Second Bibliographic Guide to the History of Computing, Computers, and the Information Processing Industry James W. Cortada 1996-01-30 Complementing the author's 1990 bibliography, *A Bibliographic Guide to the History of Computing, Computers, and the Information Processing Industry*, this bibliography provides 2,500 new citations, covering all significant literature published since the late 1980s. It includes all aspects of the subject—biographies, company histories, industry studies, product descriptions, sociological studies, industry directories, and traditional monographic histories—and covers all periods from the beginnings to the personal computer. New to this volume is a chapter on the management of information processing operations, useful to both historians and managers of information technology. Together with the earlier bibliography, this work provides the most comprehensive bibliographic guide to the history of computers, computing, and the information processing industry. The organization of the book follows that of the earlier work, with the addition of the new chapter on the management of information processing. All entries are new to this volume. Titles are annotated, and each chapter begins with a short introduction. A full table of contents and author and subject indexes enhance accessibility to the material.

Powder Diffraction R E Dinnebier 2015-11-09 Powder diffraction is a widely used scientific technique in the characterization of materials with broad application in materials science, chemistry, physics, geology, pharmacology and archaeology. *Powder Diffraction: Theory and Practice* provides an advanced introductory text about modern methods and applications of powder diffraction in research and industry. The authors begin with a brief overview of the basic theory of diffraction from crystals and powders. Data collection strategies are described including x-ray, neutron and electron diffraction setups using modern day apparatus including synchrotron sources. Data corrections, essential for quantitative analysis are covered before the authors conclude with a discussion of the analysis methods themselves. The information is presented in a way that facilitates understanding the information content of the data, as well as best practices for collecting and analyzing data for quantitative analysis. This long awaited book condenses the knowledge of renowned experts in the field into a single, authoritative, overview of the application of powder diffraction in modern materials research. The book contains essential theory and introductory material for students and researchers wishing to learn how to apply the frontier methods of powder diffraction

Readings in Human-Computer Interaction Ronald M. Baecker 2014-06-28 The effectiveness of the user-computer interface has become increasingly important as computer systems have become useful tools for persons not trained in computer science. In fact, the interface is often the most important factor in the success or failure of any computer system. Dealing with the numerous subtly interrelated issues and technical, behavioral, and aesthetic considerations consumes a large and increasing share of development time and a corresponding percentage of the total code for any given application. A revision of one of the most successful books on human-computer interaction, this compilation gives students, researchers, and practitioners an overview of the significant concepts and results in the field and a comprehensive guide to the research literature. Like the first edition, this book combines reprints of key research papers and case studies with synthesizing survey material and analysis by the editors. It is significantly reorganized, updated, and enhanced; over 90% of the papers are new. An invaluable resource for systems designers, cognitive scientists, computer scientists, managers, and anyone concerned with the effectiveness of user-computer interfaces, it is also designed for use as a primary or supplementary text for graduate and advanced undergraduate courses in human-computer interaction and interface design. *Human computer interaction--historical, intellectual, and social* Developing interactive systems, including design, evaluation methods, and development tools The interaction experience, through a variety of sensory modalities including vision, touch, gesture, audition, speech, and language Theories of information processing and issues of human-computer fit and adaptation

[Van Nostrand's Scientific Encyclopedia](#) Douglas M. Considine 2013-12-11 Advancements in science and engineering have occurred at a surprisingly rapid pace since the release of the seventh edition of this encyclopedia. Large portions of the reference have required comprehensive rewriting and new illustrations. Scores of new topics have been included to create this thoroughly updated eighth edition. The appearance of this new edition in 1994 marks the continuation of a tradition commenced well over a half-century ago in 1938 Van Nostrand's Scientific Encyclopedia, First Edition, was published and welcomed by educators worldwide at a time when what we know today as modern science was just getting underway. The early encyclopedia was well received by students and educators alike during a critical time span when science became established as a major factor in shaping the progress and economy of individual nations and at the global level. A vital need existed for a permanent science reference that could be updated periodically and made conveniently available to audiences that numbered in the millions. The pioneering VNSE met these criteria and continues today as a reliable technical information source for making private and public decisions that present a backdrop of technical alternatives.

Gender and the Life Course Alice S. Rossi 1985-01-01 Gender and the Life Course is an interdisciplinary collection of essays on the lives of women and men as they are affected by history, culture, demography, economic and political stratification, and the biopsychological processes that attend maturation and aging. The book covers three major topics. Part I, which examines gender and the life course in broad historical perspective, includes a summary of recent work in biological ecology and primatology, and an analysis of the persistence of cultural and gender differences in role organization in societies undergoing the transition from agrarianism to industrialism. Other essays trace the changes in sources of household income of industrial workers over the life span, and review temporal and gender differences in life span transitions. Part II examines gender differentiation in a variety of contexts: psychological, psychobiological, and sociological. Alice Rossi's ASA Presidential Address reviews recent work on fathering and mothering, and argues that sociological explanations of such gender differences need supplementation by concepts from evolutionary theory and the neurosciences. Three essays deal with gender and economy: one shows how gender stratification took hold in the early stages of industrialization in France, another demonstrates the persistence of gender stratification in modern economies, the third focuses on ideology in relation to gender and political power. Part III examines various aspects of the aged in contemporary society, including an argument for an interpretive social science that uses diverse methods to improve our ability to describe and interpret many facets of the lives of elderly men and women; a review of the methodology used to study changes in the aged population over time; and an overview of existing data sets that permit further cohort and longitudinal analyses of the aged. The final essays review social policies as they affect the elderly, with particular attention to the fact that most very old people are women, and the impact of the greatly expanded life course for family and kin relations. "Gender and the Life Course" is a state-of-the-art assessment of the best work currently being done' on gender and age a's maturational factors and is essential reading for anyone interested in adult development and gender roles.
