Four Comedies Plautus 2008-04-17 Plautus was

the single greatest influence on Western comedy. Shakespeare's *Comedy of Errors* and Molière's *The Miser* are two subsequent classics directly based on Plautine originals. Plautus himself borrowed from the Greeks, but his jokes, rapid dialogue, bawdy humour, and irreverent characterizations are the original work of an undisputed genius. The comedies printed here show him at his best, and professor Segal's translations keep their fast, rollicking pace intact, making these the most readable and actable versions available. His introduction considers Plautus' place in ancient comedy, examines his continuing influence, and celebrates his power to entertain. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

The World Map, 1300-1492 Evelyn Edson 2007-07-15 A history of the development of world maps during the later medieval period in the centuries leading up to Columbus's journey. In the two centuries before Columbus, mapmaking was transformed. *The World Map, 1300-1492* investigates this important, transitional period of mapmaking. Beginning

with a 1436 atlas of ten maps produced by Venetian Andrea Bianco, Evelyn Edson uses maps of the fourteenth and fifteenth centuries to examine how the discoveries of missionaries and merchants affected the content and configuration of world maps. She finds that both the makers and users of maps struggled with changes brought about by technological innovation?the compass, quadrant, and astrolabe?rediscovery of classical mapmaking approaches, and increased travel. To reconcile the tensions between the conservative and progressive worldviews, mapmakers used a careful blend of the old and the new to depict a world that was changing?and growing?before their eyes. This engaging and informative study reveals how the ingenuity, creativity, and adaptability of these craftsmen helped pave the way for an age of discovery. "A comprehensive and complex picture of the changing face of medieval geography. With the mastery of a formidable palette of historiographic knowledge and well-reasoned discussions of the sources, *The World Map, 1300-1492* will certainly remain an important work to consult for both medieval and early modern scholars for many years to come." —Ian J. Aebel, *Terrae Incognitae*

Mapping Travel Jordana Dym 2021-08-30

Drawing on a thousand years of European travel writing and mapmaking, Dym suggests that after centuries of text-based itineraries and on-the-spot directions guiding travelers and constituting their reports, maps in the fifteenth century emerged as tools for Europeans to support and report the results of land and sea travel. With each succeeding generation, these linear journey maps have become increasingly common and complex, responding to changes in forms of transportation, such as air and motor car 'flight' and print technology, especially the advent of multi-color printing. This is their story.
