From Snake Oil to Medicine R. Alton Lee 2007-03-30 Without Samuel J. Crumbine and his Kansas Department of Health, diseases festering in water sources, food and the common towel would have caused thousands of deaths in the United States. Crumbine and his associates paved the way to better treatment of tuberculosis. This well-written account leads the reader down a path of crucial medical advancements. Samuel J. Crumbine was a medical educator without peer, who used his department of health to disseminate the latest developments he and others throughout the world were achieving in public health. He found it necessary to propagandize a skeptical and

sometimes hostile public to accept the germ theory, the idea that invisible microbes were making them ill and that they should clean up their environment and their food and water sources. He had to convince the public to rely on modern medicine, not snake oil and other miracle cures for a healthy living. R. Alton Lee's historical account might offer insight in today's threat of Bird Flu and other recent medical threats for any reader.

Boomer. Misfit. Same

Difference Lolita Chatteraj Sengupta 2024-02-07 Lolita's delightful book is about her life from her twenties to the present - she is now in her fifties; recounting her funny escapades, from watching Amitabh Bachchan from the gent's toilet window in Wembley to facing subliminal racism and looking for work in the UK; from walking the streets of Calcutta with her

boyfriend, now husband, because they were too broke to stop anywhere and chat, to seeing ridiculous movies simply because it gave them an air-conditioned place to spend time; from her utter exhaustion with her prematurely born child to her heartbreak now that he is overseas for further studies. Her columns are hilarious but hard-hitting. Her unfiltered narration makes the book a chuckle fest. She has a self-deprecating humour rarely found in Indian authors. Her experiences are pedestrian but her observations are acute and disarmingly honest. If you have had multi-cultural experiences in the West and India and struggled to cope with the cultural confusion; if you are generally fumbling through life, making mistakes but never learning from them, you will love this book.

The Other Side of the World

Mary Jo Clark 2011-07 The Other Side of the World: Vision and Reality embraces and celebrates the experiences of idealistic, young Peace Corps volunteers as they confronted the ancient and enigmatic civilization of India four decades ago. Prompted by memories and emotions tapped during a gathering on the 40-year reunion of their return to the States, members of India 44 A&B provide reflections that are honest, compelling, insightful, riotous, humbling, and yet redemptive. These reflections give expression to feelings long repressed and, at the same time, uncover the mysterious ways in which their service in remote India transformed and redirected the trajectory of their lives. Their stories provide a humorous and deeply moving description of village life, where imperfect language skills and limited technical capabilities interacted with good intentions and stubborn dedication to produce embarrassment on the one hand, and the occasional

minor miracle on the other.

This is not a feel-good testimony to the Peace Corps on its golden anniversary. Rather, it is a sobering depiction of the lives of volunteers living in one of the Peace Corps' most demanding site countries, where frustrations and challenges were found in abundance. Yet at the end of the day, these stories generally attest to the wisdom of the Peace Corps concept, which affirms the powers of volunteerism and the giving of self. For many, it was the first time these volunteers had articulated their feelings since leaving India. Mary Jo Clark, Thomas Corbett, Michael Simonds and Haywood Turrentine compiled the book. Respectively, the authors reside in San Diego, California, Madison, Wisconsin, the greater Hartford area, and Birmingham, Alabama. <http://sbpra.com/HaywoodTurrentine>

Research Ethics is the first comprehensive and systematic reference on clinical research ethics. Under the editorship of experts from the U.S. National Institutes of Health of the United States, the book's 73 chapters offer a wide-ranging and systematic examination of all aspects of research with human beings. Considering the historical triumphs of research as well as its tragedies, the textbook provides a framework for analyzing the ethical aspects of research studies with human beings. Through both conceptual analysis and systematic reviews of empirical data, the contributors examine issues ranging from scientific validity, fair subject selection, risk benefit ratio, independent review, and informed consent to focused consideration of international research ethics, conflicts of interests, and other aspects of responsible conduct of research. The editors of The Oxford Textbook of Clinical Research Ethics offer a work that critically assesses and advances scholarship in the field of human subjects

research. Comprehensive in scope and depth, this book will be a crucial resource for researchers in the medical sciences, as well as teachers and students.

