Bioethics Gilbert Meilaender 2005 In the face of rapid advances in medical research and treatment, bioethics has become a serious social concern. Originally published in 1996 and later chosen by World magazine as one of the top 100 books of the twentieth century, Gilbert Meilaender's *Bioethics* covers a wide range of pressing bioethical issues and offers discerning guidance on how Christians ought to think about them. In admirably clear language Meilaender discusses abortion, assisted reproduction, genetic advance and prenatal screening, care for the dying and euthanasia, human experimentation, and more. This new edition of his *Bioethics* features updated information throughout, a fuller discussion of human embryos — including stem cell research — and a

thorough rewrite of the chapter on organ donation.

Bioethics Matters Moira McQueen 2009-05-28 A practical guide for Catholics through the controversial field of bioethics Lay people today need to be as educated as possible in catholic teaching in bioethics due to their huge civic responsibilities related to the burning issues of our time such as euthanasia, prenatal genetic diagnosis, and so forth. We read about these issues constantly in the newspapers and see them reported on TV. It can be difficult to keep up to date with developments in these areas, at the same time as staying informed about church teaching regarding them. *Bioethics Matters* is an essential resource for Catholics who are dealing with these medical and end-of-life issues. This succinct guide clearly sets out catholic teaching

on today's most debated issues: stem cell research, reproductive technologies, euthanasia, and much more. By presenting real-life situations, this guide provides readers with examples of catholic ethical decision making in action. The purpose is to show how catholic teaching can help people today navigate their way through tough decisions and choices. The book is divided in to four parts Part 1: Bioethics from a Roman Catholic perspective Part 2: Reproductive technologies Part 3: End-of-life issues Part 4: Catholic teaching on living life until the end

Explorations in Christian Theology and Ethics Michelle J. Bartel 2016-04-22 Engaging variously with the legacy of Paul L. Lehmann, these essays argue for a reorientation in Christian theology that better honours the formative power of the gospel to animate and shape doctrine and witness, as well as ethical and political life. The authors explore key themes in Christian theology and ethics -

forgiveness, discernment, responsibility, spirituality, the present day tasks of theology and the role of faith in public life - making plain the unabated importance of Lehmann's work at this juncture in contemporary theology. The internationally recognized contributors draw crucial connections between the gospel of reconciliation, the form of Christian theology and witness, and the challenges of contemporary ethical and political reflection. This book demonstrates why this close friend of Dietrich Bonhoeffer, and author of *Ethics in a Christian Context* and *The Transfiguration of Politics* continues to influence generations of theologians in both the English-speaking world and beyond.

Forthcoming Books Rose Arny 2002 [Catholic Bioethics and the Gift of Human Life, Third Edition](#) William E. May 2013-07-26 "In this revision of his already classic text, William May shows us once again the wisdom of the Catholic Church's moral tradition in its application to

contemporary bioethics. Illuminating and engaging - and with the attention to nuance that marks all of May's writing." - Edward J. Furton, M.A., Ph.D., Ethicist and Director of Publications, The National Catholic Bioethics Center "Since it was first published, Dr. May's text *Catholic Bioethics and the Gift of Human Life* has served an irreplaceable role in Catholic moral education. His new revision adds clear systematic treatments of several additional issues of pressing moral concern to the Church and society. Catholic educators everywhere will welcome this excellent revision. I welcome it! - E. Christian Brugger, Associate Professor of Moral Theology, Institute for the Psychological Sciences "With so much bioethical thinking supporting the 'culture of death,' I can think of no better champion of a 'culture of life' than Professor William E. May. Professor May has given us a book which is useful not only for its masterful summary of the moral magisterium on bioethics, but also for its treatment of such

issues as contraception, artificial reproduction, the care of the dying, human experimentation, and the definition of death and organ transplants." - Dr. Mark S. Latkovic, Associate Professor of Moral Theology, Sacred Heart Major Seminary What the Church teaches - and why - on issues of euthanasia, in vitro fertilization, genetic counseling, assisted suicide, living wills, persistent vegetative state, organ transplants, and more.

