Altar: The Haunting of Radcliffe House Ellen Patrick

2015-03-17 The Hamilton family move into a large country house on the Yorkshire Moors to supervise its restoration from a dilapidated B&B to the original Victorian grandeur. When Meg Hamilton, wife, mother and renovation expert first loses her London team after an accident, then a local Yorkshire team too

superstitious to continue, she's forced to carry on alone. The discovery of a secret attic room, a Rosicrucian mosaic, a bricked up root cellar and many other unexplainable events gradually convince Meg, her husband Alec and children Penny and Harper, that they're not only restoring the house, but also its original Victorian owners who died 150 years ago. But before they can escape, the house - and its former occupants - force them to spend one last, terrifying night under its roof. Based on the film of the same name directed by Nick Willing from his original screenplay, releasing on DVD in the United States and elsewhere Spring 2015./ The film stars Olivia Williams as Meg Hamilton, Matthew Modine as Alec Hamilton, Antonia Clarke as Penny and Adam Thomas Wright as Harper.

*Turning the Tide on Plastic*

Lucy Siegle 2018-07-26  
Enough plastic is thrown away every year to circle the world 4 times More than 8 million tonnes of plastic enter the oceans each year 300 million tonnes of new plastic is produced every year An estimated 15-51 trillion pieces of plastic now litter the world's oceans 38.5 million plastic bottles are used every day in the UK A million plastic bottles are used per minute around the world 500 million plastic straws are used per year Without big action, at the current rate, pieces of plastic will outnumber fish in the ocean by 2050. That is the legacy we are leaving our children and grandchildren. Plastic flows into our lives from every direction and most of it is not recycled. Instead it is incinerated or ends up in landfill, where it will sit for hundreds of years, or enters the world's seas where it fragments into tiny pieces to become microplastics - the environmental scourge of our times. Many of us had assumed that governments, brands and

waste authorities were dealing with plastic on our behalf. But the impact of shows such as Blue Planet along with national beach cleans and high-profile campaigns have resulted in a collective wake-up call. If there were plans and strategies, they have not worked as we imagined. It would be easy to feel despondent but instead we need to turn our anger and emotion into action, starting by making a big dent in our own enormous consumption. Turning the tide on Plastic is here just in time. Journalist, broadcaster and eco lifestyle expert Lucy Siegle provides a powerful call to arms to end the plastic pandemic along with the tools we need to make decisive change. It is a clear-eyed, authoritative and accessible guide to help us to take decisive and effective personal action. Because this matters. When it comes to single-use plastics, we are habitual users, reaching out for plastic water bottles, disposable coffee cups, plastic straws and carrier bags multiple times a day. If only 12

of us adopt Lucy's 'reduce, rethink, refill, refuse' approach, we could potentially ditch 3K-15K single items of plastic in a year. When we consider our power as influencers - whether at school, the hairdressers, at work or on the bus - we suddenly become part of something significant. So now is the time to speak up, take action and demand the change you want to see in the ocean, in the supermarket aisles and on the streets. It's time to turn the tide on plastic, and this book will show you how.

My Father's Fortune Michael Frayn 2011-02-15 For the first time, Michael Frayn, the "master of what is seriously funny,"\* turns his humor and narrative genius on his own family's story, to re-create the world that made him who he is Whether he is deliriously funny or philosophically profound, as a novelist and a playwright Michael Frayn has concerned himself with the ordinary life lived by erring humans, which is always more extraordinary than people think. In My Father's Fortune, Frayn reveals the original exemplar of the extraordinary-ordinary life: his father, Tom Frayn. A clever lad, a roofing salesman with a winning smile and a racetrack vocabulary, Tom Frayn emerged undaunted from a

childhood spent in two rooms with six other people, all of them deaf. And undaunted he stayed, through German rockets, feckless in-laws, and his own increasing deafness; through the setback of a son as bafflingly slow-witted as the father was quick on his feet; through the shockingly sudden tragedy that darkened his life. Tom Frayn left his son little more than three watches and two ink-and-wash prints. But the true fortune he passed on was the great humor and spirit revealed in this beguiling memoir. \* Anthony Burgess

2011-05-24 Gods' Gold is a mystery about the discovery of alternative truths and how the characters chose to deal with those truths. The uncovering of ancient secrets is enlightenment for some, and for others, a reason to commit murder. In 1902, Egyptologist, Flinders Petrie discovered tons of white ash in the Sinai.

