Section Two describes surveillance systems based on logical program areas such as foodborne illnesses, vector-borne diseases, sexually transmitted diseases, viral hepatitis healthcare and transplantation associated infections. Attention is devoted to programs for monitoring unexplained deaths, agents of bioterrorism, mass gatherings, and disease associated with international travel. Sections Three and Four explore the uses of the Internet and wireless technologies to advance infectious disease surveillance in various settings with emphasis on best practices based on deployed systems. They also address molecular laboratory methods, and statistical and geospatial analysis, and evaluation of systems for early epidemic detection. Sections Five and Six discuss legal and ethical considerations, communication strategies and applied epidemiology-training programs. The rest of the chapters offer public-private partnerships, as well lessons from the 2009-2010 H1N1 influenza pandemic and future directions for infectious disease surveillance.

Adult Infectious Disease Bulletpoints Handbook
Robert Gullberg 2021-01-25 Because of his years of experience, Dr. Gullberg knows the best format for learning regarding a core of Infectious Disease topics. Bullet points are a very effective method. Dr. Gullberg has

handpicked the twenty most common areas in the field of Infectious Diseases that students must study. The book will be a very handy reference for clinical learning, National Boards, and PANCE testing. The resources for this text are too numerous to count, and many are the physicians and colleagues who have mentored Dr. Gullberg over the last 30 years. Robert M. Gullberg M.D., F.A.C.P., is from Park Ridge, Illinois and was educated at Northwestern University with a degree in inorganic Chemistry. He attended the University of Illinois Medical School, graduating in 1981, followed by internship and residency in Internal Medicine at the Evanston Hospital, then affiliated with Northwestern University Medical School. He had excellent training there under the tutelage of Dr. Steven Kurtides, Chief of Medicine. His residency was followed by a Fellowship in Infectious Diseases at Northwestern University in Chicago, Illinois where he was mentored by Dr. John Phair. Dr. Gullberg is double boarded in Internal Medicine and Infectious Disease and is an Adjunct Professor of Clinical Medicine/Infectious Disease. A Rational Approach to Clinical Infectious Diseases Zelalem Temesgen 2020-12-15 Written specifically for non-infectious disease specialists in both inpatient and outpatient settings, *A Rational Approach to Clinical Infectious Diseases* provides concise, practical guidance that mimics the decision-making process and reasoning employed by an ID physician. Using clear, understandable language, Dr. Zelalem Temesgen and his esteemed colleagues at the Mayo Clinic present the art and the context of infectious diseases together with the science, helping non-specialists apply a rational approach to the diagnosis and treatment of infectious conditions. Clearly explains the rationale of opting for one particular treatment or length of course over another in order to arrange appropriate management and follow-up. Provides focused ID decision support to questions such as: What diagnostic test should I order? What is the correct antibiotic for this patient/geographical region? Are IV or oral antibiotics most appropriate? How long should the antibiotic course be and when should it be de-escalated? What special considerations should be taken in immunocompromised patients? How often should complex infections be followed up? Uses a succinct, easy-to-read writing style, following a consistent format: Important characteristics/epidemiology; Clinical related data; Rash characteristics; Ancillary diagnostic studies; Treatment; and Other. Provides visual and quick-reference support with dozens of figures and tables throughout the text.
