Guns, Germs, and Steel: The Fates of Human Societies (20th Anniversary Edition) Jared Diamond 2017-03-07

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and ventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be

and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

Guns, Germs & Steel (NEW)

Jared Diamond 2016-08-18

PADA 1970-an, ketika sedang berada di Papua untuk meneliti burung, Jared Diamond ditanyai oleh sahabatnya yang orang Papua: Mengapa orang kulit putih membuat banyak barang berharga, sementara orang Papua tidak? Pertanyaan itu sebenarnya adalah pertanyaan mengenai mengapa kemajuan peradaban di berbagai benua itu berbeda-beda. *Guns, Germs & Steel*, buku pemenang Hadiah Pulitzer 1998, adalah jawaban Jared Diamond bagi pertanyaan sahabatnya. Mengapa sebagian bangsa di dunia bisa mencapai kemajuan teknologi dan peradaban, sehingga lintas

menaklukkan dan menjajah bangsa di bagian dunia lain? Apakah itu karena bangsa-bangsa itu hakikatnya lebih unggul daripada lainnya? Atau semua bangsa sama saja, dan yang membedakan adalah faktor lingkungan berupa tanah, iklim, flora-fauna, dan sejarah alam? Guns, Germs & Steel mengajak kita melihat riwayat peradaban manusia pada masa tepat sebelum masa sejarah—mulai sekitar tahun 11000 SM—yang justru penting karena pada waktu itulah unsur-unsur pembentuk peradaban manusia seperti pertanian dan bahasa muncul. Dari situ kita diajak meninjau perkembangan di semua benua, dan mengetahui mengapa kemajuan peradaban manusia di berbagai tempat itu berbeda-beda.

Collapse Jared Diamond
2013-03-21 From the author of Guns, Germs and Steel, Jared Diamond's Collapse: How Societies Choose to Fail or Survive is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword,

Jared Diamond's Collapse uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's Collapse also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's

The History of the Ancient World: From the Earliest Accounts to the Fall of Rome

Susan Wise Bauer

2007-03-17 A lively and engaging narrative history showing the common threads in the cultures that gave birth to our own. This is the first volume in a bold new series that tells the stories of all peoples, connecting historical events from Europe to the Middle East to the far coast of China, while still giving weight to the characteristics of each country. Susan Wise Bauer provides both sweeping scope and vivid attention to the individual lives that give flesh to abstract assertions about human history. Dozens of maps provide a clear geography of great events, while timelines give the reader an ongoing sense of the passage of years and cultural interconnection. This old-fashioned narrative history employs the methods of "history from beneath"—literature, epic traditions, private letters and accounts—to connect kings and

leaders with the lives of those they ruled. The result is an engrossing tapestry of human behavior from which we may draw conclusions about the direction of world events and the causes behind them.

Guns, Germs and Steel Jared Mason, Diamond 1997

Guns, Germs, and Steel Jared M. Diamond 1999 Dismantles racially based theories of human history by revealing the environmental factors he feels are responsible for history's broadest patterns.

Quicklet on Guns, Germs, and Steel by Jared Diamond Niko Silvester 2011-12-20 ABOUT THE BOOK While working in New Guinea in 1972, where he was studying bird evolution, Jared Diamond met a local politician touring the area. At the time, Papua New Guinea was approaching independence after long being administered by Australia. Yali, the politician, spoke about preparing his people for independence, and asked Diamond many questions about history and other topics.

Finally, he wanted to know why

the conquering Europeans had arrived with so many goods and technology, while the New Guineans had so little of their own. It seems to be a simple question, and yet answering it took Diamond twenty-five years. *Guns, Germs, and Steel: The Fates of Human Societies*, is his attempt to answer not just Yali's question, but the whole question of why some peoples in some parts of the world developed technological advances before others, and why some of them were then able to conquer other peoples using those advances. MEET THE AUTHOR Nicole has been writing since she could make letters with a pencil, and has been making a living at it for more than ten years. She has gone back to school too many times, studying archaeology, folklore, writing and visual art. She writes fiction under several pen names, and also does printmaking, book arts, and photography. She's an avid amateur natural historian with a particular fascination for things that fly, whether it's birds, bats or insects. And if it's