Retrieving the Natural Law J. Daryl Charles 2008-04-14 J. Daryl Charles argues that a traditional metaphysics of natural law lies at the heart of the present reconstructive project, and that a revival in natural-law thinking is of the highest priority for the Christian community as we contend in, rather than abdicate, the public square. Nowhere is this more on display than in the realm of bioethics, where the most basic moral questions--human personhood, human rights versus responsibilities, the reality of moral evil, the basis of civil society--are being

debated. -- from publisher description.

Bioethics, Law, and Human Life Issues D. Brian
Scarnecchia 2010-06-02 Bioethics, Law, and
Human Life Issues: A Catholic Perspective on
Marriage, Family, Contraception, Abortion,
Reproductive Technology, and Death and Dying
draws on the Magisterial teaching of the
Catholic Church to outline a Catholic response
to a host of controversial issues related to
human life. Scarnecchia lays out a Catholic
moral theology based on the writings of Pope
John Paul II and Thomas Aquinas, and he then
applies those Christian moral principles to
today's most contentious ethical issues,
including reproductive technology, embryo
adoption, contraception, abortion, family and
same-sex marriage, and euthanasia and assisted
suicide. This review of Catholic moral principles
brings together an in-depth consideration of the
central human life issues of our day with
abundant reference to the Church's social

teaching and to contrasting positions of today's leading ethicists.

Bioethics Scott B. Rae 1999 This new series of books brings thoughtful, biblically informed perspectives to contemporary issues in bioethics. Whether exploring abortion, assisted suicide, genetic engineering, or other controversial issues in bioethics, these volumes provide principled discussion of the ethical implications of today's medical and scientific breakthroughs. Extremely useful to students, scholars, and general readers alike, these volumes are ideal for classroom use -- in nontheological as well as theological settings. This excellent text offers a broad-based introduction to the field of bioethics. Scott Rae and Paul Cox provide an assessment of various secular approaches to bioethics that are

particularly influential today, and develop a framework for a Christian approach meant to assist people in addressing the many pressing issues in the field. Though touching on the numerous debated issues in bioethics, the authors are primarily concerned here to give an account of the central theological notions crucial to an informed Christian perspective on bioethics. Their work makes a stimulating and substantial contribution to a Christian bioethic that can effectively engage the pluralistic culture in which health care is practiced today.

Birth and Death Paul D. Simmons 1983

Living as God's Holy People Kent Brower 2014-08-08 In this readable and enlightening book (based on his 2008 Didsbury Lectures) Kent Brower opens up Paul's theology of holy-living-as-community in the power of the Spirit. At the heart of Paul's practical theology is God's call of Israel to be holy as God is holy. But his conviction is that the call to be God's holy people now encompasses all, Jews and Gentiles, who

follow Jesus the Messiah. This new community of God is to embody the holiness of God wherever they live just as Israel was to embody it. This is a central theological concern in all of Paul's epistles. His ethics are always theological ethics; his theology is always practical theology.

The New Media Frontier John Mark Reynolds
2008 A Pew Study reports that only 2% of America's twelve million bloggers claim "religion, spirituality or faith" as their main topic. This leaves a great mission field in cyberspace, say contributors to *The New Media Frontier*, because the latest forms of communication present so many opportunities to promote the cause of Christ in other topics and fields. Before blindly jumping in, however,

Christians need to weigh the possibilities against the consequences, and then proceed with the practical discernment and grace this book provides. With a foreword by national radio host Hugh Hewitt—who has been at the forefront of the new media movement among Christians—editors Roger Overton and John Mark Reynolds (along with an impressive list of other new media experts) survey the current landscape and explore specific areas in which God's people can creatively expand their reach to a lost world. By stressing the urgency for Christian involvement, unearthing the dangers, and advising readers on how to use this media with different audiences, this book equips believers to advance, demonstrate, and utilize the Christian worldview in this exciting realm.

Respecting Life Neil Messer 2013-01-25
Bioethical issues are rarely out of view in Western societies. New developments in areas such as human embryology continually raise new

ethical questions, while more familiar issues frequently reappear in public debate. These are issues of central concern for Christians and for a wider public, because they raise questions about the value of life, the meaning of suffering and death and humanity's place in the natural world.

