Collection Care/Sammlungspflege Gabriela Krist 2015-05-21 Prevention is an attempt to look into the future and have a positive influence on it - therefore it is one of the most important aspects in the area of collection care, the central, current field of applied research in conservation and restoration. With sustainability damage and loss are avoided, dangers averted and research conducted. Collection care is only successful, if the theory is appropriately implemented in museum practice.

**Hollstein's German Engravings, Etchings and Woodcuts** 1979

*From the Clarinet D'Amour to the Contra Bass* Albert R. Rice 2009-03-31 Following his much-acclaimed *The Baroque Clarinet* and *The Clarinet in the Classical Period*, Albert R. Rice now turns his signature detailed attention to large clarinets - the clarinet d'amour, the basset horn, the alto clarinet, bass and contra bass clarinets. Each chapter is devoted to a specific instrument, and offers a fascinating insider's look at its defining characteristics, a comprehensive history of its evolution, meticulously-researched information on its makers and aspects of construction, and a thorough discussion of its music. Rice illustrates how the introduction of large clarinets into chamber ensembles, wind bands, and opera orchestras was the result of experiments meant to address specific musical needs. Along the way, he brings to life the musicians, virtuosos, soloists, and orchestral and band musicians, as well as the instruments' makers and the composers from J. C. Bach to Smetana who wrote for them. Based on careful study of primary sources - musical compositions, patents, memoirs and diaries, and unfettered access to historical instruments themselves--Rice's expert presentation is nothing short of exhaustive. *From the Clarinet d'Amour to the Contrabass* will engage all who love the clarinet and its music.

*André Charles Boulle, 1642-1732* André-Charles Boulle 2011 One of the 17th century's most influential craftsmen is showcased in this monograph, highlighting the work of André Charles Boulle. The study reveals how the man renowned as the preeminent artist of marquetry--the art of applying pieces of veneer to fashion decorative patterns--gave birth to a new aesthetic through his chosen medium. Boulle's level of refinement is illustrated, portraying an execution that was unique in his time, earning him the title of Ebéniste Ciseleur et Marqueteur du Roi--Cabinetmaker, Carver, and Marqueter King--as well as the envy of crowned heads, princes, and rich collectors throughout Europe. The artist's innovative genius in spatial conception, rare and pioneering mastery of gilt bronze, and marquetry using the rarest materials are all celebrated in detail. Recollecting the century of Louis XIV and Peter the Great, this history reflects on the genesis of many attributes of modernity that were to flourish in later years.

Modernity and the Second-Hand Trade J. Stobart 2010-11-30 Bringing together the latest research on the neglected area of second-hand exchange and consumption, this book offers fresh insights into the buying and selling of used goods in western-Europe during the eighteenth and nineteenth centuries, and seeks to re-examine and redefine the relationship between modernity and the second-hand trade.

**Political Landscape** Martin Warnke 2013-06-01 We all know what "the political landscape" is, and politicians and journalists never tire of referring to it. But in this ingenious and original book, Martin Warnke takes that well-worn metaphor literally and uses it to reveal just how politicized the real landscape of continental Europe has been for centuries. The author finds his evidence of humanity's intervention in nature in the form of monuments and milestones, gardens, roads and border crossings, in landscape paintings and maps - even, in fact, in the anthropomorphic interpretations once given to formations of hills and rocks. The Political Landscape is underpinned with a fascinating array of examples and illustrations, many of which will be new even to experts in

the art of landscape and related disciplines.

*Studying Peoples in the People's Democracies* Mihály Sárkány 2005

Under socialism the anthropological sciences developed under conflicting pressures: on the one hand Soviet influences, Marxist ideology and institutional changes, on the other the continued influence of national traditions and of the distinction between Volkskunde and Volkerkunde. The chapters bring out striking differences between the countries considered: the German Democratic Republic, Poland, Czechoslovakia and Hungary. They also draw attention to variation within countries, and between sub-branches of the discipline. Coverage extends from the Stalinist years to the end of the socialist era, and the topics range from folklore studies at home to fieldwork expeditions abroad.

Some 350 objects from the GRASSI Museum of Applied Arts collections in Leipzig exemplify and document the path taken by Danish design from Skønvike--the Danish variant of Art Nouveau--to the present. This lavishly illustrated book provides a comprehensive survey covering roughly 120 years of the applied arts in Denmark: a multifaceted history that reveals unknown and surprising aspects as well as vibrant icons of modern design.
