The Routledge Handbook of Korean Interpreting Riccardo Moratto 2023-10-23 Professor Riccardo Moratto and Professor Hyang-Ok Lim bring together the most authoritative voices on Korean interpreting. The first graduate school of interpretation and translation was established in 1979 in South Korea. Since then, not only has the

interpretation and translation market grown exponentially, but so too has research in translation studies. Though the major portion of research focuses on translation, interpretation has not only managed to hold its own, but interpretation studies in Korea have been a pioneer in this field in Asia. This handbook highlights the main interpretation research trends in South Korea today, including case studies of remote interpreting during the Covid-19 pandemic, Korean interpreting for conferences, events, and diplomacy, and research into educating interpreters effectively. An essential resource for researchers in Korean interpreting, this handbook will also be very valuable to those working with other East Asian languages.

Chinese Poetic Writing Francois Cheng

2017-03-28 The most innovative study of Chinese poetry ever written, François Cheng's Chinese Poetic Writing--now in its first expanded, English-language edition--is an essential read for fans and scholars of Chinese literature and the art of poetry in general. Since its first publication in French in 1977, Chinese Poetic Writing has been considered by many to be the most innovative study of Chinese poetry ever written, as well as a profound and remarkable meditation on the nature of poetry itself. As the American poet Gustaf Sobin wrote, two years after the book's appearance, "In France it is already considered a model of interdisciplinary research, a source book, and a 'star' in the very

space it initially explored, traced, and elaborated.” Cheng illustrates his text with an annotated anthology of 135 poems he has selected from the Tang dynasty, presented bilingually, and with lively translations by Jerome P. Seaton. It serves as a book within the book, and an excellent introduction to the golden age of Tu Fu, Li Po, Wang Wei, and company. The 1982 translation, long out of print, was based on the first French edition. Since then, Cheng has greatly expanded the book. This is the first English-language edition of the expanded version, with the original translators returning to accommodate the many new additions and revise their earlier work.

Essential Texts in Chinese Medicine Richard

Bertschinger 2014-12-21 In this selection of core texts, Richard Bertschinger presents a commentary and translation of the key writings for students and practitioners of Chinese medicine in the 21st century from the ancient, definitive set of books on Chinese medicine, the Huangdi Neijing or 'the Yellow Emperor's Medical Classic'. Bertschinger selects the key sections of the long and often impenetrable Huangdi Neijing that are vital for students and practitioners to know and understand for

practice today, and provides an accessible view of these fundamental writings which remain central to all traditional approaches to medicine in China. Taking eminent Ming doctor and scholar Li Zhongzi's selection of texts as a basis, he also includes a number of additional texts from the Huangdi Neijing on topics such as the spirit in treatment, a resonance with nature, the art of needling, and the Five Elemental body and personality types, thus ensuring the relevance of this core set of information for students and practitioners of acupuncture and traditional Chinese medicine today.

Women and the Literary World in Early Modern China, 1580-1700 Daria Berg

2013-07-24 Exploring the works of key women writers within their cultural, artistic and socio-political contexts, this book considers changes in the perception of women in early modern China. The sixteenth century brought rapid developments in technology, commerce and the publishing industry that saw women emerging in new roles as both consumers and producers of culture. This book examines the place of women in the cultural elite and in society more generally, reconstructing examples of particular women's personal experiences, and retracing the changing roles of women from the late Ming to the early Qing era (1580-1700). Providing rich detail of exceptionally fine, interesting and engaging literary works, this book opens fascinating new windows onto the lives, dreams, nightmares, anxieties and desires of the authors and the world out of which they emerged.

Ancient Sichuan and the Unification of China

Steven F. Sage 1992-01-01 Recent archaeological finds in China have made possible a reconstruction of the ancient history of Sichuan, the country's most populous province. Excavated artifacts and newly recovered texts can now supplement traditional textual materials. Combing these materials, Sage shows how Sichuan matured from peripheral obscurity to attain central importance in the formation of the Chinese empire during the first millennium B.C.

The Treatment of Modern Western Medical Diseases with Chinese Medicine Bob Flaws 2001 This book is a textbook and clinical manual on the treatment of modern Western medical diseases with Chinese medicine. By modern Western medical diseases, we mean all the disease categories of Western medicine excluding gynecology and pediatrics. By Chinese medicine, we mean standard contemporary professional Chinese medicine as taught at the two dozen provincial Chinese medical colleges in

the People's Republic of China. The two main therapeutic modalities used in the practice of this style of Chinese medicine are acupuncture-moxibustion and the internal administration of multi-ingredient Chinese medicinal formulas. Treatment plans for each disease discussed herein are given for each of these two main modalities.

A Frontier Made Lawless Joseph Lawson 2017-10-06 In the nineteenth and early twentieth centuries, the region of Liangshan in southwest China was plagued by violence. Indigenous Nuosu communities clashed with Han migrants, the Qing and Republican states, and local warlords. The first English-language history of Liangshan, *A Frontier Made Lawless* challenges the view that ongoing violence was the result of population pressures, opium production, and the growth of local paramilitary groups. Instead, Joseph Lawson argues that the conflict resulted from the lack of a common framework for dealing with property disputes,

compounded by the repeated destabilization of the region by turmoil elsewhere in China. Controlling Diabetes Naturally with Chinese Medicine Lynn M. Kuchinski 1999 Chinese medicine is the oldest continually practiced professional medicine in the world, and Chinese doctors have recognized diabetes as a distinct clinical condition for 2,000 years. Their research has yielded a wealth of low-cost, noninvasive, natural methods of treatment. Beginning with an overview of Chinese medical theory, this book explores the patterns of imbalance that are used to diagnose diabetes. Also discussed are professional methods of treatment, including acupuncture and herbal medicine, and traditional home remedies, such as Chinese teas and self-massage. Special attention is paid to the role of diet, exercise, and relaxation to the prevention and treatment of diabetes.

Curing Arthritis Naturally with Chinese Medicine Douglas Frank 1997 Chinese medicine has been relieving arthritis for 2,000 years by

balancing the body and allowing its healing powers to take over. This guide provides a basic introduction to how Chinese medicine aids in the diagnosis and treatment of arthritis, including Chinese self-care and home remedies, such as self-massage, magnet therapy, and Chinese patent medicines.