possible to be both a luddite, with a love for the low-tech, and a technophile, with a fascination for everything new and shiny, Nicole is both. She reads too many books, plays too many video games, and watches too much anime. EXCERPT FROM THE BOOK *Guns, Germs, and Steel* is, as mentioned above, Jared Diamond's attempt to answer the question of why some societies were able to conquer their neighbours and spread across the globe, instead of being conquered while their neighbours did the spreading. The usual reasons a person might think up to answer that question are generally unsatisfactory. Biological explanations, that some peoples are more intelligent than others, are not only distasteful (and racist), but unproven. In fact, studies of human intelligence, the ones that overcome cultural bias, tend to show that humans are, on average, pretty much the same across cultures. So why did some cultures develop the technology to conquer more

quickly, and some didn't develop such technology at all? Diamond takes us right back to the beginnings of human settlement on the different continents to show that the explanation may be largely geographic. That is, the places where people settled gave them more or fewer advantages in the areas necessary for developing the social complexity, which in turn could lead to technological advances.

Summary and Analysis of Guns, Germs, and Steel: The Fates of Human Societies Worth Books 2016-11-15 So much to read, so little time? Crafted and edited with care, Worth Books set the standard for quality and give you the tools you need to be a well-informed reader. This short summary and analysis of *Guns, Germs, and Steel* by Jared Diamond includes: Historical context Chapter-by-chapter summaries Detailed timeline of key events

Important quotes Fascinating trivia Glossary of terms Supporting material to enhance your understanding of the original work About *Guns, Germs, and Steel* by Jared Diamond: Professor Jared Diamond's informative and fascinating Pulitzer Prize-winning *Guns, Germs, and Steel* explores a historic question: Why were the Eurasian peoples able to dominate those from other lands? Diamond argues that it was ecology and geography—not race—that shaped the modern world. Societies that developed in regions with fertile land for farming and that had domesticable plants and animals were able to progress more quickly, thereby creating the tools to conquer preliterate cultures. Drawing on a variety of disciplines—from linguistics, genetics, and epidemiology to biology, anthropology, and technology—*Guns, Germs, and Steel* offers an eloquently argued view of the development of human societies. The summary and

analysis in this ebook are intended to complement your reading experience and bring you closer to a great work of nonfiction.

Lone Survivors Chris Stringer
2012-03-13 A leading researcher on human evolution proposes a new and controversial theory of how our species came to be In this groundbreaking and engaging work of science, world-renowned paleoanthropologist Chris Stringer sets out a new theory of humanity's origin, challenging both the multiregionalists (who hold that modern humans developed from ancient ancestors in different parts of the world) and his own "out of Africa" theory, which maintains that humans emerged rapidly in one small part of Africa and then spread to replace all other humans within and outside the continent. Stringer's new theory, based on archeological and genetic evidence, holds that distinct humans coexisted and competed across the African continent—exchanging genes, tools, and behavioral

strategies. Stringer draws on analyses of old and new fossils from around the world, DNA studies of Neanderthals (using the full genome map) and other species, and recent archeological digs to unveil his new theory. He shows how the most sensational recent fossil findings fit with his model, and he questions previous concepts (including his own) of modernity and how it evolved. Lone Survivors will be the definitive account of who and what we were, and will change perceptions about our origins and about what it means to be human.

manufacturing. For All the Tea in China is the remarkable account of Fortune's journeys into China—a thrilling narrative that combines history, geography, botany, natural science, and old-fashioned adventure. Disguised in Mandarin robes, Fortune ventured deep into the country, confronting pirates, hostile climate, and his own untrustworthy men as he made his way to the epicenter of tea production, the remote Wu Yi Shan hills. One of the most daring acts of corporate espionage in history, Fortune's pursuit of China's ancient secret makes for a classic nineteenth-century adventure tale, one in which the fate of empires hinges on the feats of one extraordinary man.

Critical Summary of Guns, Germs, and Steel - The Fates of Human Societies by Jared Diamond Dennis Bergot
2004-02-17 Seminar paper from the year 2004 in the subject Economy - Environment economics, grade: 1,0 (A),

