Gun, With Occasional Music Jonathan Lethem 1995-01-15 Twenty-first-century private detective Conrad Metcalf has a dead doctor on his hands, a monkey on his back, and a kangaroo in his waiting room in a first novel with a sharp-edged, funny vision of the future.

Expedient Homemade Firearms P.A. Luty 1998-05-01 The author provides clear, step-by-step instructions for an expedient 9mm submachine gun. It is easily constructed from readily available materials, primarily steel tubing; it does not require a lathe and milling machine and it can be built by just about anyone in about a week. US Anti-tank Artillery 1941-45 Steven J. Zaloga 2012-08-20 The US Army's development of the 37mm anti-tank gun began in response to needs identified during the Spanish Civil War. By the time it entered service in Tunisia in 1943, the gun was already obsolete, and the US began the licensed manufacture of the British 6-pdr in the hope of finding a quick solution to its artillery requirements. This in turn proved unequal to the demands of warfare in France in 1944, and further anti-tank measures were developed - rocket propelled grenades for infantry use, and weapons designed specifically for use by the Tank Destroyer Force.

Guns Down Igor Volsky 2019-04-09 One of Mashable's "17 books every activist should read in 2019" Join the conversation about creating a future with fewer guns and finally make a difference—this "smart, thoughtful, commonsense plan" (Donna Brazile) shows you how Ninety-six people die from guns in America every single day. Twelve thousand Americans are murdered each year. The United States has more mass shootings, gun suicides, and nonfatal gun injuries than any other industrialized country in the world. Gun-safety advocates have tried to solve these problems with incremental changes such as background checks and banning assault style military weapons. They have fallen short. In order to significantly and permanently reduce gun deaths the United States needs a bold new approach: a drastic reduction of the 390 million guns already in circulation and a new movement dedicated to a future with fewer guns. In *Guns Down*, Igor Volsky tells the story of how he took on the NRA just by using his Twitter account, describes how he found common ground with gun enthusiasts after spending two days shooting guns in the desert, and lays out a blueprint for how citizens can push their governments to reduce the number of guns in circulation and make firearms significantly harder to get. An aggressive licensing and registration initiative, federal and state buybacks of millions of guns, and tighter regulation of the gun industry, the gun lobby, and gun sellers will build safer communities for all. Volsky outlines a New Second Amendment Compact developed with policy experts from across the political spectrum, including bold reforms that have succeeded in reducing gun violence worldwide, and offers a road map for achieving transformative change to increase safety in our communities.

The Toughest Gun Control Law in the Nation James B. Jacobs 2019-11-05 A comprehensive assessment of real gun reform legislation with recommendations for better design, implementation and enforcement A month after the Sandy Hook Elementary School shooting, New York State passed, with record speed, the first and most comprehensive state post-Sandy Hook gun control law. In *The Toughest Gun Control Law in the Nation*, James B. Jacobs and Zoe Fuhr ask whether the 2013 SAFE Act —hailed by Governor Andrew Cuomo as “the nation’s toughest gun control law” - has lived up to its promise. Jacobs and Fuhr illuminate the gap between gun control on the books and gun control in action. They argue that, to be effective, gun controls must be capable of implementation and enforcement. This requires realistic design, administrative and enforcement capacity and commitment and ongoing political and fiscal support. They show that while the SAFE Act was good symbolic politics, most of its provisions were not effectively implemented or, if implemented, not enforced. Gun control in a society awash with guns poses an immense regulatory challenge. *The Toughest Gun Control Law in the Nation* takes a tough-minded look at the technological, administrative, fiscal and local political impediments to effectively keeping guns out of the hands of dangerous persons and eliminating some types of guns altogether.

German 88mm Gun vs Allied Armour David Campbell 2021-02-18 Few weapons developed a more deadly reputation than the German '88' in the role of anti-tank gun, its long reach and lethal hitting power making it a significant problem for every type of British and later American armour. Despite its individual potency, it was almost always utilized as part of a comprehensive system of defences that relied on a mix of weapons carefully deployed in anticipation of the enemy's likely avenue and method of attack. Used in this way, the 88 became a particularly deadly part of the Afrika Korps' attempts to shatter British armoured power in the Western Desert. Initially extremely successful over the course of 1941 and 1942 in Operations Battleaxe and Crusader, the Allies' tactics and vehicles (such as the American-made M3 and the Crusader III) eventually evolved to deal with the 88's awesome power. This detailed new book tells the story of that evolution and provides an in-depth treatment of this key weapon of World War II.

