### **An Anthropologist on Mars** Oliver Sacks

2012-11-14 To these seven narratives of neurological disorder Dr. Sacks brings the same humanity, poetic observation, and infectious sense of wonder that are apparent in his bestsellers *Awakenings* and *The Man Who Mistook His Wife for a Hat*. These men, women, and one extraordinary child emerge as brilliantly adaptive personalities, whose conditions have not so much debilitated them as ushered them into another reality.

### Policies to Address Poverty in America Melissa

Kearney 2014-06-19 One-in-seven adults and one-in-five children in the United States live in poverty. Individuals and families living in poverty not only lack basic, material necessities, but they are also disproportionately afflicted by many social and economic challenges. Some of these challenges include the increased possibility of an unstable home situation, inadequate education opportunities at all levels, and a high chance of crime and victimization. Given this growing social, economic, and political concern, The Hamilton Project at Brookings asked academic experts to develop policy proposals confronting the various challenges of America's poorest citizens, and to introduce innovative approaches to addressing poverty. When combined, the scope and impact of these proposals has the potential to vastly improve the lives of the poor. The resulting 14 policy memos are included in *The Hamilton Project's Policies to Address Poverty in America*. The main areas of focus include promoting early childhood development, supporting disadvantaged youth, building worker skills, and improving safety net and work support.

### *A Source Book of Australian History* Gwendolen

Swinburne 2022-06-13 "A Source Book of Australian History" is a concise full history of Australia from the discovery of Tasmania to the National Australian Convention and the establishment of the Commonwealth of Australia. The book was aimed at students interested in learning the subject. Each chapter has a short synopsis at the beginning to better comprehend the subject.

### The Lives of Stories Emma Dortins 2018-12-05

The Lives of Stories traces three stories of Aboriginal-settler friendships that intersect with the ways in which Australians remember founding national stories, build narratives for cultural revival, and work on reconciliation and self-determination. These three stories, which

are still being told with creativity and commitment by storytellers today, are the story of James Morrill's adoption by Birri-Gubba people and re-adoption 17 years later into the new colony of Queensland, the story of Bennelong and his relationship with Governor Phillip and the Sydney colonists, and the story of friendship between Wiradjuri leader Windradyne and the Suttor family. Each is an intimate story about people involved in relationships of goodwill, care, adoptive kinship and mutual learning across cultures, and the strains of maintaining or relinquishing these bonds as they took part in the larger events that signified the colonisation of Aboriginal lands by the British. Each is a story in which cross-cultural understanding and misunderstanding are deeply embedded, and in which the act of storytelling itself has always been an engagement in cross-cultural relations. The Lives of Stories reflects on the nature of story as part of our cultural inheritance, and seeks to engage the reader in becoming more conscious of our own effect as history-makers as we retell old stories with new meanings in the present, and pass them on to new generations.

**The Quartermaster Corps** William F. Ross  
1965

Journals of Expeditions of Discovery Into Central Australia, and Overland from Adelaide to King George's Sound, in the Years 1840-1 Edward John Eyre 1845 "In 1839 Eyre made two expeditions, from Adelaide to Lake Torrens, and from Port Lincoln to Streaky Bay. In June 1840 he set out on his most notable expedition, westward from Adelaide along the Great Australian Bight, with one white companion (Baxter) and three natives. Baxter was murdered by two of the natives, and Eyre and the remaining Aborigine reached Albany only after a desperate journey. Eyre includes in his relations considerable valuable material on the Aborigines and their habits". (Ferguson).

**The Fairy-faith in Celtic Countries** Walter Yeeling Evans-Wentz 1911 In this study, which is first of all a folk-lore study, we pursue principally an anthropo-psychological method of interpreting the Celtic belief in fairies, though

we do not hesitate now and then to call in the aid of philology; and we make good use of the evidence offered by mythologies, religions, metaphysics, and physical sciences.

**Predicting the Past** Michael Boyden 2009 Drawing from the social theories of Niklas Luhmann and Mary Douglas, *Predicting the Past* advocates a reflexive understanding of the paradoxical institutional dynamic of American literary history as a professional discipline and field of study. Contrary to most disciplinary accounts, Michael Boyden resists the utopian impulse to offer supposedly definitive solutions for the legitimation crises besetting American literature studies by "going beyond" its inherited racist, classist, and sexist underpinnings.

Approaching the existence of the American literary tradition as a typically modern problem generating diverse but functionally equivalent solutions, Boyden argues how its peculiarity does not, as is often supposed, reside in its restrictive exclusivity but rather in its massive inclusivity, which drives it to constantly revert to a self-negating "beyond" perspective. *Predicting the Past* covers a broad range of literary histories and reference works, from Rufus Griswold's 1847 *Prose Writers of America* to Sacvan Bercovitch's monumental *Cambridge History of American Literature*. Throughout, Boyden focuses on particular themes and topics illustrating the self-induced complexity of American literary history, such as the early "Anglocentric" roots theories of American literature; the debate on contemporary authors in the age of naturalism; the plurilingual ethnocentrism of the pioneer Americanists of the mid-twentieth century; and the genealogical misrepresentation of founding figures such as Jonathan Edwards, Emily Dickinson, and Robert Lowell.

