Sand in Our Souls Leone Huntsman 2001 Images of 'the beach' pervade Australian popular culture. However the deeper significance of the experience of 'the beach', and its influence on Australian culture generally, have not yet been seriously explored. How, why and when did the beach become part of the Australian way of life? In *Sand in our Souls* Leone Huntsman describes the forces and pressures that encouraged or impeded Australians' enjoyment of sand and surf, from early enjoyment of bathing, through nearly a century of repressive restrictions, to freedom won in the face of drawn-out opposition. The ways in which artists, writers, film-makers and the advertising industry have depicted the beach are examined for the light they throw on the beach's significance. She traces the

development of a distinctively Australian way-of-being-at-the-beach, suggesting that the beach experience has been absorbed into our emerging culture and continues to shape it in subtle ways. Huntsman's provocative arguments will stimulate debate on the concept of 'national identity' appropriate for a new Australian century, and promote a deeper understanding of an aspect of life in Australia that is cherished by many of those who live here.

The Oxford Companion to Australian Music Warren

Arthur Bebbington 1997 The Oxford Companion to Australian Music is a reference work that will be of interest to music lovers as well as of use to musicians, scholars and students. To date no volume has combined an account of Australia's music with biographical information about its musicians, a critical guide to their works, publishers and recordings, and a guide to the burgeoning literature in the field. With more than 2,000

entries, the Companion ranges across a wide spectrum, from ancient Aboriginal traditions and European-derived orchestral, operatic and concert music, to Australian folk jazz, country, popular, rock, electronic and experimental music. It covers the music not only of mainstream audiences but also of Australia's religious denominations and recent migrant communities. Special attention is given to the distinctive features of Australian musical life: its reliance on government support rather than private or ecclesiastical patronage, its unquenchable appetite for eisteddfods, choral societies and bands; the shadow cast by European traditions; the vicissitudes of its attitudes towards composers; the late development of music criticism and scholarship; and the role of regional cities and towns. There are numerous entries on Aboriginal subjects and on key musical organizations and considerable space is given to a series of longer entries

covering musical works, institutions, genres, instruments, terms, and many of the historical contexts of Australian music. These key essays offer an authoritative framework for a better understanding of the shape and originality of music-making in Australia.

Gundagai Album 1976 In 1971 the National Library of Australia was given some 900 glass negatives of Gundagai. Of the collection found by chance, 120 selected plates are reproduced in this book. The photographs were taken at the turn of the century and are believed to be the work of Charles Louis Gabriel, a doctor who added an exotic French flavour to that loyal bastion of the British Empire, Gundagai.