The Gun Book for Girls Silvio Calabi 2013-09-16 This third installment in the popular series of practical books about guns and shooting is aimed at women of all ages—the fastest-growing segment of the sport—and it couldn't come at a better time. America and firearms literally grew up together, but today guns are often simply linked to crime and violence; gun control has become a polarizing political issue; and misinformation about firearms is spreading. Now three experts have tackled the subject in a series of books that explores the realities of guns and shooting and sets the record straight about some common misconceptions. On the heels of *The Gun Book for Boys* and *The Gun Book for Parents*, *The Gun Book for Girls* is for girls (and women) interested in guns and shooting but who have little or no background in firearms. Through example and anecdote, the book emphasizes safety and proper usage, and it defines terms and provides hands-on advice about using and maintaining guns. It also covers firearms, shooting methods, clothing and accessories for women, profiles females who shoot and who work in the gun trade, and discusses the issues around guns for self-defense (a topic of special interest to women). Like the other two titles, this book is non-political and written in an easy-to-understand conversational tone. Each book is thoroughly illustrated, and content is presented in easily managed

portions that can be read in series or singly, all backed up with an index. *This Nonviolent Stuff'll Get You Killed* Charles E. Cobb 2014-06-03 Visiting Martin Luther King, Jr. at the peak of the civil rights movement, the journalist William Worthy almost sat on a loaded pistol. "Just for self-defense," King assured him. One of King's advisors remembered the reverend's home as "an arsenal." Like King, many nonviolent activists embraced their constitutional right to self-protection—yet this crucial dimension of the civil rights struggle has been long ignored. In *This Nonviolent Stuff'll Get You Killed*, civil rights scholar Charles E. Cobb, Jr. reveals how nonviolent activists and their allies kept the civil rights movement alive by bearing—and, when necessary, using—firearms. Whether patrolling their neighborhoods, garrisoning their homes, or firing back at attackers, these men and women were crucial to the movement's success, as were the weapons they carried. Drawing on his firsthand experiences in the Southern Freedom Movement and interviews with fellow participants, Cobb offers a controversial examination of the vital role guns have played in securing American liberties.

Gun Fodder A. Hamilton Gibbs 2015-07-26 In the tradition of T.E. Lawrence (of Arabia) and Robert Graves is A. Hamilton Gibbs' classic World War I memoir of his time in service to king and country. With humor, intelligence, sorrow, and bitterness he truthfully, nakedly, vividly, reveals the experience not only of one soldier in the British Army, but of thousands, and hundreds of thousands. It was the first time I'd seen men killed and it left me silent, angry. Why "go out" like that on some damned Serbian hill? What was it all about that everybody was trying to kill everybody else? Wasn't the sun shining and the world beautiful? What was this disease that had broken out like a scab over the face of the world? — Why did those particular dots have to fall? Why not the ones a yard away? What was the law of selection? Was there a law? Did every bullet have its billet? Was there a bullet for the Colonel? — For me? — No. It was impossible! But then, why those others and which of us? He was the brother of Cosmo Hamilton (playwright-novelist) and Sir Philip Gibbs (journalist-novelist). His novels include *The Persistent Lovers* (adapted into a 1922 film), *Soundings* (1925) and *Chances* (1930). For the first time, this long out-of-print volume is available as an affordable, well-formatted book for e-readers and smartphones. West Point History of World War II, Vol. 1 The United States Military Academy 2015-11-03 An outstanding new military history of the first half of World War II, featuring a rich array of images, exclusive graphics, superb new maps, and expert analysis commissioned by the United States Military Academy to teach the art of war to West Point cadets. Since 1836, United States Military Academy texts have been the gold standard for teaching military history and the operational art of war. Now the USMA has developed a new military history series for the public featuring the story of World War II in two volumes, of which this is the first. The *West Point History of World War II* combines the expertise of preeminent historians with hundreds of maps and images, many created for this volume or selected from Army collections. The first volume offers a balanced narrative analyzing the rising tide of Axis conquest from 1939 to mid-1942, ranging from battlefield decisions to operational and strategic plans, all set in their proper political context. The closing chapter provides a thematic treatment of the mobilization of the warring nations' economies and home fronts for the conduct of total war. The *West Point History of World War II* has been tested, checked, and polished by West Point cadets, faculty, and graduates to make this the best military history of its kind.