University of Hamburg (Centre for Sea and Climate Research), course: Seminar Contemporary Environmental Problems, 4 entries in the bibliography, language: English, abstract: The starting point of Diamond's book "Guns, Germs, And Steel" is a question he was asked by an indigenous New Guinean friend of his called Yali. His question was: "Why is it that you white people developed so much cargo and brought it to New Guinea, but we black people had little cargo of our own?"¹, addressing the obvious inequality in wealth and power of today's world. With his book, Diamond tries to provide an answer for this question. According to Diamond, the immediate causes for the inequalities in the world today are to be found in the different stages of development between the continents as of around A.D. 1500. By that time, only societies of Eurasia, the landmass that constitutes Asia and Europe, and there especially the Western Europeans, possessed ocean-going ships, population-

decimating germs, steel weapons, horses usable for warfare, easy spread of information by an efficient writing system and many other means that come in handy decimating, subjugating or in some cases even exterminating the original inhabitants of other continents. Diamond calls these advantages the proximate factors of differing developments that led to the inequalities. The book's title "Guns, Germs, And Steel" can be understood as a summary of these proximate causes. In chapter three of his book, Diamond cites as a prominent example of the inequalities the conquest by the Spaniard Francisco Pizarro and a few hundred soldiers over the Inca emperor Atahualpa at Cajamarca/Peru in A.D. 1532. The Spanish got there and won because they possessed the above stated proximate factors. He then turns the point around and asks why, for instance, the Native Americans or Aboriginal Australians were not the ones who possessed these proximate factors and used them to

conquer Europe. [...]

The book attempts to provide answers to the question: Why have Eurasian people been the dominant wealth and power in the world? That is, why didn't other cultures gain dominance before 1,500 CE? After all, until the end of the most recent Ice Age, circa 11,000 BCE, all humans were hunter-gatherers. So, what accounts for the different rates of development of societies between 11,000 BCE and 1500 CE? Those questions are the subject of the book. The author says that finding reasons or causes for the unequal distribution of wealth and goods does not justify it. Diamond says we do not justify disease just because we understand its causes. He says that the foundations of European societies were developed in other part of the world, so the focus is not on aggrandizing Europe. [An Analysis of Jared Diamond's Guns, Germs & Steel](#) Riley Quinn 2017-07-05 In his 1997 work *Guns, Germs and Steel*, Jared Diamond marshals evidence from five continents and across 13,000 years of human history in an attempt to answer the question of why that history unfolded so differently in various parts of the globe. His results offer new explanations for why the unequal divisions of power and wealth so familiar to us today came into existence - and have persisted. Balancing materials drawn from a vast range of sources, addressing core

problems that have fascinated historians, anthropologists, biologists and geographers alike - and blending his analysis to create a compelling narrative that became an international best-seller and reached a broad general market - required a mastery of the critical thinking skill of reasoning that few other scholars can rival. Diamond's reasoning skills allow him to persuade his readers of the value of his interdisciplinary approach and produce well-structured arguments that keep them turning pages even as he refocuses his analysis from one disparate example to another. Diamond adds to that a spectacular ability to grasp the meaning of the available evidence produced by scholars in those widely different disciplines - making *Guns, Germs and Steel* equally valuable as an exercise in high-level interpretation.

portrait of the human past that offers profound lessons for how we can live today Visionary, prize-winning author Jared Diamond changed the way we think about the rise and fall of human civilizations with his previous international bestsellers *Guns, Germs and Steel* and *Collapse*. Now he returns with another epic - and groundbreaking - journey into our rapidly receding past. In *The World Until Yesterday*, Diamond reveals how traditional societies around the world offer an extraordinary window onto how our ancestors lived for the majority of human history - until virtually yesterday, in evolutionary terms - and provide unique, often overlooked insights into human nature. Drawing extensively on his decades working in the jungles of Papua New Guinea, Diamond explores how tribal societies approach essential human problems, from childrearing to conflict resolution to health, and discovers we have much to learn from traditional ways of life. He unearths remarkable

findings - from the reason why modern afflictions like diabetes, obesity and Alzheimer's are virtually non-existent in tribal societies to the surprising benefits of multilingualism. Panoramic in scope and thrillingly original, *The World Until Yesterday* provides an enthralling first-hand picture of the human past that also suggests profound lessons for how to live well today. Jared Diamond is the Pulitzer Prize-winning author of the seminal million-copy bestseller *Guns, Germs, and Steel*, which was named one of TIME's best non-fiction books of all time, and *Collapse*, a #1 international bestseller. A professor of geography at UCLA and noted polymath, Diamond's work has been influential in the fields of anthropology, biology, ornithology, ecology and history, among others.

struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic

evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success

and the origins of human uniqueness.