### **Growing Gourmet and Medicinal**

**Mushrooms** Paul Stamets 2011-07-13 A detailed and comprehensive guide for growing and using gourmet and medicinal mushrooms commercially or at home. "Absolutely the best book in the world on how to grow diverse and delicious mushrooms."—David Arora, author of *Mushrooms Demystified* With precise growth parameters for thirty-one mushroom species, this bible of mushroom cultivation includes gardening tips, state-of-the-art production techniques, realistic advice for laboratory and growing room construction, tasty mushroom recipes, and an invaluable troubleshooting guide. More than 500 photographs, illustrations, and charts clearly identify each stage of cultivation, and a twenty-four-page color insert spotlights the intense beauty of various mushroom species. Whether you're an ecologist, a chef, a forager, a pharmacologist, a commercial grower, or a home gardener—this indispensable handbook will get you started, help your garden succeed, and make your mycological landscapes the envy of the neighborhood.

**Justice, Liability, And Blame** Paul H.

Robinson 2019-03-13 This book examines shared intuitive notions of justice among laypersons and compares the discovered principles to those instantiated in American criminal codes. It reports eighteen original studies on a wide range of issues that are central to criminal law formulation.

Arts of Living on a Damaged Planet Anna Lowenhaupt Tsing 2017-05-30 Living on a damaged planet challenges who we are and where we live. This timely anthology calls on twenty eminent humanists and scientists to revitalize curiosity, observation, and transdisciplinary conversation about life on earth. As human-induced environmental change threatens multispecies livability, Arts of Living on a Damaged Planet puts forward a bold proposal: entangled histories, situated narratives, and thick descriptions offer urgent "arts of living." Included are essays by scholars in anthropology, ecology, science studies, art, literature, and bioinformatics who posit critical and creative tools for collaborative survival in a more-than-human Anthropocene. The essays are organized around two key figures that also serve as the publication's two openings: Ghosts, or landscapes haunted by the violences of modernity; and Monsters, or interspecies and intraspecies sociality. Ghosts and Monsters are tentacular, windy, and arboreal arts that invite readers to encounter ants, lichen, rocks, electrons, flying foxes, salmon, chestnut trees, mud volcanoes, border zones, graves, radioactive waste—in short, the wonders and terrors of an unintended epoch. **Prehistoric Myths in Modern Political**

**Philosophy** Karl Widerquist 2016-12-05 How modern philosophers use and perpetuate myths about prehistoryThe state of nature, the origin of property, the origin of government, the primordial nature of inequality and war why do political philosophers talk so much about the Stone Age? And are they talking about a Stone Age that really happened, or is it just a convenient thought experiment to illustrate their points?Karl Widerquist and Grant S. McCall take a philosophical look at the origin of civilisation, examining political theories to show how claims about prehistory are used. Drawing on the best available evidence from archaeology and anthropology, they show that much of what we think we know about human origins comes from philosophers imagination, not scientific investigation.Key FeaturesShows how modern political theories employ ambiguous factual claims about prehistoryBrings archaeological and anthropological evidence to bear on those claimsTells the story of human origins in a way that reveals many commonly held misconceptions

A Good Life Mary Edmunds 2013-05-01 This book is a story. It's a story about ordinary people in very different parts of the world dealing with rapid change in the late twentieth and early twenty-first centuries. It's about times of turbulent and violent social upheaval and rupture with the past. It's about modern times. It's also about being human; what it is to be human in a modernising and globalising world; how, in responding to the circumstances of their times, different groups define, redefine, and attempt to put into practice their understandings of the good and of what constitutes a good life. And it's about how human rights have come to be not abstract universal principles but a practical source of consciousness and practice for real people.

**Quiet** Susan Cain 2013-01-29 #1 NEW YORK TIMES BESTSELLER • Experience the book that started the Quiet Movement and revolutionized how the world sees introverts—and how introverts see themselves—by offering validation, inclusion, and inspiration “Superbly researched, deeply insightful, and a fascinating read, *Quiet* is an indispensable resource for anyone who wants to understand the gifts of the introverted half of the population.”—Gretchen Rubin, author of *The Happiness Project* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY People • O: The Oprah Magazine • Christian Science Monitor • Inc. • Library Journal • Kirkus Reviews At least one-third of the people we know are introverts. They are the ones who prefer listening to speaking; who innovate and create but dislike self-promotion; who favor working on their own over working in teams. It is to introverts—Rosa Parks, Chopin, Dr. Seuss, Steve Wozniak—that we owe many of the great contributions to society. In *Quiet*, Susan Cain argues that we dramatically undervalue introverts and shows how much we lose in doing so. She charts the rise of the Extrovert Ideal throughout the twentieth century and explores how deeply it has come to permeate our culture. She also introduces us to successful introverts—from a witty, high-octane public speaker who recharges in solitude after his talks, to a record-breaking salesman who quietly taps into the power of questions. Passionately

argued, impeccably researched, and filled with indelible stories of real people, *Quiet* has the power to permanently change how we see introverts and, equally important, how they see themselves. Now with Extra Libris material, including a reader's guide and bonus content *A Successful Exploration Through the Interior of Australia* William John Wills 1863

