Howard, the Amazing Mr. Hughes Noah Dietrich 1976

Empire Donald L. Barlett 1979

Howard Hughes George J. Marrett 2016-05-15 George J. Marrett, a former test pilot for aviator Howard Hughes, separates fact from fiction to tell the inside story of the genius who set flight speed records in the 1930s and went on to develop some of America's most famous aircraft and weapons. The author draws on his wealth of experiences and those of other Hughes confidants to take readers inside Hughes's complex and clandestine world. Marrett integrates stories of Hughes the ace pilot with Hughes the designer and businessman who became America's first billionaire.

*Howard Hughes* J.D. Rockefeller 2016-08-26 Considered to be one of the most financially successful people in the world when he was alive, Howard Hughes attracts attention even forty years after his death. Right from being a business tycoon to an aerospace engineer and inventor to being a maverick filmmaker, Hughes seemed to have tried it all. It is probably very difficult to summarize his life and successes in a short e-book, but here we try to present you with some interesting aspects about his life. Without wasting any time, let's just get started!

**Howard Hughes: His Life and Madness** Donald L. Barlett 2011-04-11

Flying Boats & Seaplanes Stéphane Nicolaou 1998 Beginning with races that were staged at elegant French resorts in the early part of the century, flying boats and seaplanes have played an integral part in aviation history. World War I spurred the development of these machines, and by the 1930s, flying boats and seaplanes had become pioneers in transcontinental flight. This photo-filled history recalls the role of flying boats and seaplanes in civil and military aviation history, and the enthusiasm of the engineers and pilots who are associated with their development. In addition to the golden years of hydraviation prior to World War II, author Nicolaou examines the decline of the seaplane, and its subsequent renaissance in nations that are today considered seaplane paradises. The saga is illustrated by more than 200 rare photographs uncovered in archives around the globe.

Includes 16 pages of photos.

American Flying Boats and Amphibious Aircraft E.R. Johnson 2016-03-29

This work is a comprehensive, heavily illustrated history of the many flying boats and amphibious aircraft designed and built in the United States. It is divided into three chronological sections: the early era (1912-1928), the golden era (1928-1945), and the post-war era (1945-present), with historical overviews of each period. Within each section, individual aircraft types are listed in alphabetical order by manufacturer or builder, with historical background, technical specifications, drawings, and one or more photographs. Appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage.

**Howard Hughes** Geoff Schumacher 2020-03-11 This newly revised and expanded edition of Howard Hughes chronicles the life and legacies of one of the most intriguing and accomplished Americans of the twentieth century. Hughes, born into wealth thanks to his father's innovative drill bit that transformed the oil industry, put his inheritance to work in multiple ways, from producing big-budget Hollywood movies to building the world's fastest and largest airplanes. Hughes set air speed records and traveled around the world in record time, earning ticker-tape parades in three cities in 1938. Later, he moved to Las Vegas and invested heavily in casinos. He bought seven resorts, in each case helping to loosen organized crime's grip on Nevada's lifeblood industry. Although the public viewed Hughes as a heroic and independent-minded trailblazer, behind closed doors he suffered from germophobia,

obsessive-compulsive disorder, and an addiction to painkillers. He became paranoid and reclusive, surrounding himself with a small cadre of loyal caretakers. As executives battled each other over his empire, Hughes' physical and mental health deteriorated to the point where he lost control of his business affairs. This second edition includes more insider details on Hughes' personal interactions with actresses, journalists, and employees. New chapters provide insights into Hughes's involvement with the mob, his ownership and struggles as the majority shareholder of TWA and the wide-ranging activities of Hughes Aircraft Company, Hughes's critical role in the Glomar Explorer CIA project (a deep-sea drillship platform built to recover the Soviet submarine K-129), and more. Based on in-depth interviews with individuals who knew and worked with Hughes, this fascinating biography provides a colorful and comprehensive look at Hughes—from his life and career to his final years and lasting influence. This penetrating depiction of the man behind the curtain demonstrates Hughes's legacy, and enduring impact on popular culture.