Giving Up the Gun Noel Perrin 1979 Lord Hideyoshi, the regent of Japan at the time, took the first step toward the control of firearms. It was a very small step, and it was not taken simply to protect feudal lords from being shot at by peasants but to get all weapons out of the hands of civilians. He said nothing about arms control. Instead, he announced that he was going to build a statue of Buddha that would make all existing statues look like midgets. It would be so enormous (the figure was about twice the scale of the Statue of Liberty), that many tons of iron would be needed just for the braces and bolts. Still more was required to erect the accompanying temple, which was to cover a piece of ground something over an eighth of a mile square. All farmers, ji-samurai, and monks were invited to contribute their swords and guns to the cause. They were, in fact, required to. -- from publisher description.

Poetry of the First World War Tim Kendall 2013-10-10 The First World War produced an extraordinary flowering of poetic talent, poets whose words commemorate the conflict more personally and as enduringly as monuments in stone. Lines such as 'What passing-bells for these who die as cattle?' and 'They shall grow not old, as we that are left grow old' have come to express the feelings of a nation about the horrors and aftermath of war. This new anthology provides a definitive record of the achievements of the Great War poets. As well as offering generous selections from the celebrated soldier-poets, including Wilfred Owen, Siegfried Sassoon, Rupert Brooke, and Ivor Gurney, it also incorporates less well-known writing by civilian and women poets. Music hall and trench songs provide a further lyrical perspective on the War. A general introduction charts the history of the war poets' reception and challenges prevailing myths about the war poets' progress from idealism to bitterness. The work of each poet is prefaced with a biographical account that sets the poems in their historical context. Although the War has now passed out of living memory, its haunting of our language and culture has not been exorcised. Its poetry survives because it continues to speak to and about us.

Where Have All the Flowers Gone John Guinane 2015-06-04 *Where Have All the Flowers Gone* tells the tale of war soldiering and coming home—the story of the Vietnam War as seen by one soldier. Being a soldier in Vietnam left an indelible impression on John Guinane. A Vietnam Vet, John visited a hospital on June 4, 2012, for a checkup. A male nurse was taking his blood. He was about forty years old, a college graduate who had majored in Journalism. He asked John what he was doing with his life. John told him he was writing a book about Vietnam and had just finished a chapter on the My Lai Massacre. The young man had never heard of the My Lai massacre. This was the only incentive John needed to finish the tale about his life. *Where Have All the Flowers Gone* is an unbiased and concise summary of the Vietnam conflict, written in the hopes that a young reader would gain some knowledge and a better understanding of this tragic period in American history. Why would anybody wish to write about Vietnam? "Because as Santayana has warned: "Those who do not learn from history are condemned to repeat it." And this nation—great as it is—cannot afford another Vietnam.

B-17 MEMORIES T/Sgt. James Lee Hutchinson, Ed.S. 2014-05-22 The *Memphis Belle*, completed 25 missions and became the symbol of Eighth Air Force success in the air war over Europe. Its national tour rallied support and encouraged citizens enduring rationing and sacrifices for victory. Heavy bomber aircrews proved their value with precision bombing. My writing is based on memories, diaries and interviews of other veterans and my teenage experiences as an Eighth Air Force B-17 radio/gunner on twenty combat missions with the 490th Bomb Group (H). This fourth book presents short stories of boys on B-17 Flying Fortress crews flying deadly missions to destroy German and Italian military targets. Twenty-six thousand airmen died and thousands more were wounded. The sky was our arena and we paved the way for Infantry and Armored Divisions slogging through heat, rain or snow to preserve our freedom. Many B-17 gunners were teenagers who enlisted or were drafted, trained and sent into combat before they could legally vote or buy a drink. They saved our freedom and came home to build the USA into the most powerful nation in the world. I self-publish because I am 89 and my time is limited. I thank God that I have been able to record more than 350 stories of my generation. "WW II veterans are fading into

Gunner's Glory Johnnie Clark 2007-12-18 They were warriors, trained to fight, dedicated to their country, and determined to win. At Guadalcanal, the Marine Corps' machine gunners took everything the Japanese could throw at them in one of the bloodiest battles of World War II; their position was so hopeless that at one point they were given the go-ahead to surrender. Near the Chosin Reservoir in Korea, as the mercury dropped to twenty below, the 1st Marine Division found itself surrounded and cut off by the enemy. The outlook seemed so bleak that many in Washington had privately written off the men. But surrender is not part of a Marine's vocabulary. Gunner's Glory contains true stories of these and other tough battles in the Pacific, in Korea, and in Vietnam, recounted by the machine gunners who fought them. Bloody, wounded, sometimes barely alive, they stayed with their guns, delivering a stream of firepower that often turned defeat into victory—and always made them the enemy's first target.