Why Europe? Michael Mitterauer 2010-07-15 Why did capitalism and colonialism arise in Europe and not elsewhere? Why were

parliamentarian and democratic forms of government founded there? What factors led to Europe's unique position in shaping the world? Thoroughly researched and persuasively argued, *Why Europe?* tackles these classic questions with illuminating results. Michael Mitterauer traces the roots of Europe's singularity to the medieval era, specifically to developments in agriculture. While most historians have located the beginning of Europe's special path in the rise of state power in the modern era, Mitterauer establishes its origins in rye and oats. These new crops played a decisive role in remaking the European family, he contends, spurring the rise of individualism and softening the constraints of patriarchy. Mitterauer reaches these conclusions by comparing Europe with other cultures, especially China and the Islamic world, while surveying the most important characteristics of European society as they took shape from the decline of the Roman

Why the West Rules - For Now

Ian Morris 2011-01-14 Why does the West rule? In this magnum opus, eminent Stanford polymath Ian Morris answers this provocative question, drawing on 50,000 years of history, archeology, and the methods of social science, to make sense of when, how, and why the paths of development differed in the East and West — and what this portends for the 21st century. There are two broad schools of thought on why the West rules. Proponents of "Long-Term Lock-In" theories such as Jared

Diamond suggest that from time immemorial, some critical factor — geography, climate, or culture perhaps — made East and West unalterably different, and determined that the industrial revolution would happen in the West and push it further ahead of the East. But the East led the West between 500 and 1600, so this development can't have been inevitable; and so proponents of "Short-Term Accident" theories argue that Western rule was a temporary aberration that is now coming to an end, with Japan, China, and India resuming their rightful places on the world stage. However, as the West led for 9,000 of the previous 10,000 years, it wasn't just a temporary aberration. So, if we want to know why the West rules, we need a whole new theory. Ian Morris, boldly entering the turf of Jared Diamond and Niall Ferguson, provides the broader approach that is necessary, combining the textual historian's focus on context, the anthropological archaeologist's awareness of

the deep past, and the social scientist's comparative methods to make sense of the past, present, and future — in a way no one has ever done before.

Where humanity began and how it spread throughout the world What environmental factors affected the development of different societies around the world How

agriculture and early food production led to the development of complex societies How large mammal domestication led to the development of infectious diseases that gave colonists an advantage over indigenous peoples How large-scale agriculture allowed societies to support non-food-producing individuals that developed important technologies What happens when two societies with their own agendas come in contact with each other for the first time What we can learn about the current state of the world with the clarity of hindsight that this book provides Book Summary Overview In "Guns, Germs, and Steel" readers have the chance to examine the course of human history on the broadest scale. Starting with the dawn of humanity and our spread out of Africa, Jared Diamond explains how the environmental, geographical, and ecological differences that were endemic to specific parts of the world led to differences in the development of the

peoples in those parts of the world. This exhaustive tome leaves no stone unturned as Diamond searches for the answers to questions that have been asked time and again throughout history. Insurrections of the Mind

Franklin Foer 2014-09-16 To commemorate the 100th anniversary of The New Republic, an extraordinary anthology of essays culled from the archives of the acclaimed and influential magazine Founded by Herbert Croly and Walter Lippmann in 1914 to give voice to the growing progressive movement, The New Republic has charted and shaped the state of American liberalism, publishing many of the twentieth century's most important thinkers.

Insurrections of the Mind is an intellectual biography of this great American political tradition. In seventy essays, organized chronologically by

decade, a stunning collection of writers explore the pivotal issues of modern America.

Weighing in on the New Deal; America's role in war; the rise and fall of communism; religion, race, and civil rights; the economy, terrorism, technology; and the women's movement and gay rights, the essays in this outstanding volume speak to The New Republic's breathtaking ambition and reach.

Introducing each article, editor Franklin Foer provides colorful biographical sketches and amusing anecdotes from the magazine's history. Bold and brilliant, Insurrections of the Mind is a celebration of a cultural, political, and intellectual institution that has stood the test of time.

Contributors include: Virginia Woolf, Vladimir Nabokov, George Orwell, Graham Greene, Philip Roth, Pauline Kael, Michael Lewis, Zadie Smith, William Faulkner, Ralph Ellison, James Wolcott, D. H. Lawrence, John Maynard Keynes, Langston Hughes, John Updike, and Margaret Talbot.

