Making Progress in Writing Eve Bearne 2003-08-29 Children's achievements in writing lag behind their achievements in reading, speaking and listening. National tests are beginning to expose this gap and inevitably, it is raising concerns. The issue is not without controversy but regardless of the politics of the situation, national progress in children's writing is both needed and possible. This new book from Eve Bearne makes a valuable contribution towards helping teachers close this gap. Uniquely, it follows the structure of the National Literacy Strategy, whilst examining key areas such as bridging KS2 and KS3 writing, and writing skills beyond the Literacy Hour. Reading Roger Beard 2022-10-20 The field of reading is a compelling one, characterised by many debates and discussions. It is also amenable to investigations through a range of theories and research studies. In this book, eight leading authorities provide a 'state-of-the-art' overview of reading, using perspectives that have informed their work. There are overviews from linguistic, psychological, sociological and literary viewpoints, as well as more hybrid ones from investigations of digital literacy and multi-modality. This book celebrates what has already been achieved by bridging research, scholarship and practice; it also suggests what still needs to be done to bring the positive rewards from reading to greater numbers of young people. It also recognises that the benefits of reading extend beyond the personal. Accomplished reading skills empower people to meet the challenges of everyday life: making decisions, solving problems, and dealing with unexpected events. The need to refresh and renew our knowledge of reading has gained further impetus in the 'information age'. New technologies for information and communication continually appear: manifestations of 'fake news', disinformation and conspiracy theories spread rapidly across the globe. The book underlines the importance not only of reading, but also the fact that reading between and beyond the lines is more important than ever,

in print and across multiple media platforms. The chapters in this book were originally published as a special issue of Education 3-13: International Journal of Primary, Elementary and Early Years Education. **EPZ Teaching Poetry** Fred Sedgwick 2003-11-01 Too often the teaching of poetry is divided into the reading of poetry and the writing of poetry. This division is strange and illogical because the two activities are not only linked, but intermeshed. This book will be an attempt to show how indispensable reading poetry is to writing it and vice versa. The text will be divided into three sections. The first section will be comprised of advice from his own experience on reading poetry to children at KS1 and KS2. The second section will comprise of case studies of children responding to poetry and will show how much children can actually understand. The last section will be comprised of a case study af children writing poems.

Drafting and Assessing Poetry Sue Dymoke 2003-01-28 `This excellent book provides the reader with comprehensive coverage of all aspect of poetry teaching. The book does more than inform us - it inspires profound reflection on the best ways it support poetry writing and draws us into the debate about assessment-driven curriculum' - School Librarian `A must for trainee teachers and English departments' - Booktrusted News `Drafting and Assessing Poetry is thoroughly researched and shows how attitudes towards teaching of poetry and indeed the place of poetry on the syllabus, has changed with political fashion over the years, but more importantly, Sue Dymoke shows how a handful of contemporary poets go about drafting their work and sees this process as an essential tool in the classroom, advocating that students should keep drafting notebooks, just like real writers. Getting students, or indeed members of writing groups, to understand that one draft of a poem may not be the final or best work they can produce will never be a problem again!' - Writing in Education `Sue Dymoke's book is a much needed antidote to the ubiquitous guides to poetry analysis.... This book is well worth reading for its clarity and wealth of ideas' - Bethan Marshall, TES Teacher Magazine `Every English department should buy this remarkably comprehensive book. Inspiring approaches for teaching children to write poetry are clearly described. Sue Dymoke draws upon her extensive experience as a poet, English teacher and researcher to explore the place of writing poetry in English lessons and examinations. Her unique insights into both the writing and teaching of poetry should prove invaluable to English teachers' - Dr Mark Pike, Lecturer in English Education and Head of PGCE English, University of Leeds `It is a useful book: a theoretical text, but with a practical focus, which makes it very readable and interesting, to teachers of young people particularly, but also, to teachers of adults and indeed in parts to poetry writers themselves, particularly those interested in working in schools, or simply curious about the general process of drafting and evaluating poetry' - County Lit, Nottinghamshire County Council Literature Newsletter Drafting and Assessing Poetry offers a range of teaching strategies for developing students' poetry writing skills, and guidance about

assessment approaches. Critical commentaries combine with illustrations of successful classroom practice to consider this essential but under-explored aspect of English teaching. Based on theory but with a practical dimension, the book engages readers in current critical debates about poetry teaching and its place in an assessment-driven curriculum. This book is for reflective practitioners, including trainee teachers, who want to develop their understanding of poetry teaching and to gain insights, which will inform classroom practice. It will also be useful for literacy co-ordinators, teacher educators and other advisory staff in the field of English teaching.

Primary English Curriculum Guide Christine Moorcroft 2013-11-26 First Published in 2001. The purpose of this curriculum guide is to help student teachers and newly qualified teachers to make a start on learning how to become competent teachers of English. Despite the emphasis given in training courses to the teaching of English, newly qualified teachers often feel underprepared for it and frequently mention their concerns about this. These concerns can be partly explained by a general lack of confidence in this key area and partly by widespread media and political criticism of the teaching of literacy. It is also because it is often difficult for a student to make the connection between observation of key teaching strategies and his or her own personal practice.
