Understanding Your Middle School Child Darryl Sollerh 2016-06-08 "Sage advice for frustrated parents." KIRKUS REVIEWS Through their years of working with Middle Schoolers and their parents, Darryl Sollerh and Leslie King, LCSW, have developed a compassionate yet realistic approach that takes into consideration both the parent and child's point of view. Filled with real-life examples, they examine the likely flashpoints for family conflicts, from Middle Schooler social lives to their homework habits, from their misrepresentations to their calls for fairness, from their demands for independence to their need for dependence. Sollerh and King's approach, at heart, seeks to spark an empathetic awakening in both parent and child, not only as they each meet the initially difficult phases of any challenge or crisis, but also as they move into the future, guided by a new awareness capable of supporting their ongoing efforts to

grow in a relationship of shared dialogs, mutual respect and deepening understanding.

The Successful Dyslexic Neil Alexander-Passe
2017-10-10 This innovative book looks at the keys for success in dyslexic adults, comparing both those who are successful and less successful, enabling parents and teachers to use these keys to best support young dyslexics. These keys look at home life, school, career choices, working relationships, coping strategies, traits, unique selling points, and what is considered success for somebody with dyslexia. The Successful Dyslexic questions if school-based trauma can be used positively, as both successful and unsuccessful dyslexic adults share the same traumatic school experiences. It is how these adult dyslexics have used this trauma, positively or negatively that has set them on the path for success, or to struggle as adults searching for a worthwhile career. The theories of 'disability paradox' and 'post-traumatic growth' are used to understand why despite having a disability, many dyslexics can be, and are, highly successful. This book details

an interview study of 27 successful and 10 less successful dyslexics, with 2 expert interviews, and supported by two large online studies. In total this book includes the contribution of 191 adult dyslexics. Each in-depth interview has sought to understand the individual's journey from childhood to adulthood, and their quotes are used to enlighten the reader to each of their individual experiences. Armed with these insights, it is hoped that parents and teachers of young dyslexics can set them on the path to unlock their own future success.

Literacy as Involvement Deborah Brandt

2011-02-18 In *Literacy as Involvement*, Deborah Brandt examines the cultural and social roots of the acts of reading and writing. The book asks, for example, whether literacy is a natural growth of or a radical shift from orality. It questions the contrary views that literacy is either the learning of the conventions of language or is better understood as heightened social ability. Finally, it raises the possibility that knowing how to read and write is actually understanding how we respond during the acts of reading and writing. This examination of literacy as process is also

offered as a critique of prevailing theories of literacy advanced by such scholars as Walter J. Ong, S.J., David Olson, and E. D. Hirsch. They depict literacy as a textual experience that is socially and linguistically detached. Brandt critically examines the underlying assumptions from research on writing processes and argues that they call for a major reformation of prevailing conceptions of literacy. Specifically, she analyzes several expository texts from a process perspective to establish the interaction of reader and writer in even the most seemingly formal and detached writing. In her conclusion, Brandt brings together the major findings of her study to address pressing literacy issues, including the problem of illiteracy in our schools. [Opening Your Child's Nine Learning Windows](#) Cheri Fuller 2001-06 This book helps parents understand the potential of important windows of learning opportunities and how to capitalize on each window -- language, musical, logical, mathematical, curiosity, emotional, spiritual,

physical, and values. Formerly titled Through the Learning Glass.