God in the Laboratory Al Truesdale 2000 At some point, most people will have to face difficult moral decisions that arise due to advances in the world of science and technology. Faith Ethics Harold D Schlachtenhaufen 2008-09 This book talks about the many moral standards and ethical principles and beliefs

within our society and churches today. It gives a current assessment of ethics within Christianity and gives answers to difficult and sometimes confusing moral choices. - Is our culture and civilization in moral decline? Whose fault is it? What can you do to change it? What is the future of morality in the diverse world today? Can politics and the economy be fair to all? - Is it really good if a morally confused village raises our children? What can you do to keep your family, church, and society under the guidance of a good moral compass? - Why is there so much disagreement within churches and cultures today about what is right and wrong, good and evil, and what promotes the common good rather than the privileged few? - This introduction to Christian ethics will clarify why and how people arrive at differing ethical positions, and how to dialogue with others of all races, classes, and cultures from a position of understanding and mutual respect.

The Holy Spirit and Ethics in Paul Volker

Rabens 2013 Volker Rabens answers the question of how, according to the apostle Paul, the Holy Spirit enables religious-ethical life. In the first part of the book, the author discusses the established view that the Spirit is a material substance which transforms people ontologically by virtue of its physical nature. In order to assess this "Stoic" reading of Paul, the author examines all the passages from the Hebrew Bible, early Judaism, Hellenism and Paul that have been put forward in support of this concept of ethical enabling. He concludes that there is no textual evidence in early Judaism or Paul that the Spirit was conceived as a material substance. Furthermore, none of these or any of the Graeco-Roman writings show that ethical living derives from the transformation of the "substance" of the person that is imbued with a physical Spirit. The second part of the study offers a fresh approach to the ethical work of the Spirit which is based on a relational concept of Paul's theology. Rabens argues that it is

primarily through initiating and sustaining an intimate relationship with God the Father, Jesus Christ, and with the community of faith that the Spirit transforms and empowers people for ethical living. The author establishes this thesis on the basis of an exegetical study of a variety of passages from the Pauline corpus. In addition, he demonstrates that Paul lived in a context in which this dynamic of ethical empowering was part of the religious framework of various Jewish groups.

Gathered for the Journey David Matzko McCarthy 2007-08-28 Gathered for the Journey sets moral reasoning in a theological context of worship and discipleship (part1), provides a framework for the moral life based on questions of human fulfillment (part2), and demonstrates how these theological resources shape a distinctive approach to questions of globalization, Catholic social teaching, the family, war and peace, bioethics, and the environment (part3). McCarthy and Lysaught

have crafted a distinctively unified collection. Gathered for the Journey represents a common project among Catholic scholars who are struggling with similar questions about living faithfully. Catholic Bioethics for a New Millennium

Anthony Fisher 2011-11-17 Can the Hippocratic and Judeo-Christian traditions be synthesized with contemporary thought about practical reason, virtue and community to provide real-life answers to the dilemmas of healthcare today? Bishop Anthony Fisher discusses conscience, relationships and law in relation to the modern-day controversies surrounding stem cell research, abortion, transplants, artificial feeding and euthanasia, using case studies to offer

insight and illumination. What emerges is a reason-based bioethics for the twenty-first century; a bioethics that treats faith and reason with equal seriousness, that shows the relevance of ancient wisdom to the complexities of modern healthcare scenarios and that offers new suggestions for social policy and regulation. Philosophical argument is complemented by Catholic theology and analysis of social and biomedical trends, to make this an auspicious example of a new generation of Catholic bioethical writing which has relevance for people of all faiths and none.

Holy People, Holy Land Michael Dauphinais 2005-10 Offers an integrated theological vision of the Old and New Testaments that highlights the pattern of God's work through scripture.

Law's Virtues Cathleen Kaveny 2012-09-20 Can the law promote moral values even in pluralistic societies such as the United States? Drawing upon important federal legislation such as the Americans with Disabilities Act, legal scholar

and moral theologian Cathleen Kaveny argues that it can. In conversation with thinkers as diverse as Thomas Aquinas, Pope John Paul II, and Joseph Raz, she argues that the law rightly promotes the values of autonomy and solidarity. At the same time, she cautions that wise lawmakers will not enact mandates that are too far out of step with the lived moral values of the actual community. According to Kaveny, the law is best understood as a moral teacher encouraging people to act virtuously, rather than a police officer requiring them to do so. In *Law's Virtues* Kaveny expertly applies this theoretical framework to the controversial moral-legal issues of abortion, genetics, and euthanasia. In addition, she proposes a moral analysis of the act of voting, in dialogue with the election guides issued by the US bishops. Moving beyond the culture wars, this bold and provocative volume proposes a vision of the relationship of law and morality that is realistic without being relativistic and optimistic without being utopian.

