, Europe, and, in one case, Australia, share to an unusual degree a common concern with the competitive mechanisms that underlie collective decisions and with the way they are embedded in institutional settings. This gives the book a unitary inspiration whose value is clear from the new understanding and insights its chapters provide on important theoretical and practical issues such as the social dimension and impact of trust, the management of information in bureaucratic settings, the role of political parties in constitutional evolution, inter-level rivalry and reassignments of powers in federal and unitary systems of government, the impact of ethnicity and nationalism on federal institutions or arrangements, and the response of governments and overarching institutions of globalization