**Howard Hughes and the Spruce Goose** Graham Simons 2014-08-27 Howard Hughes' life ambition was to make a significant contribution to the field of aviation development. But the monumental folly of his endeavours on the H-KI Hercules meant that he came to be known and remembered to a great extent for all the wrong reasons. The 'Spruce Goose' (a name Hughes detested) became a product of his wild fixation on perfection and scale. Once completed, it was the largest flying machine ever built. Its wingspan of 320 feet remains the largest in history. Yet it only completed one flight; flying for a mile on its maiden voyage above Long Beach Harbour, before being consigned to the history books as a failure.??Experienced author Graham M. Simons turns his attention to the production process that saw this colossus take shape. In words and images, all aspects of this process are illustrated. We have shots taken during the initial design period, images of the craft under construction, and photographs taken at the test flights. In addition,

Simons has been gifted access to the highly prized and rarely seen aircraft manual produced for the aircraft, content from which has been extracted and used to supplement the narrative.??The book goes on to explore the political issues that sprung up as a result of Hughes' endeavours, looking into the Senate War Investigations Committee's findings which explored the extent to which government funds had been utilised in the development and construction of the airship, adding a whole new layer of controversy to the proceedings.

**Howard Hughes Was Bob Hope in Make-Up** Joseph Polillo  
2019-06-23 I always knew Howard Hughes was Bob Hope in makeup. I knew who Bob Hope was since the '70s. I began gathering facts and

proofs to prove beyond reasonable doubt that I knew what I was talking about! I wrote this book because I was tired of telling my theory to just one or two people at a time. Howard Hughes was Bob Hope in makeup, and he told you so in his TV skits, in his movies, and in his books. The life of Bob Hope was a cover story bought and paid for by the United States government—an alleged life. Howard Rupert Hughes Jr. was “Sonny” billionaire industrialist, oilman, movie producer, screenwriter, director, photographer, and inventor of satellites, lasers, ships, planes, jets, and rockets. Hope himself stated that he had a group of writers, and he was the one with two (2) heads. And most of all, he was a character actor in his own movies from his own studios. I have in my possession a magazine ad with Hope lying in bed, and the header above his picture read: “Two of the most famous names in America sleep together.” My theory is, Howard Hughes disappeared, went underground, and reappeared in makeup as Bob Hope in an “alleged life,” wearing a mask. Howard Hughes was talking behind his Bob Hope face. Here’s a quote from Hope: “I do my best impersonations right in front of the people, and they don’t get it. They don’t listen.” Hope stated “my names” would go down in history. Another quote from Hope stated, “My sixty years with NBC proves Lincoln was wrong. You can fool all the people all the time.” He did!

Howard's Whirlybirds: Howard Hughes' Amazing Pioneering Helicopter Exploits Donald J. Porter 2014-03-26 Howard Hughes, the movie mogul, aviation pioneer and political hound dog, has always fascinated the public with his mixture of secrecy, dashing lifestyle and reclusiveness. Companies responsible for major technological leaps often become household names. An exception is Howard Hughes's pioneering

helicopter company, Hughes Helicopters, a name that has fallen into oblivion. Yet most schoolboys in the world have heard of the company's prize-winning product: the Apache helicopter. Hughes popularised the light helicopter trainer, mass-produced the first turbine-powered light observation helicopter, led the way in hot cycle rotorcraft propulsion research and, finally, developed the world's most advanced attack helicopter that was purchased and saw service with the UK. Here's how some of the world's most innovative helicopters were developed. Covering the period from the Second World War until the mid-1980s, you will learn why Hughes military aircraft contracts came under close scrutiny by the US government. The story is rich with tales of technological breakthrough and test-flying bravado made possible by a small crew of engineers and daring pilots. Written by a technical expert and insider to the industry, Howard's Whirlybirds: Howard Hughes' Amazing Pioneering Helicopter Exploits is a fascinating and alternative view on the phenomenal pioneer with unpublished photographs and material that will fascinate the aviation and military historian as well as the casual reader and cinema buff.