Believing the ash to be ancient sacrifices or burnt offerings, he was unable to find traces of

charred bones or burn marks on stones or in caves to support his theory. This begins the mystery of Petries white ash. Present day Iraq, Sergeant, Mitchell Harrington, an anthropologist in civilian life, is on a reconnaissance mission of a bombed out village. There he discovers buried jugs containing white ash he suspects to be part of Petries original discovery. After smuggling the ash out of Iraq, Harrington rekindles his relationship with Analisa Scotti, an adjunct professor and scientist at the University of Arizona. Analyzing the ash, Analisa determines the strange substance contains mysterious capabilities. Because of its anomalous properties, the ash becomes the obsession of an Arab emir, two brothers who are deserters from the Iraqi Police, an Italian arms dealer, and assassins hired by a Vatican official to destroy its legacy. Those struggling to claim the ash are brought together in a fiery conclusion. The mystery of Flinders Petries discovery of the ash, along with

the ancient secret it possesses, is finally revealed. The secret of the white ash is so profound, it has the potential to alter history and challenge the long established paradigms of civilization.

Man in the Moon Stephanie G'Schwind 2014-06-01

"Science claims it will one day be able to eliminate fathers from the equation by mating bone marrow with ovum. When that day comes, I imagine this book, along with a handful of other works (King Lear, Fun Home) will become even more necessary. Herein find the blueprints for the mystery, the maps for the uncharted, the keys to the archetype." —Nick Flynn, author of *The Reenactments* and *Another Bullshit Night in Suck City* "At this moment, I find myself at loose ends, lost in the various vacuums left by my father's dying and my sons' departures out into the voids. Yet this stunning constellation of essays centered me, became for me fine instruments of reckoning of where to stand in the ceaseless entropic dynamic

of kin, of paternal keening. These waxing meditations demonstrate the inflationary universe, the heft and velocity of that big ol' nothing. They elegantly fill, with sober hope and the balm of joy, the terrifying, infinite spaces between those waning stars." —Michael Martone, author of *Michael Martone and Four for a Quarter* "What an unreachable mystery the father is, preoccupied, unknowable, pervasive. In these fascinating essays, a shared portrait emerges as writers articulate the perpetual puzzle of the father and, with grace and candor, explore what it means to not know him, to never know him. As one voice, these essays investigate the man—his inventories, his myths, his mere traces—who makes up our horizons, who forever shimmers there beyond our collective grasp." —Susanna Sonnenberg, author of *Her Last Death and She Matters: A Life in Friendships Selected from the country's leading literary journals and publications—Crazyhorse,*

*Colorado Review, The Nervous Breakdown, Creative Nonfiction, Georgia Review, Gulf Coast, The Missouri Review, The Normal School, and others—Man in the Moon* brings together essays in which sons, daughters, and fathers explore the elusive nature of this intimate relationship and find unique ways to frame and understand it: through astronomy, arachnology, storytelling, map-reading, television, puzzles, DNA, and so on. In the collection's title essay, Bill Capossere considers the inextricable link between his love of astronomy and memories of his father: "The man in the moon is no stranger to me," he writes. "I have seen his face before, and it is my father's, and his father's, and my own." Other essays include Dinty Moore's "Son of Mr. Green Jeans: A Meditation on Missing Fathers," in which Moore lays out an alphabetic investigation of fathers from popular culture—Ward Cleaver, Jim Anderson, Ozzie Nelson—while ruminating on his own absent father and

hesitation to become a father himself. In "Plot Variations," Robin Black attempts to understand, through the lens of teaching fiction to creative writing students, her inability to attend her father's funeral. Deborah Thompson tries to reconcile her pride in her father's pioneering research in plastics and her concerns about their toxic environmental consequences in "When the Future Was Plastic." At turns painfully familiar, comic, and heartbreaking, the essays in this collection also deliver moments of seari

