The Sea Changes Nancy Charley 2017-01-26 This book is the unexpected result of a 6-week residency at the Little Blue Hut on Tankerton Slopes on the North Kent coast. Nancy Charley's aim was to study colour and write poetry. However, she discovered much more and *The Sea Changes* was born. The book has scientific explanations rubbing shoulders with personal observations, anecdote, literature, folklore and history. Joy and wonder colour *The Sea Changes*.

Book Proposals That Sell W.

Terry Whalin 2021-07-06 An insider reveals the secrets to pitching your nonfiction book:

“Traditional publishing is shrouded with mystery. Terry Whalin peels back the curtain.”

—Michael Hyatt, New York Times-bestselling author of *Your Best Year Ever* In the beginning stages of writing a book, most people start with a blank page and write their entire manuscript. According to acquisitions editor, former literary agent, and author of

dozens of traditionally published books. W. Terry Whalin, this approach is backwards. He knows that about 80% to 90% of nonfiction books are sold from a book proposal. This mysterious document called a proposal contains many elements that will never appear in a manuscript—yet these details are critical to publishing executives who make the decision about publishing or rejecting an author's project. **Book Proposals That Sell** reveals twenty-one secrets to creating the kind of effective, impressive book proposal that can help an author make the sale.

2017-10-03 Read the true story of the manhunt that inspired *The Assassination of Gianni Versace: American Crime Story*, the acclaimed FX series. "The breadth and thoroughness of [Maureen] Orth's research are often staggering."—The New York Times "Fascinating . . . ripe with chilling detail."—Entertainment Weekly On July 15, 1997, Gianni Versace was shot and killed on the steps of his Miami Beach mansion by serial killer Andrew Cunanan. But months before Versace's murder, award-winning journalist Maureen Orth was already investigating a major story on Cunanan for *Vanity Fair*. Culled from interviews with more than four hundred people and insights gleaned from thousands of pages of police reports, *Vulgar Favors* tells the complete story of Andrew Cunanan, his unwitting victims, and the moneyed world in which they lived . . . and died. Orth reveals how Cunanan met Versace, and why police and the FBI repeatedly failed to catch him. Here is a gripping odyssey that

races across America—from California's wealthy gay underworld to modest Midwestern homes of families mourning the loss of their sons to South Beach and its unapologetic decadence. *Vulgar Favors* is at once a masterwork of investigative journalism and a riveting account of a sociopath, his crimes, and the mysteries he left along the way.

LONGLISTED FOR THE
BAILEYS WOMEN'S PRIZE
FOR FICTION 2016 Four-thirty
on a May morning: the black
fading to blue, dawn gathering
somewhere below the treeline
in the east. A long, straight
road runs between sleeping
fields to the little village of
Lodeshill, and on it two cars lie
wrecked and ravished, violence
gathered about them in the
silent air. One wheel, upturned,
still spins. Howard and Kitty
have recently moved to
Lodeshill after a life spent in
London; now, their marriage is
wordlessly falling apart.
Custom car enthusiast Jamie
has lived in the village for all of
his nineteen years and dreams
of leaving it behind, while Jack,
a vagrant farm-worker and
mystic in flight from a bail
hostel, arrives in the village on
foot one spring morning,
bringing change. All four of
them are struggling to find a
life in the modern countryside;
all are trying to find ways to

extraordinary climax over the
course of one spring month, At

exploration of love, land and
loss.

Balloons to Jets Howard L.
Scamehorn 2000 Balloons to
Jets: A Century of Aviation in
Illinois, 1855-1955, written by
historian Howard L.
Scamehorn, was originally
published in 1957 by the
Illinois State Historical Society
and distributed only to the
society's membership and to
select libraries in the state.
Scamehorn offers a wealth of
information not only on one
hundred years of aviation in
Illinois but also on events
leading up to the Wright
Brothers' initial flight in 1903.
Scamehorn's history of aviation
in Illinois covers such topics as
amateur pilots, aviation
contests and meets, the
development of airmail,
military aeronautics,
commercial air transport, the
expansion of airports, flyers
and flying achievements, and

state and federal regulation of aeronautics. But *Balloons to Jets* is not just a history of aviation in one state.

