Keyguide to Information Sources on World Religions Jean Holm 1991 The main aim of this book is to indicate the nature and range of reference material available for the study of world religions. A broad interpretation of world religions has been adopted and coverage includes the Baha'i faith, Buddhism, Christianity, Confucianism, Hinduism, Islam, Jainism, Judaism, Shinto, Sikhism, Taoism and Zoroastrianism, as well as cross-cultural studies and inter-faith dialogue. Following the basic pattern of the Keyguides series, the work is divided into three sections: an overview of the subject and available literature is followed by an annotated bibliography of over 1000 entries and an international directory of organizations.

Conservative Judaism in America Pamela S. Nadell 1988-09-16 Pamela Nadell's biographical dictionary and sourcebook is a landmark contribution to American, Jewish, and religious history. For the first time, a great American Jewish religious movement is portrayed with amplitude, authority, and personality. In the most revolutionary era in two millennia of Jewish

history, this surely is an important volume. Moses Rischin, Professor of History, San Francisco State University *Conservative Judaism in America: A Biographical Dictionary and Sourcebook* is the first extensive effort to document the lives and careers of the most important leaders in Conservatism's first century and to provide a brief history of the movement and its central institutions. It includes essays on the history of the movement and on the evolution of its major institutions: The Jewish Theological Seminary of America, The Rabbinical Assembly, and The United Synagogue of America. It also contains 135 biographical entries on the leading figures of Conservative Judaism, appendices, and a complete bibliography on sources of study.

The Textual History of the Bible from the Dead Sea Scrolls to the Biblical Manuscripts of the Vienna Papyrus Collection Ruth A. Clements 2023-03-20 Biblical manuscripts from the Dead Sea and the Cairo Genizah have added immeasurably to our knowledge of the textual

history of the Hebrew Bible. The papers collected in this volume compare the evidence of the biblical DSS with manuscripts from the Vienna Papyrus Collection, connected with the Cairo Genizah, as well as late ancient evidence from diverse contexts. The resulting picture is one of a dialectic between textual plurality and fixity: the eventual dominance of the consonantal Masoretic Text over the textual plurality of the Second Temple period, and the secondary diversification of that standardized text through scribal activity.

Re-Envisioning Past Musical Cultures Peter Jeffery 1992 Studying Gregorian chant presents many problems to the researcher because its most important stages of development were not recorded in writing. From the sixth to the tenth century, this form of music existed only in song as medieval musicians relied on their memories and voices to pass each verse from one generation to the next. Peter Jeffery offers an innovative new approach for understanding how these melodies were created, memorized, performed, and modified. Drawing on a variety of disciplines, including anthropology and ethnomusicology, he identifies characteristics of Gregorian chant that closely resemble other oral traditions in non-Western cultures and demonstrates ways music historians can take into account the social, cultural, and anthropological contexts of chant's development.
