**Handbook of Career Development** Gideon Arulmani 2014-02-08 This book is focused on work, occupation and career development: themes that are fundamental to a wide range of human activities and relevant across all cultures. Yet theorizing and model building about this most ubiquitous of human activities from international perspectives have not been vigorous. An examination of the literature pertaining to career development, counseling and guidance that has developed over the last fifty years reveals theorizing and model building have been largely dominated by Western epistemologies, some of the largest workforces in the world are in the developing world. Career guidance is rapidly emerging as a strongly felt need in these contexts. If more relevant models are to be developed, frameworks from other cultures and economies must be recognized as providing constructs that would offer a deeper understanding of career development. This does not mean that existing ideas are to be discarded. Instead, an integrative approach that blends universal principles with particular needs could offer a framework for theorizing, research and practice that has wider relevance. The central objective of this handbook is to draw the wisdom and experiences of different cultures together to consider both universal and specific principles for career guidance and counseling that are socially and economically relevant to contemporary challenges and issues. This book is focused on extending existing concepts to broader contexts as well as introducing new concepts relevant to the discipline of career guidance and counseling.

*Handbook of Innovative Career Counselling* Jacobus G. Maree 2019-07-20 This book examines a topic widely regarded as the most pressing in career counselling today, i.e., how to ensure that everyone receives career counselling and that all workers have the opportunity to engage in sustainable, decent work. The author holds that career counselling should not only advance workers' self- and career construction, helping them design successful career-lives and make social contributions, and live purposeful lives - it should also expound new theoretical approaches and interventions. Furthermore, the book criticizes global society for overlooking the basic needs of many workers, especially the most vulnerable and disadvantaged. An important feature of the book is its emphasis on promoting a creative and innovative approach to career counselling so as to better answer contemporary career-related questions. It offers guidance on how to advance entrepreneurship and help workers develop critical thinking, curiosity, creativity, collaboration,

and communication skills. In this way the book promotes innovation in career counselling and maps the way forward in a theoretical and practical manner that helps clients 'flourish' rather than merely 'survive' in turbulent times impacted by the fourth wave in psychology, career counselling, the economy, as well as the 4th industrial revolution (Work 4.0).

**Career Counseling for Women** W. Bruce Walsh 1994 Social trends over the past 25 years strongly indicate the significance of occupational pursuits in the plans and lives of women. In the future, most women will work outside the home and this work will play an increasingly important role in their lives. The U.S. Bureau of Labor Statistics (1989) estimates that by the year 2000, the labor force is expected to grow 18% -- an increase of 21 million workers. It is also estimated that women and minorities will account for a large percentage of that growth. A significant question that needs to be asked is how will counselors help women prepare for making career choices in the future? The models, strategies, methods and information on career counseling described and elaborated in this volume may help to show the way. Devoted to presenting important advances and new information in the field of career counseling for women, this book focuses primarily on identifying, reporting, and evaluating significant applied developments in the field -- counseling theories, concepts, and techniques utilized in career planning and decision making for women. It is an ideal collection for counselors, counseling and industrial psychologists, management scientists focusing on career counseling, and sociologists specializing in women and work.