*Liquid Modernity* Zygmunt Bauman 2013-07-10 In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. *Liquid Modernity* concludes the analysis undertaken in Bauman's two previous books *Globalization: The Human Consequences* and *In Search of Politics*. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

**Creating Your Own Destiny** Patrick Snow 2010-04-26 Put your own fate exactly where it belongs—in your hands It is one of the great questions of life. Its a simple question, really, but it seems impossible for many to answer: Do we control our own destinies? 90 percent of people think and act as if their destiny is foreordained, while only about 10 percent believe in the capacity to change and act on it. *Creating Your Own Destiny* explains and demonstrates to the majority how to dream, plan, and execute a better future—despite the challenges of the economy and life circumstances. Based on time-honored principles, theories, and case studies Provides a Success Road Map for all those people who are

seeking to achieve success but who aren't satisfied with their careers. Written in an easy and accessible tone by Patrick Snow, who has been dubbed "the Dean of Destiny" With the powerful and practical tools featured in this essential guide, you'll find yourself newly empowered and energized to achieve extraordinary results.

*Woman Suffrage and Politics* Carrie Chapman Catt 1923 The authors present "a thoughtful assessment of the key issues and pivotal events which alternately drove and stifled the campaign" of women's suffrage--Bookseller's description

**Violence and Social Orders** Douglass C. North 2009-02-26 This book integrates the problem of violence into a larger framework, showing how economic and political behavior are closely linked.

**How Are We to Live?** Peter Singer 2010-03-19 Many people have an uneasy feeling that they may be missing out on something basic that would give their lives a significance it currently lacks. But how should we live? What is there to stop us behaving selfishly? In this account, which makes reference to a wide variety of sources and everyday issues, Peter Singer suggests that the conventional pursuit of self-interest is individually and collectively self-defeating. Taking into consideration the beliefs of Jesus, Kant, Rousseau, and Adam Smith amongst others, he looks at a number of different cultures, including America, Japan, and the Aborigines to assess whether or not selfishness is in our genes and how we may find greater satisfaction in an ethical lifestyle.

*Dr. Eleanor's Book of Common Ants* Eleanor Spicer Rice 2017-08-03 Did you know that for every human on earth, there are about one million ants? They are among the longest-lived insects—with some ant queens passing the thirty-year mark—as well as some of the strongest. Fans of both the city and countryside alike, ants decompose dead wood, turn over soil (in some places more than earthworms), and even help plant forests by distributing seeds. But while fewer than thirty of the nearly one thousand ant species living in North America are true pests, we cringe when we see them marching across our kitchen floors. No longer! In this witty, accessible, and beautifully

illustrated guide, Eleanor Spicer Rice, Alex Wild, and Rob Dunn metamorphose creepy-crawly revulsion into myrmecological wonder.

Emerging from Dunn's ambitious citizen science project *Your Wild Life* (an initiative based at North Carolina State University), Dr. Eleanor's *Book of Common Ants* provides an eye-opening entomological overview of the natural history of species most noted by project participants—and even offers tips on keeping ant farms in your home. Exploring species from the spreading red imported fire ant to the pavement ant, and featuring Wild's stunning photography, this guide will be a tremendous resource for teachers, students, and scientists alike. But more than this, it will transform the way we perceive the environment around us by deepening our understanding of its littlest inhabitants, inspiring everyone to find their inner naturalist, get outside, and crawl across the dirt—magnifying glass in hand.

### **Celebrities, Culture and Cyberspace**

McKenzie Wark 1999 In a series of entertaining essays, this wide-ranging book looks at the impact of the media on Australian life and politics, and analyses key images and stories that shape our perceptions at century's end. Topics include Americanisation, feminism, pop, pay TV, the Internet, political correctness, Mabo, and the republican convention.

### **Italy and Her Invaders** Thomas Hodgkin 1899

**Emotions and Social Movements** Helena Flam 2007-04-11 Most research on social movements has ignored the significance of emotions. This edited volume seeks to redress this oversight and introduces new research themes and tools to the field of emotions and social movements. Sociologists and political activists around the world will find this volume to be of great interest due to its wide-ranging approach and its unique emphasis on the role of emotion in protest, dissent and social movements.
