This book is a guide to Home Security not to be confused with Home Defense. Offered here are practical and relatively inexpensive ways to secure your home against an intruder but very little on defending yourself and your family after a criminal has entered your home. There is no need to spend a lot of money on commercially available security options if you have a little

mechanical ability. Many things can be done by the 'do-it-yourself' homeowner that result in less expensive solutions for home security.

Prepper's Guide to Home Defense Marcus Patton 2015-09-22 Home defense isn't a joke. With over

three and a half million home invasions per year, an intruder could enter your home at any time-day or night. The media is rife with stories of robbery, home invasion, and sexual assaults. It isn't a case of fear mongering, but simply awareness. In most cases, home invaders don't even know their target. But their target isn't completely random; targets are chosen due to several key features of their home. In this book, we'll show you how you can scare home invaders away before they can ever harm you or your family. We'll also discuss passive ways to protect yourself-the construction of home defenses that keep burglars out and slow them down. Whether you're looking for ways to protect yourself from the common criminal elements or if you're looking to protect yourself in worst case, collapse of civilization scenarios, we have you covered; we believe everyone has their own level of preparation, and we'll help get your house defense ready regardless of your end goal. We also know that not all people are the same. Most home defense guides out there treat the reader as though they live in a quaint suburban home with all the money in the world-that isn't true for most people, and it certainly isn't true for the author. We'll describe ways to protect yourself regardless of your situation. Country homes, suburban homes, or urban apartments all have different needs for home defense, and we'll cover them all. Here is a preview of what you will learn from this book:

- * Proper Preparation for Home Defense
- * Different Layers of Security in Your Home
- * Basic Principles of a Reinforced Structure
- * Panic Room Construction and Threat Containment
- * Pros and Cons of Modern Alarm Systems
- * Benefits of Handguns, Shotguns, Rifles, and Air Rifles
- * What Makes a Melee Weapon Good
- * The Best Martial Arts for Self-Defense
- * How to Choose a Martial Art
- * And Much More

Criminals need only opportunity and incentive-and any oversight on your part can easily create these. Learn how to keep your home safe, whether from natural disaster, home invasion, civil unrest or worse.