Upheaval Jared Diamond
2019-05-07 A "riveting and illuminating" Bill Gates Summer Reading pick about how and why some nations recover from trauma and others don't (Yuval Noah Harari), by the Pulitzer Prize-winning author of the landmark bestseller *Guns, Germs, and Steel*. In his international bestsellers *Guns, Germs and Steel* and *Collapse*, Jared Diamond transformed our understanding of what makes civilizations rise and fall. Now, in his third book in this monumental trilogy, he reveals how successful nations recover from crises while adopting selective changes -- a coping mechanism more commonly associated with individuals recovering from personal crises. Diamond compares how six countries have survived recent upheavals -- ranging from the forced opening of Japan by U.S. Commodore Perry's fleet, to the Soviet Union's attack on Finland, to a murderous coup or counter coup in Chile and Indonesia, to the

transformations of Germany and Austria after World War Two. Because Diamond has lived and spoken the language in five of these six countries, he can present gut-wrenching histories experienced firsthand. These nations coped, to varying degrees, through mechanisms such as acknowledgment of responsibility, painfully honest self-appraisal, and learning from models of other nations. Looking to the future, Diamond examines whether the United States, Japan, and the whole world are successfully coping with the grave crises they currently face. Can we learn from lessons of the past? Adding a psychological dimension to the in-depth history, geography, biology, and anthropology that mark all of Diamond's books, *Upheaval* reveals factors influencing how both whole nations and individual people can respond to big challenges. The result is a book epic in scope, but also his most personal yet.

Jared Diamond marshals evidence from five continents and across 13,000 years of human history in an attempt to answer the question of why that history unfolded so differently in various parts of the globe. His results offer new explanations for why the unequal divisions of power and wealth so familiar to us today came into existence - and have persisted. Balancing materials drawn from a vast range of sources, addressing core problems that have fascinated historians, anthropologists, biologists and geographers alike - and blending his analysis to create a compelling narrative that became an international best-seller and reached a broad general market - required a mastery of the critical thinking skill of reasoning that few other scholars can rival. Diamond's reasoning skills allow him to persuade his readers of the value of his interdisciplinary approach and produce well-structured arguments that keep them turning pages even as he refocuses his analysis

from one disparate example to another. Diamond adds to that a spectacular ability to grasp the meaning of the available evidence produced by scholars in those widely different disciplines - making Guns, Germs and Steel equally valuable as an exercise in high-level interpretation.

The Lifeboat Strategy Mark Nestmann 2011-03-15 On every front, 24 hours a day, you and your wealth face threats of an intensity that would have been unimaginable only a few short years ago. A sinister marriage of law and technology has made the pervasive and continuous surveillance that George Orwell warned of a reality. Identity thieves, greedy lawyers and the government have been quick to exploit this fast-evolving global surveillance network: - Data thieves can hijack your PC with easy-to-use hacking tools that even a 10-year old can master. After stealing your log-on passwords, they can drain your bank accounts. - If someone has a grudge against you, he

can learn whether you're "worth suing" with a few clicks of a mouse. Hundreds of Web sites offer asset-tracking services to find your real estate ownership records, bank account balances, and much more. - Secret government data mining programs monitor your personal and financial activities 24 hours a day for "suspicious transactions." One oversight--becoming friends on Facebook with a suspected terrorist, withdrawing too much cash, unknowingly renting property to someone with a criminal background, etc.--and you could find yourself under arrest and your assets frozen. . Fortunately, you CAN fight back. You can secure your PC to make it virtually invulnerable to hackers. You can legally create international "lifeboats" of wealth and privacy that are practically invulnerable to snooping. You can understand what the government regards as suspicious ... and avoid raising your profile unnecessarily. The Lifeboat Strategy (2011) shows you

exactly what you need to do to counter today's threats to wealth and privacy. It documents today's unprecedented threats to wealth and privacy and reveals hundreds of completely legal strategies to deal with them: private investments, opportunities, and strategies inside--and outside--the United States. And, it's written in language you can understand and put to work to protect yourself and your family. Special bonus report accompanying The Lifeboat Strategy (2011): How to Find Your Own Safe Haven Offshore. In this report, you you'll learn: - The 11 countries best suited for wealth preservation - Which countries offer the most to prospective immigrants? - How to legally purchase a second passport--and why you might want to. - In the current economic crisis, which "asset havens" will survive--or not? As the U.S. dollar collapses and the world moves into fiscal chaos, planning your own "escape from America" has never been