Scamehorn also traces national and international aviation progress from the free balloon to the dirigible. He then describes aeronautical activities and experiments by such people as Octave Chanute, Glenn Curtiss, Thomas Scott Baldwin, Otto Lilienthal, Samuel Pierpont Langley, and others that lent support to the Wrights' flight at Kitty Hawk. Of interest to both armchair aviation enthusiasts and professionals, Scamehorn's study illustrates the evolution of commercial aviation from its origins with the military and the itinerant flyer to Charles Lindbergh's successful transatlantic trip in 1927 and the subsequent explosion in public interest in flight. *Balloons to Jets* is lavishly illustrated with eighty-six black-and-white historic photographs of early aviators and a range of flying craft, including hot-air balloons, dirigibles, gliders, biplanes,

monoplanes, bombers, and early luxury transports. This reprint features a new foreword by Gene Abney, the former director of the Illinois Department of Aeronautics.

Rio Grande Fall Rudolfo Anaya 2015-06-02 A New Mexico PI tries to stop a cult leader's murderous rampage in "a fascinating hybrid of detective story, adventure yarn, and shamanistic magic." —Kirkus Reviews The world-famous International Balloon Fiesta of Albuquerque is one of the city's most eagerly anticipated annual events and its biggest moneymaker. But when a woman plunges to her death from one of the balloons—foreshadowed by Sonny Baca's vision of a body plummeting from the sky—Sonny's sure it's murder.

The dead woman was the chief witness to testify against the cult implicated in the murder-for-hire of Sonny's cousin Gloria, whose death still haunts him. In addition to motive, Sonny finds means and opportunity: a homeless family who saw someone push Veronica Worthy out of the hot-air balloon. Worthy was one of the four wives of Raven, leader of the sun cult, and a dangerous, shamanlike criminal who's supposed to be dead. But the four black feathers found on the corpse are his calling card—clues to let Sonny know he's alive and kicking. And his murder spree isn't over. Now, led by his spirit guides, Sonny must race to stop a vengeful madman and save the woman he loves. From the American Book Award-winning author, this is "a completely entertaining mystery novel [that] offers two parallel lands of enchantment" (Booklist).

explorer of Jupiter from two modern science fiction masters. Howard Falcon almost lost his life in an accident as the first human astronaut to explore the atmosphere of Jupiter—and a combination of human ingenuity and technical expertise brought him back. But he is no longer himself. Instead, he has been changed into an augmented human: part man, part machine, and exceptionally capable. With permission from the Clarke Estate, Stephen Baxter and Alastair Reynolds continue this beloved writer's enduring vision and have created a fresh story for new readers. The *Medusa Chronicles* charts Falcon's journey through the centuries granted by his new body, but always back to mysteries of Jupiter and the changing interaction between humanity and the universe. A compelling read full of incredible action right from the beginning, this is a modern classic in the spirit of 2001 and *The Martian*.

history of weather forecasting, and an animated portrait of the nineteenth-century pioneers who made it possible By the 1800s, a century of feverish discovery had launched the major branches of science.

Physics, chemistry, biology, geology, and astronomy made the natural world explicable through experiment, observation, and

categorization. And yet one scientific field remained in its infancy. Despite millennia of observation, mankind still had no understanding of the forces

behind the weather. A century after the death of Newton, the laws that governed the heavens were entirely unknown, and weather forecasting was the stuff of folklore and superstition. Peter Moore's *The Weather Experiment* is the account of a group of naturalists, engineers, and artists who conquered the elements. It describes their travels and experiments, their breakthroughs and bankruptcies, with picaresque vigor. It takes readers from Irish bogs to a thunderstorm in Guanabara Bay to the basket of a hydrogen balloon 8,500 feet over Paris. And it captures the particular bent of mind—combining the Romantic love of Nature and the Enlightenment love of Reason—that allowed humanity to finally decipher the skies.

including the Solar Tetron or the Giant Solar Sausage, are made from garbage bags and tape, while others, such as the Khom Loi, are created from tissue paper and wire; yet all of the projects use inexpensive, readily available materials and are easy to construct with only basic crafting skills. Ever safety conscious, this manual provides detailed guidelines for various methods to heat the interior air that lifts the balloons, including when and where open flames are appropriate, and the proper weather conditions to launch these creations. With a full chapter on troubleshooting, should a design fail to fly, this book will make balloon engineers of just about anyone.