Travails of LOVE Bimal Prasad Mohapatra 2013-11-29
The book tells a love story between the daughter of a clever villager and the scholarly boy of a deprived widow. The love-locked pair had an obsession to work with their mentor for image makeover of their village through educational development, denied to the village by its influential Zamindar on the pretext of the modern education would spoil village's age-old social order. As the story progressed, the pair admitted in college where they befriended with a girl who was in exile to pave way for her corrupt father's promotion. The daughters of rich and powerful families tried to entice the boy, being impressed by his personality and all-round performances, which was thwarted with active cooperation of the exiled girl.

The major turning point of the story took place when the clever father of the girl forced her to ignore the boy in view of his social status. The frustrated father joined hand with Zamindar, his bête noire in village politics, to get rid of the boy along with his mother in a mid-night fire. But, their mentor rescued them. The boy got selected to civil service, came back to village, set up a High School, rescued his love and the villagers from the evil clutches of Zamindar. A fiction of love, romance, tragedy, superstition, humour, comic, exploitation, corruption, nasty politics and feudocracy.

Body and Mind Pat Jalland
2009-07-15 Body and Mind pays tribute to one of Australia's most outstanding

and influential historians, F. B. (Barry) Smith. Barry has made pioneering contributions to the political, social and cultural histories of Britain and Australia, and these essays range across the fields he made his own, especially the interconnected histories of medicine (body) and ideas (mind). The editors bring together several generations of Barry's admirers, colleagues, friends and pupils, including Joanna Bourke writing on war and industrial trauma, Peter Edwards on the Agent Orange controversy, Pat Jalland on death in the London Blitz and Phillipa Mein Smith on the idea of Australasia. Body and Mind is a salute to the inestimable work, and the life and times of F. B. Smith.

The Writer's Art James J.

Kilpatrick 2010-09-14 "A witty, entertaining, and enlightening antidote to sloppy, inflated, vague, or dull prose."

—Publishers Weekly Writing comes in grades of quality in the fashion of beer and baseball games—good, better, and best. With the experience of a lifetime spent writing, James J. Kilpatrick wants to make a few judgment calls. Here, in the great tradition of Theodore Bernstein, Edwin Newman, and William Safire, a master of the art gives us a finely crafted, witty guide to writing well. Intended for laymen and professionals alike, *The Writer's Art* highlights techniques and examples of good writing—and a section of the book called "My Crotchets and Your Crotchets" comprises more than two hundred personal judgment calls, often controversial, often funny, on word usage. "Put it on your

shelf between Strunk & White's *Elements of Style* and William Zinsser's *On Writing Well*." —Cleveland Plain Dealer "An honest, forthright, and at times charming look into American usage." —The New York Times Book Review "The *Writer's Art* is itself a work of art." —Dallas Morning News *Weariness, the Fever, and the Fret* Katherine McCuaig 1999 An ancient disease which predates man, tuberculosis was one of the earliest chronic life-threatening diseases faced by Canadians. By 1900 "The White Plague" was the number one cause of death for Canadians between fifteen and forty-five years of age. Racked by incessant coughing, barely able to catch their breath, tuberculosis sufferers seemed to literally waste away.

grew up. The terror of being bombed, the uncertainty of where the next meal came from and the stoicism of women trying to manage the needs of their families while their menfolk were fighting in other countries. We kids mainly thought the war was exciting, better than the Cinema, until we realised the realities of it. Despite all the dark side of war the Brits never lost their sense of humour, I'm sure it helped us to cope with whatever was thrown at us by Adolph and his gang!

Histories of Scientific Observation Lorraine Daston 2011-01-15 Observation is the most pervasive and fundamental practice of all the modern sciences, both natural

and human. Its instruments include not only the naked senses but also tools such as the telescope and microscope, the questionnaire, the photographic plate, the notebook, the glassed-in beehive, and myriad other ingenious inventions designed to make the invisible visible, the evanescent permanent, the abstract concrete. Yet observation has almost never been considered as an object of historical inquiry in itself. This wide-ranging collection offers the first examination of the history of scientific observation in its own right, as both epistemic category and scientific practice. Histories of Scientific Observation features engaging episodes drawn from across the spectrum of the natural and human sciences, ranging from meteorology, medicine, and natural history to economics, astronomy, and psychology. The contributions spotlight how observers have scrutinized everything—from seaweed to X-ray radiation, household budgets to the emotions—with ingenuity,

curiosity, and perseverance verging on obsession. This book makes a compelling case for the significance of the long, surprising, and epistemologically significant history of scientific observation, a history full of innovations that have enlarged the possibilities of perception, judgment, and reason.

