Kenelm Winslow 2018-07 The Home Medical Library, Volume I (of VI) by Kenelm Winslow
Medicine, as the art of preserving and restoring health, is the rightful office of the great army of earnest and qualified American physicians. But their utmost sincerity and science are hampered by trying restrictions with three great classes of people: those on whom the family physician cannot call every day; those on whom he cannot call in time; and those on whom he cannot call at all. To lessen these restrictions, thus assisting and extending the healer's work, is the aim of the pages that follow. Consider first the average American household, where the family physician cannot call every day. Not a day finds this household without the need of information in medicine or hygiene or sanitation. More efforts of the profession are thwarted by ignorance than by epidemic. Not to supplant the doctor, but to supplement him, carefully prepared information should be at hand on the hygiene of health-

sanitation, diet, exercise, clothing, baths, etc.; on the hygiene of disease-nursing and sick-room conduct, control of the nervous and insane, emergency resources, domestic remedies; above all, on the prevention of disease, emphasizing the folly of self-treatment; pointing out the danger of delay in seeking skilled medical advice with such troubles as cancer, where early recognition may bring permanent cure; showing the benefit of simple sanitary precautions, such as the experiment-stations method of exterminating the malaria-breeding mosquito. The volumes treating of these subjects cannot be made too clear, nontechnical, fundamental, or too well guarded by the supervision of medical men known favorably to the profession. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access

to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.

The CDC Field Epidemiology Manual Centers for Disease Control and Prevention (CDC)
2018-11-20 A NEW AND ESSENTIAL RESOURCE FOR THE PRACTICE OF EPIDEMIOLOGY AND PUBLIC HEALTH The CDC Field Epidemiology Manual is a definitive guide to investigating acute public health events on the ground and in real time. Assembled and written by experts from the Centers for Disease

Control and Prevention as well as other leading public health agencies, it offers current and field-tested guidance for every stage of an outbreak investigation -- from identification to intervention and other core considerations along the way. Modeled after Michael Gregg's seminal book *Field Epidemiology*, this CDC manual ushers investigators through the core elements of field work, including many of the challenges inherent to outbreaks: working with multiple state and federal agencies or multinational organizations; legal considerations; and effective utilization of an incident-management approach. Additional coverage includes:

- Updated guidance for new tools in field investigations, including the latest technologies for data collection and incorporating data from geographic information systems (GIS)
- Tips for investigations in unique settings, including healthcare and community-congregate sites
- Advice for responding to different types of outbreaks, including acute enteric disease;

suspected biologic or toxic agents; and outbreaks of violence, suicide, and other forms of injury For the ever-changing public health landscape, *The CDC Field Epidemiology Manual* offers a new, authoritative resource for effective outbreak response to acute and emerging threats. *** Oxford University Press will donate a portion of the proceeds from this book to the CDC Foundation, an independent nonprofit and the sole entity created by Congress to mobilize philanthropic and private-sector resources to support the Centers for Disease Control and Prevention's critical health protection work. 1,001 Home Remedies Mary Rose Quigg
2022-01-18 Simple, practical, and inspiring tips, recipes, and wellness advice. This practical and inspiring little book offers over 1,000 wellness tips for boosting your immune system, caring for burns and wounds, improving your complexion, reducing stress, and much more. Find simple and effective home remedies such as: To relieve a dry, irritating cough: to 1/3 pt (200ml) boiling water, add the juice of 1 lemon, 2 tsp honey, ¼ tsp cinnamon, 1 clove garlic, and a sprig of rosemary. Stir well, cover and leave for 15 mins. Strain and sip slowly. To relieve eczema, steep ½ ounce (13 grams) chamomile flowers in 1 pint (600 milliliters) boiling water for 20 minutes and add to a bath. To relieve tension in the upper body, sit cross-legged, block the ears with your fingers. Breathe in, then breathe out making a

humming sound to lengthen the exhalation. Repeat 10 times before going to bed. To remove makeup, coat the fingers with almond, sunflower, or avocado oil and spread evenly over the face and neck. Remove the oil with tissues. Saturate a black tea bag with warm water. Press over clean lips for 5 minutes. Repeat if desired. Black tea is high in tannic acid, retains moisture, and keeps lips smooth and taut. To give hair a shine, mash an over-ripe banana; combine with 3 drops of almond oil. Massage into dry hair, leave on for 15 minutes. Shampoo as usual. Many of the hints found here are the product of tradition passed from one generation to another. They cover advice on care of the body from head to toe, a common sense approach to first aid and using medicines, recipes for non-toxic cleaning solutions, ways to alleviate common ailments with ingredients you probably already have on hand, and more.
