A Bibliography of Writings on Varieties of English, 1965-1983 1984-01-01 After the growth of English and American dialectology since the 1930's and the expansion of sociolinguistics since the 1960's, the study of 'world English' has emerged in recent years to join these other disciplines. This bibliography is intended to reflect what has been achieved in this area and to serve as an indispensable

research tool for further investigations. The bibliography is divided into three parts, each one is preceded by a preface which explains the procedures followed and each of the sections is followed by an index. It classifies the items according to specific areas, ethnic groups, or similar topics.

Queensland Canefields English of the Late Nineteenth Century Thomas Edward Dutton 1980 Material collected at Ayr; includes historical background; six texts by T. Lammon and P. Santo; analysis of phonology, grammar, vocabulary; comparison with other varieties of pidgin.

Borrowing Jan Tent 2004 In recent years, there has been a resurgence of interest in linguistic borrowing, especially with regard to its importance in the reconstruction of pre-history.

However, the general literature on borrowing has been based on a somewhat restricted range of data, tending to concentrate on the languages of Europe or the Americas. The Pacific has not figured prominently in such discussions. Linguists and anthropologists have long considered the Pacific to be a kind of laboratory because the geographical discreteness of its cultures allows clearer inferences to be made than are usually possible in a continental situation. Borrowing in the Pacific is relatively easy to identify and stratify. Its study is, therefore, especially useful in the reconstruction of the linguistic, social and cultural history. The scope of this volume is not solely restricted to borrowing in Oceanic languages, but includes two papers on borrowing in Fiji Hindi and Fiji English. Authors have been encouraged to address general issues of borrowing from the perspective of data they have derived from their fieldwork, thus avoiding the risk of producing a series of largely similar

contributions. The volume also includes a number of seminal and authoritative papers on Pacific borrowing that have been previously published.

Bibliographie de l'Océanie 1972

Still More Englishes Manfred Görlach

2002-05-31 This monograph comprises eight papers, most of which originated as presentations given at international conferences or guest lectures. These papers deal with the problematic nature of English as a global language, and discuss what makes texts authentic and reliable for linguistic analysis, Scots in Ulster and in Scotland, forms and functions of English in Southeast Asia, the spread of rhyming slang, and varieties of ELT. The volume concludes with an annotated bibliography of the most important publications devoted to varieties of English around the world.

New Guinea and Neighboring Areas Stephen A. Wurm 2019-11-18 The Contributions to the Sociology of Language series features

publications dealing with sociolinguistic theory, methods, findings and applications. It addresses the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches - theoretical and empirical - supplement and complement each other. The series invites the attention of scholars interested in language in society from a broad range of disciplines - anthropology, education, history, linguistics, political science, and sociology. Beach-la-Mar to Bislama Terry Crowley 1990

Bislama is the variety of Melanesian Pidgin spoken in Vanuatu (formerly New Hebrides). In

this learned study, Crowley traces the history and development of Bislama from the 1840s to the present. Drawing on written records and other historical sources, he examines the language's labor history, and discusses the evolution of its grammatical construction.

Legacies of Colonial English Raymond Hickey

2005-02-24 As a result of colonization, many varieties of English now exist around the world. Originally published in 2005, *Legacies of Colonial English* brings together a team of internationally renowned scholars to discuss the role of British dialects in both the genesis and subsequent history of postcolonial Englishes. Considering the input of Scottish, English and Irish dialects, they closely examine a wide range of Englishes - including those in North and South America, South Africa, Asia, Australia and New Zealand - and explain why many of them still reflect non-standard British usage from the distant past. Complete with a checklist of dialect

features, a detailed glossary and set of general references on the topic of postcolonial Englishes, this book will be an invaluable source to scholars and students of English language and linguistics, particularly those interested in sociolinguistics, historical linguistics and dialectology.

A New Bislama Dictionary Terry Crowley 2003

"A new Bislama dictionary is a substantially updated version of the first edition, which reflects the ever-changing vocabulary of Bislama, the national language of Vanuatu."-- Back cover.

Melanesian Pidgin and Tok Pisin John W.M.

Verhaar, S.J. 1990-01-01 The First International Conference on Pidgins and Creoles in Melanesia was planned mainly for Tok Pisin, but no predetermined theme(s) had been proposed to the participants. Nevertheless, in this collection of papers several principal themes stand out. One is that of a revived interest in substratology, both for Tok Pisin and for Bislama. Another is what in fact amounts to a change in perspective

from universalism, as supposedly competitive with the substratological orientation, towards a generalist approach to typology, which reduces the apparent polarity, from a theoretical point of view. A third is the pervasive interest of contributors in wider language issues in the social and political life of Papua New Guinea. These interests go back to the linguistic and social experience of the participants, most of whom have a long record of living among the people whose languages they have studied on a day-to-day basis, and to the relative remoteness of their inspiration from the more theoretical and perhaps ultimately untestable issues which surround the universalist approach and its claims for a bioprogram foundation for language.

