Home Health Aide Training Manual and Handbook

Emmanuel C. Anene 2009-03 It is my hope that this text, when properly used will be of great benefit to the individual aide or aide in training in mastering the required skills that would make the individual a good home health aide. The book has been specially tailored as a teaching tool for home health aides. The book has two sections, the tutorial section one and the practical hands on section two. The second section is a good aide or good training tool for practical demonstration purposes. For the purpose of understanding only, a home health aide does not have to be a Certified Nurses Aide. As a result this book can be used to train and prepare an individual to function in the capacity of a home health aide. The agency must prepare a set of

standardized tests for the aides to ensure that the individual have fully internalized the reaching and training that they have been put through. This book further addresses the rule and regulation (federal and State) that the home health aide must be familiar with. This book is an excellent tool for the home health aide. I strongly encourage all individual who practice and plans to practice as an aide in the home health field to read this book.

Caring with Confidence Reba Bhaduri 2002

The Foster Carer's Handbook Ann Wheal 2012 Acclaimed across three previous editions, this handbook covers British practice aspects of foster care for care providers of children up to 11 years old, including children with special needs. Primarily for foster carers, but also useful in residential care,

the book is packed with detailed guidance about looking after children, being looked after, being a foster carer, and living in a fostering household. It is designed to: encourage carer providers to work in partnership with the children and their families * enable children to return to their families when appropriate * enable carer providers to meet the full range of a child's needs * explain the fostering roles and responsibilities.

Although there are differences in detail, the governments of England, Scotland, Wales, and Northern Ireland all make similar requirements of carers. The Foster Carer's Handbook will help all carer providers achieve the expectations placed on them and assist them to maintain standards. This fourth edition underlines and encourages the use of relevant government standards and gives examples of good practice. A comprehensive guide that can be called on when just about anything arises, the book has been developed for carer providers

to read themselves along with the children they are caring for as well as their own children; to help carers make appropriate decisions and answer the many questions children may ask about their time 'being looked after'; for use as a 'talking tool,' including activities to help children understand the present, face the future with confidence, and, in time, make their own decisions about their life; for use in supervision and training

The material has been developed to provide information on working practices and risk control

procedures within a care environment. The handbook is designed to be used as a reference document together with legislation, organisational policies and procedures that include: Codes of practice and conduct, standards and guidance relevant to your own role and the roles, responsibilities, accountability and duties of others. Legal and organisational requirements on health and safety, equality, diversity and anti-discrimination practice. This will enable you to work with service users and others to improve your knowledge and skills and address dilemmas and conflicts that you may face in your workplace.