The Court-Martial of Mother Jones Edward M. Steel 2021-11-21 In March 1913, labor agitator Mary Harris "Mother" Jones and forty-seven other civilians were tried by a military court on charges of murder and conspiracy to murder—charges stemming from violence that erupted during the long coal miners' strike in the Paint Creek and Cabin Creek areas of Kanawha County, West Virginia. Immediately after the trial, some of the convicted defendants received conditional pardons, but Mother Jones and eleven others remained in custody until early May. This arrest and conviction came in the latter years of Mother Jones's long career as a labor agitator. Eighty-one and feisty as ever, she was able to focus national attention on the miners' cause and on the governor's tactics for handling the dispute. Over the course of seven months, more than two hundred civilians were tried by courts-martial. Only during the Civil War and Reconstruction had the courts been used so extensively against private citizens, and the trial raised a number of civil rights issues. The national outcry over Mother Jones's imprisonment led the United States Senate to appoint a subcommittee to examine mining conditions in West Virginia—the first Senate subcommittee ever appointed to investigate a labor controversy. Public sentiment eventually forced a release of the prisoners and brought about a settlement of the strike. In the face of this overwhelmingly adverse publicity, the governor suppressed publication of the trial transcript, and it was long thought to have been destroyed. Edward M. Steel Jr., an authority on Mother Jones, uncovered the trial proceedings while searching for Jones's manuscripts amid private papers at the West Virginia and Regional Collection. This volume makes available for the first time the transcript of this landmark case in labor and legal history, including an introduction that provides background on the issues involved.

Cushing of Gettysburg Kent Masterson Brown 2014-04-23 This Civil War biography chronicles the life of the brave Union artillery officer who refused to retreat from Pickett's Charge at the Battle of Gettysburg. Lieutenant Alonzo Hereford Cushing may be the most famous lieutenant to be killed during the Civil War. Two years out of West Point, the young artillery officer commanded Battery A of the 4th US Artillery at Gettysburg. Despite severe wounds, Cushing defended his position at Cemetery Ridge against the fearsome Confederate infantry assault. The story of Cushing's heroic final moments were witnessed and recorded by a battlefield correspondent for The New York Times, who said "the gallantry of this officer is beyond praise." In 2014, President Barack Obama awarded Cushing a posthumous Medal of Honor. In this biography, Kent Brown presents a lively narrative based on extensive research, including a cache of Cushing's letters.

Field Gun Jack Versus The Boers Tony Bridgland 1997-09-05 War broke out in 1899 between the British and South African settlers of Dutch

descent, the Boers, or Afrikaners as they are usually called today. Despite previous clashes, the British seriously underestimated their opponents. Although dressed in battered civilian clothes and made up entirely of volunteers, Boer troops were all mounted on horses and had very up-to-date German rifles. An even more unpleasant surprise than the mounted riflemen were the Boer artillery units. They were the only Boer troops to wear uniforms, were organized on a full-time basis, and were equipped with excellent German field pieces. The British artillery soon found itself out-gunned and out-ranged. Some British officers, however, were capable of adapting to the new conditions in South Africa. Royal Naval vessels anchored off the Cape had powerful, long-range cannons. It was decided to try bringing these guns ashore and mounting them on improvised carriages for field use. Naval infantry brigades had served in some previous campaigns, and proved capable of accompanying the army as gun crews, their straw hats and naval leggings identifiable in many wartime photographs. Although they were depicted in many wartime drawings and photographs, no serious study of the naval artillery has ever been done. Tony Bridgland has spent many years researching the topic and has produced a study of the technical problems involved in this unique operation, as well as a colourful narrative of naval personnel pressed into hazardous service far from the sea.