Annals of Gullibility Stephen Greenspan 2008-12-30 The first book to provide a comprehensive look at the problem of gullibility, this groundbreaking work covers how and why we are fooled in areas that range from religion, politics, science, and medicine, to personal finance and relationships. First laying the groundwork by showing gullibility at play in the writings of historic authors we all know, developmental psychologist Stephen Greenspan follows with chapters that describe social duping across the gamut of human conduct. From people who pour bucks into investment scams, to those who follow the faith of scientologists, believe in fortunetellers, or champion unfounded medicine akin to snake oil, we all know someone who has been duped. A lot of us have been duped ourselves,

out of naive trust. It's not a matter of low intelligence that moves us to, without evidence, believe the words of politicians, salesmen, academics, lawyers, military figures, or cult leaders, among others. Greenspan shows us the four broad reasons we become drawn into gullible behavior, and he presents ways people can become less gullible.

Greenspan takes us into the vast realm of gullibility from the fictional Pied Piper to the historical Trojan Horse, then through modern-day military maneuvers, political untruths, police and criminal justice scams, and financial and love lies. While there have been earlier books focused on liars and manipulators of all sorts, this is the first to focus on the gullible who are their victims, and how the gullible can become less likely to be taken again.

Articulate Images Richard Wendorf 1983-10-01 Articulate Images was first published in 1983. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. Twenty-five years ago, Jean Hagstrum published a pioneering study, *The Sister Arts*, showing how the visual arts influenced the imagination of seventeenth- and eighteenth-century English poets.

Hagstrum's book suggested the intimate (and sometimes troubled) relationship between poetry and painting, and, more than any other on the subject, provided a basis for subsequent development and refinement within this field of comparative studies. The nine original essays in *Articulate Images* address the central issues Hagstrum raised; they

Professionalizing Medicine

John M. Harris Jr. 2019-03-12

This biography of James Edmund Reeves, whose legislative accomplishments cemented American physicians' control of the medical marketplace, illuminates landmarks of American health care: the troubled introduction of clinical epidemiology and development of botanic medicine and homeopathy, the Civil War's stimulation of sanitary science and hospital medicine, the rise of government involvement, the revolution in laboratory medicine, and the explosive growth of phony cures. It recounts the human side of medicine as well, including the management of untreatable diseases and the complex politics of medical practice and

professional organizing.

Reeves' life provides a reminder that while politics, economics, and science drive the societal trajectory of modern health care, moral decisions often determine its path.

Bumper Larry Writer

Farrell was the roughest, toughest street cop and leader of a vice squad Australia has ever seen. Strong as a bull, with cauliflowered ears and fists like hams, Bumper's beat from 1938 to 1976 was the most lawless in the land - the mean streets of Kings Cross and inner Sydney. His adversaries were such notorious criminals as Abe Saffron, Lennie McPherson, Tilly Devine and Kate Leigh and their gangs as well as the hooligans, sly groggers, SP bookies, pimps and spivs.

Criminals knew just where they stood: he would catch them, he would hurt them, and then he

would lock them away. He was a legendary Rugby League player for Newtown, and represented Australia against England and New Zealand. Here's Bumper Farrell in brutal, passionate and hilarious action . . . saving Ita Buttrose from a stalker, sparking a national scandal when accused of biting off a rival player's ear, beating Lennie McPherson so severely the hard man cried, single-handedly fighting a mob of gangsters in Kings Cross and winning, terrorising the hoons who harassed the prostitutes in the brothel lanes by driving over the top of them, commandeering the police launch to take him home to his beach home, diving overboard in full uniform and catching a wave to shore dispensing kindness and charity to the poor. Bumper Farrell: lawman, sportsman, larrikin . . . legend.
