Dermatology Daniel Ogunjumo 2016-01-12 The trainees in emergency medicine have a lot to learn, know, and remember, while the trained practitioners of emergency medicine have a lot of already learned facts to remember and update from time to time because emergency medicine is concerned with the multitude of injuries and acute illnesses that can afflict mankind. The acquisition and the retention of the requisite knowledge entail, among other means, extensive and repeated reading and studying the facts contained in the often voluminous textbooks, numerous journals, and monographs. The volume of materials to be read and studied may be intimidating, necessitating the need to "filter out" and learn the essential facts from the "verbiage" of the write-ups in authoritative textbooks and journals.