Why the Church Needs Bioethics Zondervan, 2011-07-05 In a world where incredible medical technologies are possible ... does "can do" mean "should do"? Why the Church Needs Bioethics helps you understand and constructively engage bioethical challenges with the resources of Christian wisdom and ministry. Three rich and true-to-life case studies illustrate the urgency of such bioethical issues as reproductive and genetic technologies, abortion, forgoing treatment, assisted suicide, stem cell research, and human enhancement technologies. Leading Christian voices bring biblical and theological perspective to bear on the incredible medical technologies available today; mobilize useful insights from health care, law, and business; and demonstrate the powerful ways the church can make a difference through counseling, pastoral care, intercultural ministry, preaching, and education. This book equips students, church and lay leaders, and people in health-related fields with the knowledge to make faithful

bioethical decisions and to help foster a world where human beings are shown respect as people created in the image of God. Contributors to *Why the Church Needs Bioethics* include leading Bible and theology scholars, such as D. A. Carson and Kevin Vanhoozer; leaders in the areas of preaching (Greg Scharf) and ethics (Scott Rae); and 15 other experts in the fields of biblical-theological studies, ministry, communication, business, law, healthcare, and bioethics.

The Culture of Life Ryan Cameron MacPherson 2012-03-01 Designed for both individual and group study, this book outlines the culture of life in sharp contrast to the culture of death. Grounded in Holy Scripture, oriented by the forgiving love of Jesus Christ, and motivated by compassion for people in all of life's stages, *The Culture of Life* guides readers through today's most controversial topics in bioethics, including: abortion and infanticide; euthanasia ("mercy killing") and physician-assisted suicide; chastity,

marriage, parenting, and elder care.

Called to be Holy in the World Timothy H. Maschke 2016-03-18 *Called to be Holy in the World* presents an overview of the history of Christianity from Pentecost to the present. Written from a Lutheran perspective, this book introduces the reader to key Christian figures and movements as it encompasses a broad view of God's work in the world. The story after all is God's story. As His story it is centered in Christ's cross, but extends around the globe as Christians lived and continue to live out their particular vocations as holy people in the world. As a resource for students of all ages, this book surveys how Christianity confronted the world and how Christians tried to balance the challenges of living wholly and holy in the world. Historical information on various controversies provides background information for the volume on Christian doctrine in this series, *Called by the Gospel*. Organized in a unique style, each of the twenty-one chapters deals with one century of

Christian history. Discussion questions and reading guides along with informative side bars provide additional educational resource and reference material for further study.

The Freedom of a Christian Gilbert Meilaender 2006 Theologian and ethicist Gilbert Meilaender explores the nature of Christian freedom, tackling issues such as how it applies to vocation and biotechnology, the importance of memory, and the role of suffering in our lives.

The New Testament and Bioethics R. Dennis Macaleer 2014-01-01 Beauchamp and Childress's Principles of Biomedical Ethics is a

well-accepted approach to contemporary bioethics. Those principles are based on what Beauchamp and Childress call the common morality. This book employs New Testament theological themes to enhance the meaning of those principles of bioethics. The primary New Testament text for this study is the twin commands from Jesus to love God and love one's neighbor. The three theological themes developed from this study--the image of God, the covenant, and the pursuit of healing--are deeply embedded in the New Testament and in the ministry of Jesus. Three contemporary bioethics principles are used for this dissertation, based on The Belmont Report. They are the principles of respect for persons, justice, and beneficence. In each case, the theological themes are shown to enhance the meaning of these bioethics principles. Each of the three principles, as understood through the three theological themes, is applied to a current bioethics issue to demonstrate the efficacy of this approach. The

three current issues addressed are the withdrawal or withholding of life-sustaining treatment, the distribution of health care in the Untied States, and the use of palliative care.