Guns Up! Johnnie Clark 2011-02-02 THIS GUT-WRENCHING FIRSTHAND ACCOUNT OF THE WAR IS A CLASSIC IN THE ANNALS OF VIETNAM LITERATURE. "Guns up!" was the battle cry that sent machine gunners racing forward with their M60s to mow down the enemy, hoping that this wasn't the day they would meet their deaths. Marine Johnnie Clark heard that the life expectancy of a machine gunner in Vietnam was seven to ten seconds after a firefight began. Johnnie was only eighteen when he got there, at the height of the bloody Tet Offensive at Hue, and he quickly realized the grim statistic held a chilling truth. The Marines who fought and bled and died were ordinary men, many still teenagers, but the selfless bravery they showed day after day in a nightmarish jungle war made them true heroes. This new edition of *Guns Up!*, filled with photographs and updated information about those harrowing battles, also contains the real names of these extraordinary warriors and details of their lives after the war. The book's continuing success is a tribute to the raw courage and sacrifice of the United States Marines.

The Lives of Guns Jonathan Obert 2018-09-03 Guns have never been as prevalent in American culture as they are at this moment. Most contemporary conversations on guns either highlight the gun as just a tool used in mass killings or a right to be fiercely defended; eventually, whatever progress these debates foster in the public conversation tend

to halt altogether once the old cliché, "guns don't kill people; people kill people" is trotted out. These gun control and gun violence discussions take the gun as passive object, ignoring the changing effects, and the very agency, that guns may deploy as politicized objects. What happens if we reset the conversation and admit that guns, and not the people behind them, kill people? *The Lives of Guns* offers a new and compelling way of thinking about the role of the gun in our social and political lives. In gathering ideas from law, science studies, sociology, and politics, each chapter turns the stale, standard gun conversations around by investigating the gun as an object with agency. In approaching guns from a technological perspective, down to the very science of how they are created and how they fire, *The Lives of Guns* takes up a number of questions, such as: How does the presence of these objects shape civic ideology? What does it mean to develop and care for gun and gun accessories technology? What do guns mean to those who build them versus those who fight for-and against-them? What could happen when drone technology meets gun technology? In bringing together fresh perspectives from leading lawyers, political scientists, and historians, *The Lives of Guns* promises to move the gun debate forward by opening up new ways of thinking about these issues and broadening the scope of these perennial debates.

Outgunned Peter Harry Brown 2010-06-15 Ours is a nation in the grip of a strange kind of mania. Why after President Reagan was shot was there virtually no handgun legislation? Why after the Columbine massacre in Littleton, Colorado, was nothing done to regulate the tools that children most frequently use to kill one another? Why was there no legislative response after a six-year-old in Flint, Michigan, shot a classmate with a .32 caliber "pocket rocket"? Tragedy follows tragedy, with twelve children shot dead every day in America, but guns remain less regulated than automobiles. Why? As authors Peter Harry Brown and Daniel G. Abel in this powerful book demonstrate, it is because of the terrible power of the gun coalition. *Outgunned* begins with the story of Wendell Gauthier, the "master of disaster" attorney, who brought down the tobacco industry to the tune of billions and then turned his attention to guns. He struck fear into the hearts of the gun manufacturers as he set out to make gunmakers bear some liability for the killings caused by the often poorly made, inaccurate handguns they marketed to criminals. Coauthor Daniel G. Abel worked for Gauthier, along with other attorneys, as the gun-control campaign gathered momentum. This legal initiative seemed to be about to make history and change the face of violence in America, but sadly, Wendell Gauthier died of cancer before meaningful gun control could be established. More than thirty class-action suits against gun manufacturers now languish in courtroom paralysis while as many Saturday night specials as ever are being made. What happened? Brown and Abel demonstrate how the pro-gun forces once again curbed the will of a nation. This book shows the enormous power of the NRA -- how it killed pending legislation in Congress, hijacked the Campaign Act to fund the George W. Bush presidential election victory, and eviscerated the American Shooting Sports Council. That association and the gun manufacturers actually wanted to compromise and agree to new handgun laws, implicitly accepting some liability, but the NRA leadership, with Charlton Heston as their president, crushed them. In *Outgunned*, Brown and Abel uncover how NRA lobbyists were instrumental in stopping Smith & Wesson in its tracks. They show how the tendrils of the NRA reach into the Christian Alliance and Republican Party, and how men like John McCain have fought back and been undermined. *Outgunned* reveals how the NRA began dealing with President George W. Bush when he was still governor of Texas -- prodding him into signing a shocking prohibition against the kind of suits Gauthier brought against the gun manufacturers. *Outgunned* is the story of a legal crusade with up-close accounts of the people who fought every step of the way. For those who believe in the importance of stopping unnecessary bloodshed, this book is essential, powerful, and urgent.
