Aircraft: The Jet as Art Jeffrey Milstein 2007-05-01 Sometimes it takes an artist to show us that familiar things are truly remarkable. Jeffrey Milstein's elegant photographs of commercial airliners restore the rigor and glamour to our experience of air travel. They have quickly become contemporary icons, published in 2005 in photo magazine, Graphis PhotoAnnual, and American Photography Annual, and winning first place in the PDN Digital Photography Contest. For the past five years, Milstein has been taking meticulous large-format photographs of commercial airliners as they take off and land, revealing the beauty and power of these sleek but complex machines. An eloquent foreword by Walter J. Boyne helps the reader appreciate these amazing technological wonders, with their incredibly powerful engines that run for so many thousands of hours that they are more vulnerable to rust than to wear. The book gives technical data on each airplane pictured.

Island Of Civil Airplane Spotter Jamee Shetlar 2021-08-26 This book is a fantastic photo collection as well as a guide. This guide is to introduce some good spots for viewing or taking photos of airplanes on St Martin Island. Princess Juliana Airport in St. Maarten is widely regarded as an aircraft spotters’ Mecca. Maho beach is the most popular place to enjoy and spot airplanes and is located under the approach path of Runway 10. The most famous picture should be the one that a large airplane (KLM’s Boeing 747 or Air France Airbus A340) is making a low approach over the beach above the visitor’s heads and dreamed about visiting this location one day. However, Princess Juliana Airport is surrounded by the beautiful Coral Sea and bright green mountains. A few ten minutes’ drives will take you to a photogenic location you can see a beautiful airplane taking off with the scenic landscape.

Airport PA Photos 2009 Supplanting the great sea ports as the primary points of entry to Britain, the country's airports have seen an extraordinary procession of the famous and infamous as they come and go. Poised there, always, are the press photographers whose lives are spent capturing these moments for newspapers of the day. None escape their lenses: Charlie Chaplin is seen in the 1930s swathed in flying helmet and goggles as he leaves Croydon for Paris and again in the 1950s after McCarthyism drove him from the USA. Predictably, The Beatles are captured leaving for their triumphant tour of America, but less predictably the Thunderbirds puppets pose on the steps of a plane, bound for Japan.

Using easy-to-understand language, T.Malcom English shows readers how to use their photographic kit to take fantastic aviation pictures both in the air and on the ground, examining topics such as: cameras, lenses and accessories,

digital photography, exposure and composition, air-to-air and ground-to-air photography and filing and selling images.