*The Final Days of Howard Hughes* Christopher John Jenner 2015-03-06 This stunning expose attempts to blow the lid off the decades old case of the death of Howard Hughes, playboy movie-maker, aviator and businessman, alleging a murder and takeover conspiracy orchestrated by the very company designated to care for an aging Hughes The Final Days of Howard Hughes exposes Summa Corp. Syndicate's efforts to siphon off the wealth of The Man, and cover up their neglect, malfeasance and murder with a very detailed Plan of action, all exposed within.

**Howard Hughes and the Creation of Modern Hollywood** Jeffrey Richardson 2019-07-04 Howard Hughes was an industrialist, aviator, and eccentric, but he was also the most important movie producer during the golden age of Hollywood. At a time when filmmaking was tightly

controlled and highly formulaic, Hughes used his enormous wealth to challenge the dictates and restrictions that defined the motion picture industry. Tackling subjects that were explicitly forbidden, he pushed the boundaries of onscreen sex and violence. He pioneered production and marketing techniques that were revolutionary, including the multimillion-dollar blockbuster and the promotion of scandal. When Hughes became the first person to completely own a major Hollywood studio, he continued his maverick approach to filmmaking as a mogul. Most importantly, Hughes's role in the federal government's antitrust case against the industry led to the collapse of the entire studio system and the transformation of American cinema. Although his contributions are often overlooked, Hughes was instrumental in shaping the motion picture industry that exists today.

**Hughes Flying Boat Manual** Hughes Tool Company 2009-10 The legendary H-4 Hercules was designed and built by the Hughes Aircraft Company. Intended to defeat the German U-boat threat, the plane was intended to be a super transport that could ferry 750 troops from the USA to Europe, and serve as an aerial ambulance on the return flight. Owing to wartime restrictions on the use of aluminum, the prototype Hercules was built using laminated birch wood. Although company CEO Howard Hughes hated it, the name "Spruce Goose" was coined for the plane and it stuck. The Hercules would be the largest flying boat ever built, and one of history's largest and most expensive planes. Many questioned the practicality of the aircraft, and after the war ended and the project was roundly criticized as a boondoggle. To silence the critics, Howard Hughes decided to prove the plane could fly. On November 2, 1947 he and a crew of 21 conducted a series of taxi tests with the plane. On the last test, the plane became airborne for a brief time and flew just under two miles at an altitude of roughly 70 feet. It would never fly again, but Hughes had silenced his critics. This Hughes Flying Boat Manual was originally prepared for the U.S. Government's War Department, and made available through the Freedom of Information Act. It provides an overview of this massive plane's design and operation for the pilot and flight crew, and puts you right in the cockpit of one of

history's great planes. Please note, because this document originated from an archival copy, legibility can vary.

Howard Hughes: The Secret Life Charles Higham 2013-09-24 His wealth was legendary. His passions were bizarre. Now, the truth about the money, the madness, and the man behind the enigma. Howard Hughes is one of the best known and least understood men of our times--famed for his wealth, his daring, and his descent into madness. Bestselling biographer Charles Higham goes beyond the enigma to reveal the incredible private life of Howard Hughes: \* his romances with the great stars of Hollywood--Katharine Hepburn, Bette Davis, Cary Grant, Tyrone Power, and numerous others \* his forays into sadomasochism \* his involvement with Richard Nixon and Watergate \* his bizarre final years This is a compelling portrait of a unique American figure--in a story as revealing as it is unforgettable.

Flying for Howard Hughes Robert Wearley 2017-01-30 Robert F. (Bob) Wearley served as Chief Pilot of Howard Hughes' personal fleet of aircrafts, in addition to his long and distinguished flying career in military, corporate, and commercial aviation. In his book he gives readers a behind-the-scenes look at the often strange, always eccentric inner workings of the Hughes Empire. Bob also details the connection between the Hughes organization and the Nixon White House and reveals the real reason why Nixon ordered the Watergate break-in that ultimately forced his resignation.