**So You Want to Be an Engineer?** Marianne Pilgrim Calabrese 2009-06 So You Want to Be A Engineer? Is a book for anyone who is or who wants to be an Engineer. The book reveals everything nobody else will tell you about the engineering profession. It shows how to save the reader the agony of on the job trial and error training and will give them a head start in using experienced strategies while dealing with technicians, draftsman, marketing, purchasing and manufacturing

personnel, and project managers. It doesn't teach them about engineering: it enlightens them to find their right position. There are The Ten Commandments for an engineer, which sums up in ten steps how to survive in the engineering profession and gives in depth reasons why they work. It is a refreshing new and realistic book that touches on the reality that engineers may succeed, not because of their technical expertise but because of the way they interact with technicians, draftsman, marketing, purchasing and manufacturing personnel, and project managers. Each of these topics will be discussed fully with real life stories and examples. There will be easy steps given on how to handle each issue and how an engineer can ease into the company they choose to work for. The Ten Commandments will make it easy for them to sum up the do's and don'ts to survive in the engineering profession.

*Iron Gold* Pierce Brown

2018-01-16 NEW YORK TIMES

**BESTSELLER** • In the epic next chapter of the Red Rising Saga, the #1 bestselling author of Morning Star pushes the boundaries of one of the boldest series in fiction.

“Mature science fiction existing within the frame of blazing space opera . . . done in a style [that] borders on Shakespearean.”—NPR (One of the Best Books of the Year)

They call him father, liberator, warlord, Slave King, Reaper. But he feels a boy as he falls toward the war-torn planet, his armor red, his army vast, his heart heavy. It is the tenth year of war and the thirty-third of his life. A decade ago Darrow was the hero of the revolution he believed would break the chains of the Society. But the Rising has shattered everything: Instead of peace and freedom, it has brought endless war. Now he must risk all he has fought for on one last

desperate mission. Darrow still believes he can save everyone, but can he save himself? And throughout the worlds, other destinies entwine with Darrow’s to change his fate forever: A young Red girl flees tragedy in her refugee camp, and achieves for herself a new life she could never have imagined. An ex-soldier broken by grief is forced to steal the most valuable thing in the galaxy—or pay with his life. And Lysander au Lune, the heir in exile to the Sovereign, wanders the stars with his mentor, Cassius, haunted by the loss of the world that Darrow transformed, and dreaming of what will rise from its ashes. Red Rising was the story of the end of one universe. Iron Gold is the story of the creation of a new one. Witness the beginning of a stunning new saga of tragedy and triumph from masterly New York Times bestselling author Pierce Brown. ### **Beyond Shareholder**

#### **Primacy** Stuart Hart

2024-04-09 From the author of *Capitalism at the Crossroads*, a call to consciousness—and action—for individuals, organizations, communities, and nations. Our current Milton Friedman-style "shareholder primacy capitalism," as taught in business schools and embraced around the world, has become dangerous for society, the climate, and the planet. Moreover, Stuart L. Hart argues, it's economically unnecessary. But there are surprising reasons for hope—from the history of capitalism itself. *Beyond Shareholder Primacy* argues that capitalism has reformed itself twice before and is poised for a third major reformation. Retelling the origin story of capitalism from the fifteenth century to the present, Hart argues that a radically sustainable, just capitalism is

possible, and even likely, in our lifetime. Hart describes what it will take to move beyond capitalism's present worship of "shareholder primacy," including reforms to all major economic institutions. A key requirement is eliminating the "externalities" (or collateral damage) of our current shareholder capitalism. Sustainable capitalism will explicitly incorporate the needs of society and the planet, include a financial system that allows leaders to prioritize the planet, reorganize business schools around sustainable management thinking, and enable corporations not just to stop ignoring the damage they cause, but actually begin to create positive impact.
