Edible Insects Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects

to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many

valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Racing My Father Patrick Smithwick 2006
Becoming a steeplechase jockey takes great courage, especially when following in the footsteps of a legendary father. Growing up, Patrick Smithwick idolized his father, A.P. Smithwick, considered the greatest steeplechase jockey in America at the time. In this compelling memoir, Patrick Smithwick recalls how his father's success shaped his own ambitions and dreams. Despite witnessing the pinnacle of the sport, the younger Smithwick started his own journey without a leg up. He mucked stalls and lived in tack rooms, learning the sport from the bottom up. After his father was severely injured in a racing accident, young Patrick did not sway from pursuing his dream. Though he may not have reached the career heights of his father, Patrick Smithwick succeeded in carving his own

niche as a top steeplechase rider.

The Tears of War May Wedderburn Cannan 2001
May, the daughter of Charles Cannan, Dean of Trinity College, Oxford, met Bevil, the son of Sir Arthur Quiller-Couch, when he came up to Trinity in 1910. When war broke out in 1914, Bevil was sent to France to serve as an Officer in the Royal Artillery. Within days of the Armistice, Bevil asked May to marry him - but tragedy struck. Here is the couple's story told through May's published poetry, with passages from her autobiography and letters from Bevil and his father, interspersed with official war diary extracts. It is a moving account of the melancholy of a war which stole the lives and loves of a generation.

The Organic Machine Richard White 2011-04-01 The Hill and Wang Critical Issues Series: concise, affordable works on pivotal topics in American history, society, and politics. In this pioneering study, White explores the relationship between the natural history of the Columbia River and the human history of the Pacific Northwest for both whites and Native Americans. He concentrates on what brings humans and the river together: not only the physical space of the region but also, and primarily, energy and work. For working with the river has been central to Pacific Northwesterners' competing ways of life. It is in this way that White comes to view the Columbia River as an organic machine--with conflicting

human and natural claims--and to show that whatever separation exists between humans and nature exists to be crossed.

Mission to America Walter Kirn 2006-10-10
Mason LaVerle is a young man on a mission—a mission to save his people’s way of life. Mason was raised in a tiny, isolated Montanan sect, the church of the Aboriginal Fulfilled Apostles. But the Apostles face a dwindling membership, so Mason is sent on an outreach operation to bring back converts—specifically brides. As he discovers shopping malls, fast food, and faster women, the forces of faith and the forces of America collide, leading Mason to the brink of missionary madness.

The History of Wine in 100 Bottles Oz Clarke
2015-05-07 Winemaking is as old as civilization itself and wine has always been more than just a drink. For thousands of years, from its origins in ancient Mesopotamia to its current status as a vast global industry, the history of wine has been directly related to major social, cultural,

religious and economic changes. This fascinating and entertaining book takes a look at 100 bottles that mark a significant change in the evolution of wine and winemaking and captures the innovations and discoveries that have had the biggest impact on the history of 'bottled poetry'. From goatskin to the German Ratskeller casks and invention of the glass wine bottle, from the short onion-shaped bottles of the 1720s to the tall cylindrical bottles of the 1780s, why Bordeaux, Burgundy and Hoch have their own distinctive bottle shape to the distinctive Paul Masson carafe of the 1970s. Other stories cover the first cork-topped bottles to screw caps, bag-in-box, cans and cartons, early wine labels once glue was strong enough, the first wine labels to be produced by a vineyard (and not a merchant as previously) and commissioned artwork by the 20th century's most iconic artists for labels on high-end bottles; historically important and unique bottles: the oldest unopened, the most expensive sold at auction, the rarest; wines from

the oldest vineyard in production, from the driest place on earth, from the highest and lowest vineyards and the most northern and southern. Oz Clarke also writes about the people who have influenced wine through the centuries, from the medieval Cistercian monks of Burgundy who first thought of place as an important aspect of wine's identity, through scientists like Pasteur and Peynaud who improved key technical aspects of winemaking, to 20th-century giants like Robert Mondavi and Robert Parker Jr. Oz also talks about famous vintages, from the 1727 Rudesheimer Apostelwein to the first Montana Marlborough Sauvignon Blanc in 1979 and today's cult wines from Bordeaux and California. The Soil Will Save Us Kristin Ohlson

2014-03-18 Thousands of years of poor farming
and ranching practices—and, especially, modern
industrial agriculture—have led to the loss of up
to 80 percent of carbon from the world's soils.
That carbon is now floating in the atmosphere,
and even if we stopped using fossil fuels today, it
would continue warming the planet. In The Soil

Will Save Us, journalist and bestselling author Kristin Ohlson makes an elegantly argued, passionate case for "our great green hope"—a way in which we can not only heal the land but also turn atmospheric carbon into beneficial soil carbon—and potentially reverse global warming. As the granddaughter of farmers and the daughter of avid gardeners, Ohlson has long had an appreciation for the soil. A chance conversation with a local chef led her to the crossroads of science, farming, food, and environmentalism and the discovery of the only significant way to remove carbon dioxide from the air—an ecological approach that tends not only to plants and animals but also to the vast population of underground microorganisms that fix carbon in the soil. Ohlson introduces the visionaries—scientists, farmers, ranchers, and landscapers—who are figuring out in the lab and on the ground how to build healthy soil, which solves myriad problems: drought, erosion, air and water pollution, and food quality, as well as

climate change. Her discoveries and vivid storytelling will revolutionize the way we think about our food, our landscapes, our plants, and our relationship to Earth.

A Year at the Races Jane Smiley 2005-04-19
NATIONAL BESTSELLER • From the Pulitzer Prize-winning author of *A Thousand Acres* comes an irresistibly smart, witty, and engaging chronicle of a novelist's lifelong obsession with horses. • "Exuberant...witty, completely delightful.... A kind of National Velvet for adults." —San Francisco Chronicle "Every horse story is a love story," writes Jane Smiley, who has loved horses for most of her life and owned and bred them for a good part of it. To love something is to observe it with more than usual attention, and that is precisely what Smiley does in this. In particular she follows a sexy filly named Waterwheel and a grey named Wowie (he "tells" a horse communicator that he wants it changed from Hornblower) as they begin careers at the racetrack. Filled with humor and

suspense, and with discourses on equine intelligence, affection, and character, *A Year at the Races* is a winner.

2023-05-16 Roaring Rory Gallatin's girl...

Daughter of the town trouble-maker... Trailer trash wannabe... Seventeen-year-old Darcy Gallatin has heard it all, especially when the local minister uses her father as a bad example. Everyone knows she's different from the rest of the Gallatin family. She earned a scholarship to prestigious Stewart Falls Academy, is on the honor roll and is a varsity cheerleader. She has a dream nobody can steal. She'll study hard, attend a prominent university, and become a large-animal veterinarian, specializing in horses. Then, she'll return to the small town of Pine Ridge and show everyone what a Gallatin can do. This is her last year at home. Next December she'll be away at college, so she decides to make the holiday season special for her ten-year-old brother. She won't let her father ruin Christmas for the whole family, not again. Disaster strikes

when her dad injures Darcy's horse, Whisky. Can Darcy ever forgive her father, or has he finally crossed the line and made her hate him? Even Darcy doesn't know for sure, but one thing is certain—she needs to change things. And fast. But how?
