Sensors in Science and Technology Ekbert Hering 2022-01-21 Sensors are used to measure physical, chemical and biological quantities. The book offers a comprehensive overview of physical principles, functions and applications of sensors. It is structured according to the fields of activity of sensors and shows their application by means of typical examples. Measured variables that can be recorded by sensors are e.g. mechanical, dynamic, thermal, electrical and magnetic. Furthermore, optical and acoustical sensors are discussed in detail in the book. The sensor signals are recorded, processed and converted into control signals for actuators. Such sensor systems are also presented.

Conversations of German Refugees ; Wilhelm Meister's Journeyman Years, Or, The Renunciants

Johann Wolfgang von Goethe 1995-11-05 Goethe was a master of the short prose form. His two narrative cycles, *Conversations of German Refugees* and *Wilhelm Meister's Journeyman Years*, both written during a high point of his career, address various social issues and reveal his experimentation with narrative and perspective. A traditional cycle of novellas, *Conversations of German Refugees* deals with the impact and significance of the French Revolution and suggests Goethe's ideas on the social function of his art. Goethe's last novel, *Wilhelm Meister's Journeyman Years*, is a sequel to *Wilhelm Meister's Apprenticeship* and to *Conversations of German Refugees* and is considered to be his most remarkable novel in form.