Bislama Reference Grammar Terry Crowley
2004-05-31 Bislama is the national language of
Vanuatu, the world's most linguistically diverse
nation with at least 80 actively spoken Oceanic
languages used by about 200,000 people.
Bislama began as a plantation pidgin based on
English in the nineteenth century, but it has
since developed into a unique language with a
grammar and vocabulary very different from
English. It is one of very few national languages

for which there is no readily available reference
grammar. This book aims to fill this gap by
providing an extensive account of the grammar
of Bislama as it is used by ordinary Ni-Vanuatu.
It does not, therefore, aim to describe any kind
of artificial written norm but sets out to capture
a range of different kinds of ways that Ni-
Vanuatu will say things in various contexts, both
written and spoken, formal and informal. The
thrust of this volume is to show that Bislama has
a grammar—an unfamiliar concept for those
educated in Vanuatu. It also shows that Bislama
is a language of considerable complexity, which
will come as a surprise to many of its users, who
have been taught to view their language as
somehow "simple" and even "deficient."

The Genesis of Grammar Bernd Heine
2007-10-04 This book reconstructs what the
earliest grammars might have been and shows
how they could have led to the languages of
modern humankind. It considers whether these
languages derive from a single ancestral

language; what the structure of language was when it first evolved; and how the properties associated with modern human languages first arose.

Language Complexity Matti Miestamo 2008 Language complexity has recently attracted considerable attention from linguists of many different persuasions. This volume □ a thematic selection of papers from the conference Approaches to Complexity in Language, held in Helsinki, August 2005 □ is the first collection of articles devoted to the topic. The sixteen chapters of the volume approach the notion of

language complexity from a variety of perspectives. The papers are divided into three thematic sections that reflect the central themes of the book: Typology and theory, Contact and change, Creoles and pidgins. The book is mainly intended for typologists, historical linguists, contact linguists and creolists, as well as all linguists interested in language complexity in general. As the first collective volume on a very topical theme, the book is expected to be of lasting interest to the linguistic community.

Melanesian Pidgin and the Oceanic Substrate

Roger M. Keesing 1988 Topics in this volume include: interlingual contact in the Pacific to the mid-19th century; the Sandalwood period; the Tok Pisin language; oceanic Austronesian languages; structures and sources of pidgin syntax; the pidgin pronominal system; and calquing - pidgin and Solomons languages.

The Linguistics of Sitting, Standing and Lying

John Newman 2002-09-24 This volume explores properties of 'sit', 'stand', and 'lie' verbs,

reflecting three of the most salient postures associated with humans. An introductory chapter by the Editor provides an overview of directions for research into posture verbs. These directions are then explored in detail in a number of languages: Dutch; Korean; Japanese; Lao; Chantyal, Magar (Tibeto-Burman); Chipewyan (Athapaskan); Trumai (spoken in Brazil); Kxoe (Khoisan); Mbay (Nilo-Saharan); Oceanic; Enga, Ku Waru (Papuan); Arrernte, Pitjantjatjara, Ngan'gityemmerri (Australian). The contributors discuss data relevant to many fields of linguistic inquiry, including patterns of lexicalization (e.g., simplex or complex verb forms), morphology (e.g., state vs. action formations), grammaticalization (e.g., extension to locational predicates, aspect markers, auxiliaries, copulas, classifiers), and figurative extension. A final chapter reports on an experimental methodology designed to establish the relevant cognitive parameters underlying speakers' judgements on the polysemy of

English stand. Taken together, the chapters provide a wealth of cross-linguistic data on posture verbs.

Language Description, History and

Development Jeff Siegel 2007-03-14

This volume in memory of Terry Crowley covers a wide range of languages: Australian, Oceanic, Pidgins and Creoles, and varieties of English. Part I, Linguistic Description and Typology, includes chapters on topics such as complex predicates and verb serialization, noun incorporation, possessive classifiers, diphthongs, accent patterns, modals in Australian English and directional terms in atoll-based languages. Part II, Historical Linguistics and Linguistic History, ranges from the reconstruction of Australian languages, to reflexes of Proto-Oceanic, to the lexicon of early Melanesian Pidgin. Part III, Language Development and Linguistic Applications, comprises studies of

lexicography, language in education, and language endangerment and language revival, spanning the Pacific from South Australia and New Zealand to Melanesia and on to Colombia. The volume will whet the appetite of anyone interested in the latest linguistic research in this richly multilingual part of the globe.