Hughes After Howard D. Kenneth Richardson 2011-07-07 "People everywhere have heard of the eccentric Howard Hughes, but few know that in 1953 he virtually disappeared from the company he had begun in 1932. Under new, creative, and inspired management, Hughes Aircraft Company became the leading military electronics organization in the world and rose to 85,000 employees. Some called it a national treasure. In this new 496-page book, Hughes Aircraft Company's past president Ken Richardson shows how this was done. Collaborating with over 60 past employees, Ken has compiled this remarkable piece of American aviation history. Learn about many complex products in all fields of electronics crafted by this highly motivated, inventive team."--Publisher's

**Big Wings** Philip Kaplan 2005-09-30 In the history of aviation there have been many attempts to produce aircraft of extraordinary proportions to expand the limits of technology and create new performance standards. With few exceptions, the early attempts did not become the successes envisaged until post-World War II when such aircraft as the Boeing B-52 long-range heavy bomber and the Boeing 747 'Jumbo Jet' airliner changed the face of aviation in both the military and civil roles. Big Wings is a well-researched, highly informative and sometimes nostalgic look at the sixteen most significant giants of the air. Each chosen aircraft is introduced and its raison d'être explained, then follows an in-depth review of the successful and failed technical aspects of the design, its operational history, first-hand accounts from those that had flown the aircraft and finally some startling facts and statistics. The aircraft selected are as follows: Military - Douglas B-19, Boeing B-29, Consolidated B-36, Northrop B-49 and Boeing B-52, Airliners - Bristol Brabazon, Boeing 747 and Airbus A380, Heavy Lifters - Messerschmitt Me323, Consolidated XC-99, Lockheed C5 and Antonov AN-225, Flying Boats - Dornier Do-X, Martin JRM Mars, Hughes HK-1 and Saunders Roe Princess.

*Glenn Curtiss* Alden Hatch 2007-11-01 A classic biography returns to print after 60 years! Although the Wright Brothers are remembered for performing the first human flight, Glenn Curtiss stands as the most important aviator in American history. Like his friend Alexander Graham Bell, Curtiss was a master inventor as well as a daredevil. He won the first airplane race in history (the 1909 Gordon Bennett Cup), and he was the first pilot to take off from and land an airplane on the deck of a ship. He invented the twin flying boat, which became a mainstay for the Allies during the First World War, and his NC-4 Flying Boat performed the first transatlantic flight in 1919—eight years before Charles Lindbergh's flight. Curtiss planes eventually trained 95 percent of all American pilots in the first half of the 20th century. Fans of aviation, history and compelling biographies of famous Americans such as Howard Hughes will be delighted to read about Glenn Curtiss.

*Around the World in Eighty Years* Charles Barton 2014-01-10 Around the World in Eighty Years: Tales told by an expert who was there at turning points in aviation history and international developments. Readers with an interest in aviation, the rise of China or simply a gripping story are in for a treat. Barton was born in 1920 in Emmett, Idaho. He saw Charles Lindbergh land in Boise, Idaho in 1928. Barton fell in love with the idea of flying at eight years old and had built, and flown, his own glider before he finished High School in Longview, Washington. Then he went to California and majored in Chinese Studies at Stanford University. Barton learned to fly powered planes... Joined the Navy...Became both a pilot and an instructor- flying everything from Piper Cubs to four-engine Super-Constellations. After 30 years in the U.S. Navy Barton retired -for the first time- from the post of the U.S. Naval Attaché to Thailand. But he just kept going. After retiring Barton earned his MA from George Washington University and began a second career as an author and journalist. He followed this with a third career as a China consultant and translator. He retired fully at age 90 to work on his memoirs. Around the World in Eighty Years is Barton's third book. Charles A. Barton, Captain, United States Navy, Retired, is the award winning author of two previous books and numerous articles. His book "Howard Hughes and His Flying

Boat' won the aviation book of the year award in 1982, and has been in print ever since.

**Howard Hughes** Donald L Barlett 2004-09-21 Aviator, Playboy, Film Producer, Entrepreneur, and Recluse, Howard Hughes lived a life that was the stuff of headlines. Donald L. Barlett and James B. Steele's biography is an extraordinary and brilliantly researched work on Hughes's multiple careers; his romances with Katharine Hepburn, Ava Gardner, Lana Turner, and Rita Hayworth; and his turn away from the world into addictions and secrecy.
